Shelhamer eases crisis

HARRISBURG - Acting Secretary of Agriculture Kent Shelhamer on Monday issued the results of a survey begun last week by his Department, of both long and short range effects on the efforts of the Commonwealth's farmers.

According to Shelhamer, the most pressing initial problem revolves about rural roads which have either drifted shut or become difficult to travel because of ice. Shelhamer said he had assurance from Transportation Secretary William Sherlock that all means, including the addition of rotary plows in some areas, will be extended to clear passages to farms, especially dairy farms.

The Agriculture Secretary said that his Department had already helped many dairymen whose markets

Weather spared none

By DIETER KRIEG

LANCASTER - It doesn't matter much which branch of agriculture you're in - every farmer is likely to feel some effect as a result of the severe winter of 1977. Even if the extreme cold didn't affect a grower directly, it's very likely to affect him indirectly in the form of prices for products he sells or supplies he needs. That's the conclusion of a number of agricultural leaders.

The small grains and hay crops for this year, for example, may be receiving damage right now. No one knows yet for sure, but it's a fact which is being considered. Fruits and vegetables have been hurt. Egg production has declined, and prices for many of these products are now likely to remain strong.

According to John Hoffman of the Pennsylvania Poultry Federation, the most immediate impact in this industry will be on egg production and prices. He noted that egg prices had

Red Rose 4-H'ers honored

By JOANNE SPAHR

LANCASTER - The 4-H Red Rose Beef and Sheep club honored its own last Thursday night and wrapped up a year of successful club work at their annual dinner meeting held at the Farm and Home Center.

After an evening of entertainment and fellowship, awards were bestowed upon those in the club who had received the most recognition over the year for work with their animals or their performance on a judging team.

Topping the honors in the beef club membership was Marty Burkins, Holtwood R1, who showed the county as well as district champion steer. Although her prize winning animal is now just a memory, Marty received two gifts which will help to keep that memory alive in years to come. From J. C. Snavely & Sons, Landisville, she received a silver trophy,

[Continued on Page 27]

It was a proud bunch of beef club members who assembled to get their pictures taken with their trophies after the annual dinner meeting of the Red Rose 4-H Beef and Sheep Club. Seated (from left to right) are Gary Eberly, who was the champion county showman; Marty Burkins, who had the champion county and district steer; and Jeff Martin, who showed the reserve grand champion steer of the district show. Standing are Tim Hess, who owned the reserve champion county steer, and the three Frey cousins who exhibited the champion lightweight trio at Farm Show. The furthest Frey to the left is Ernie, then Jamie, then Fritz. Missing when the picture was taken was Ken Brubaker, champion beef showman of the State Farm Show.

School milk caused concern

By JOYCE BUPP
York County Reporter

YORK, Pa. - Governor Shapp reopened Pennsylvania schools just in time to save York County dairies the milk which they had already processed and packaged for this Class I institution trade.

M. Ebert Rutter, of Rutters Dairy, York, indicated that the schools they serve had opened in time to fully utilize the prepared cartons of milk.

"We are trying to make arrangements to divert some milk to another area of the state to a manufacturing plant. Anytime the schools close, there's a backup of milk. But we're still fortunate in this area, compared to parts of the country where farmers have had to dump milk," commented Rutter.

Green's Dairy of York stopped processing for the school trade at the first

Dairy situation under control

By DIETER KRIEG

LANCASTER - "The weather has caused several problems," Jim Sumner of Inter-State Milk Producers, Philadelphia, began. "First of all, we're concerned about plants getting gas; secondly, the loss of several days' milk sales has left us with a little more surplus milk, and thirdly, due to milk production being up six per cent over a year ago, that's got the bucket full."

Sumner, who serves on the public relations and communications staff at Inter-State, made the remark on Wednesday. It should be noted that the situation changes from day to day, due to weather changing and various public and private sectors trying to do their best to stay ahead of the matter.

Acting Secretary of Agriculture Kent Shelhamer confirmed the changing status of things Thursday afternoon in a telephone

[Continued on Page 34]

Sarah Lynn Brubaker (left) showed the county champion lambs and the reserve grand champion lambs at the State Farm Show. Barbara Herr (right) was named the champion lamb showman at Harriburg and also had the county reserve champion pen of lambs.

Northern farms choked by blizzard

SYRACUSE, N.Y. - "Milk loses may hit upwards to $60,000 a day in the northeastern part of the United States due to one of the area's hardest winters in history," exclaimed John C. York, general manager of the 8000 dairy farmer member Eastern Milk Producers Cooperative, headquartered here. He made the remark Feb. 2, the same day the Quarryville groundhog forecasted six more weeks of winter.

After making several on-site inspections of hard hit areas in Pennsylvania and New York, the dairy spokesman said that many rural roads with drifts up to 20 feet high have not been plowed since January 28. Farm operations have virtually come to a standstill, noted York.

A state of emergency has been declared in several counties with western New York and St. Lawrence,

Lancaster Grain Prices

Friday, Feb. 4

These prices are made up of the average pieces quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Friday, Feb. 4 are as follows:

	Bid+	Offered+
Ear Corn	58.25	69.00
Shelled Corn	2.59	2.75
Barley	2.41	2.65
Oats		
Local	1.67	1.87
Western	2.25	2.41
Wheat		
Millers	2.71	2.86
Soybeans	7.20	—
Soybeans Meal		264.00

Futures Trading

(Closing Bids as of Thursday, Feb. 3)

	Chicago Cattle	Chicago Hogs	New York Maine Potatoes	New York Fresh Eggs

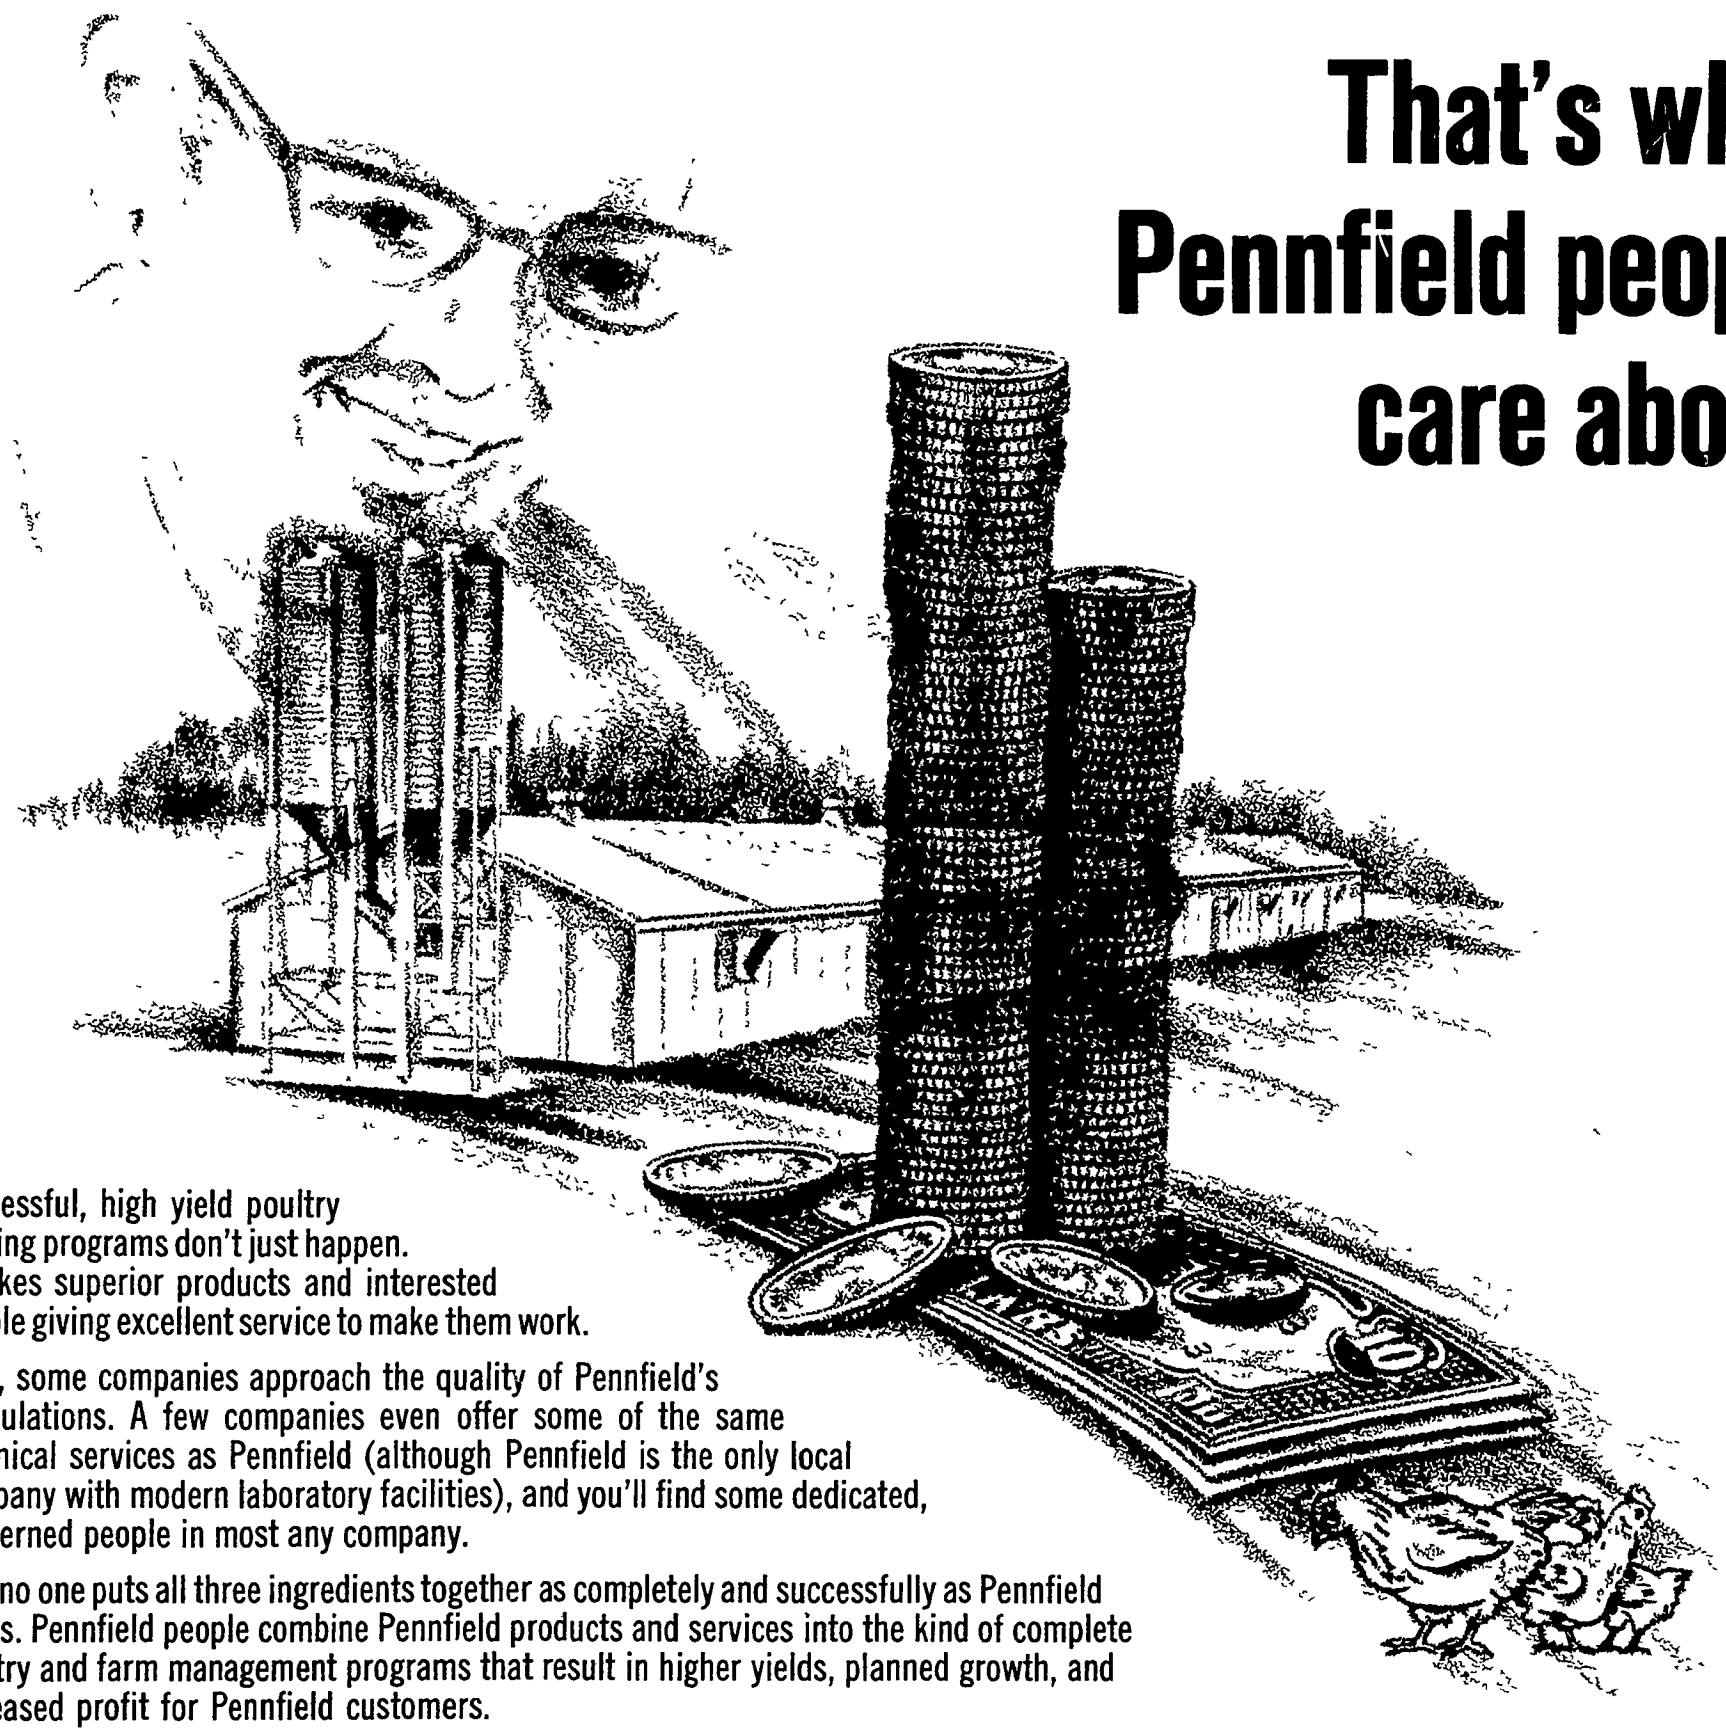
DEKALB

Your POULTRY PRODUCTIVITY, your PROFITABILITY.



That's what Pennfield people care about.

Successful, high yield poultry feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete poultry and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy.

BULLS: Yield Grade 1-2 1100-1800 lbs. 29.00-33.50; Few Yield Grade 1 34.00-35.00.

Omaha Cattle

February 3, 1977

Compared with the previous week's close: closing prices on Slaughter Steers were 50-100 higher and Heifers closed 50-75 higher. Cows were mostly 1.00 higher, Bulls weak to 1.00 lower.

Four day receipts 12,300 compared 15,300 previous week and 17,200 a year ago Weather was a dominant factor in the cattle trade as severe storm conditions and blocked roads over the eastern portion of the country virtually paralyzed movement of the finished product the fore part of week. Marketings were substantially reduced during the period, and late supplies were not sufficient to reflect the improved demand as travel conditions returned to more nearly normal conditions. Despite the transportation difficulties, the rate of slaughter under federal inspection showed little change. The Steer and Heifer supply locally was only moderately attractive with a large share Good to Average-Choice most days. Steers made up approximately 40 and Heifers 38. Cows comprised 13 and Feeders 7.

STEERS: the fore part of week, several loads Choice and Prime 3-4 1082-1332 lbs. 38.50-38.75. At close, Choice 2-4 975-1300 lbs 37.75-39.00. Mixed Good and Choice 2-4 950-1250 lbs. 37.00-37.75, occasionally 38.00. Good 2-3 33.75-37.00, Holsteins 33.75-34.00. Standard and Good 2-3 31.50-33.50.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. Steers this week 38.15; Choice 1100-1300 lbs. 38.28. Average weight Steers first three days 1161 lbs. Compared 1134 lbs. previous week. Average weight Heifers first three days 996 lbs. as compared 993 lbs. previous week.

HEIFERS: at close, part loads Choice and Prime 3-4 986-1000 lbs. 37.75. Choice 2-4 850-1050 lbs. closed 36.00-37.25, load predominantly 37.50. Mixed Good and Choice 2-3 850-1000 lbs. 35.00-36.25. Good 2-3 31.00-34.50. Small lots Standard and Good 2-3 30.00-31.00.

COWS: Utility and Commercial 2-4 22.50-24.00, few 24.25-24.50. Canner and Cutter 19.00-22.50, Mixed Cutter and Utility 22.75-23.00.

BULLS: 1-2 1400-1800 lbs. 27.00-30.00, Individual 1 31.00-32.00.

Valley Livestock

Athens, Pa.

Monday, January 31, 1977

Reported receipts of 490 calves, 156 cows, 46 heifers, 25 bulls, 25 steers, 53 hogs, five goats. Cattle market steady with last week's market. Calf market also steady with no horses.

Veals 25.00 - 42.00; bobs 50.00 - 68.00; grassers and feeders 16.00 - 30.00; lambs 30.00 - 40.00; sheep 8.00 - 16.00; hogs 18.00 - 41.00; pigs 8.00 - 20.00; heifers 24.00 - 29.75; steers 20.00 - 27.50; bulls 24.00 - 33.00; cows, good 25.00 - 27.50; cows, med. 22.50 - 23.50; cows, poor or small 18.00 - 21.00; ponies 8.00 - 10.00; goats 10.00 - 30.00

Cheetahs Unique

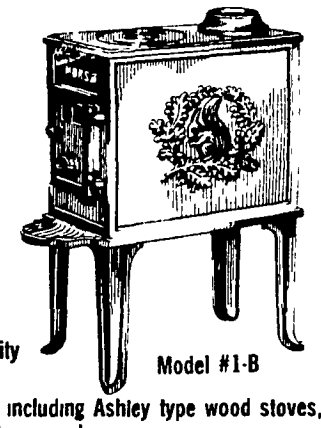
Unlike lions, monkeys and many other animals, cheetahs don't live in family groups Males leave the females after mating, and mother cheetahs raise their cubs alone

Timber Available

The United States has nearly two trillion board feet of standing softwood timber — enough to supply wood for many years, according to the U S Department of Agriculture

case

MORSØ - THE WOOD STOVE THAT PAYS FOR ITSELF



* Air tight design
* Baffle system
* Long burning
* 70-75% efficiency
* 240 pounds cast iron
* Enamel finish
* Inner cast liners
* Large feed door
* Burns 22 8" log
* 5,186 cu in.
* Holds fire overnight
* 6,000 cu. ft. heating capacity

Model #1-B

We have many to choose from including Ashley type wood stoves, wood and coal combination stoves and ranges.

Build your own chimney with insulated stainless steel chimney pipe - we have it in stock

This winter is an exceptionally good winter to burn wood and save on fuel bills

EDITORIAL COMMENTS

By Dieter Krieg, Editor

Don't get hooked on phony sales

If your phone rings and the person on the other end of the line begins to talk about the good deal he has for you, think twice before you agree to buy

Information received here during the last couple of weeks indicates that some phony wheeling and dealing may be taking place in the area via the telephone So beware

Anyone receiving a call from a company regarding the sale of a product should be careful in how he responds, especially if he never heard of the company, as is often the case For further protection, check with others in the community, including reputable businesses, Extension agents, and authorities Also keep the Bureau of Consumer Protection in Harrisburg in mind

For days I had kept a close eye on "Piggy," a mature Holstein which was never really anything to brag about in the past, but seemed to be really "developing" for her upcoming lactation I kept thinking to myself that she'd really be something if she'd milk the way she looked I had no reason to believe she wouldn't and was convinced enough with that evaluation to have turned down a fair price for her earlier in the month

The days went by and "Piggy" became bigger and bigger

One morning I found her dead

Not nearly as big now after having given birth to a calf (which was also dead), "Piggy" layed in the shed on her side with all legs extended towards the wall Her body was completely lifeless and stiff

Surprised and puzzled over the tragedy, I questioned our veterinarian about it

"Piggy's" problem turned out to be a malfunctioning of the placenta - hydrops of the uterus The reason she became so big was because the fluids within her uterus, which were meant to protect the calf, never quit building up When she gave birth to the calf, the fluids were released and the sudden change in internal pressure resulted in shock "Piggy" died

Later that day, a truck pulled into the barnyard Loose chains jingled inside the smelly and obnoxious metal body I hated the sight of the truck It had been here before It came to pick up the dead calf and cow

The driver backed his truck up to the shed, climbed out, ambled to the rear, and prepared to load the dead animal A cable was secured around her neck and then a winch was put in motion "Piggy" was pulled on board The metal tailgate was slammed shut and that was the last I saw of her

Before leaving, the driver reached into the cab and handed me a free yardstick That's all I got for her A few weeks earlier I had been offered $700

Nowadays a farmer doesn't even get a yardstick for his dead cow Instead he may even end up paying $10 to have the animal removed from his premises

THE CREDENTIALS

Lesson for February 6, 1977

Background Scripture: Mark 5:21-43; Luke 7:1-23. Devotional Reading: Luke 7:1-10

"Are you he who is to come, or shall we look for another?"

This question, sent to Jesus by the imprisoned John the Baptist, seems astounding! Is this not the same John who once stood by the River Jordan and, looking at Jesus, proclaimed: "Behold the Lamb of God, who takes away the sin of the world" (John 1:29)? Is this not the same John who testified of seeing "the Spirit descend as a dove from heaven" upon Jesus, who protested that Jesus should be baptising him instead (Matthew 3:14)?

Are you the one?

Yes, it was the same John the Baptist, but, no, it was not. People change, they are subject to moods of depression and inspiration, faith and doubt. John the Baptist, the fiery prophet in the wilderness was now John, the prisoner of Herod, shut up in a dark, filthy dungeon and near the end of his brief life. He remembered that great day by the Jordan when Jesus had come to him for baptism; he recalled the exaltation of that moment when God revealed to him the identity of his Son, the Messiah; he could see in his mind's eye that scene when Jesus came up out of the river, himself caught-up in that ecstatic moment.

Now, however, he seemed far away from his beloved wilderness. A tiny, putrid cell was his unseeing window on the world. He was tired from the deprivations and cruelty of his imprisonment. Now in the darkenss of his captivity there came a nagging doubt: Am I sure that Jesus is the one, or did I make a mistake?

If John's faith wavered in Herod's fortress, we cannot blame him or be surprised. It is understandable that he should want reassurance from Jesus, some indication that if Herod took his life, he had not failed in his mission.

What you have seen?

To this important, legitimate question, Jesus gives a most significant answer. One might expect that Jesus would send John an outline of his teaching in order to authenticate his credentials. This would have been the time-honored method of the rabbis. But Jesus said nothing about his teachings in his reply.

Neither did Jesus produce a selection of scriptural passages to prove his identity as the one "who is to come." Although the use of scriptures probably would have been convincing to John, and, although Jesus was very knowledgeable in the holy writings, he made no reference to them to John's disciples.

We might expect that Jesus would produce a genealogy (similar to what Luke and Matthew provide in their Gospels) which would authenticate him as the Christ. But Jesus made no reference to his lineage. Neither did Jesus ask the crowds for a testimony, nor the religious authorities for their stamp of approval

What, then, were his credentials?

NOW IS THE TIME...

TO EVALUATE FARM RECORD KEEPING

If 1976 farm records are not sufficient to give the desired information for both income tax reporting or farm planning, now would be a good time to change your system and get a better one. Good records are a "must" these days and we hope that every farmer will give some thought to his needs in this respect. There are many kinds and systems in record keeping and I'm not certain there is the best "one" for every producer. The important thing is to have a set of records that will reflect the cash flow of the business, the change in inventory, and make it possible to know the areas of best returns, or little returns. We urge some time to be spent on farm records at this period of the year in order to do a better job in the future.

TO USE SHEEP HURDLES

Lambing time is here for many shepherds and already we have gotten questions relating to ewes not owning their new-born lambs. This is a difficult situation when the ewe will not permit her new-born lamb to nurse; I've heard of many methods to try and get the two together, but prevention is a better practice. When the ewe is showing signs of lambing it might save a lot of trouble to use a small hurdle to separate her from the rest of the flock - or put her into a small pen away from the others. This will make it much easier for the lamb to find it's first meal and more likely for immediate attachment. Also, in this cold weather it is very important to have extra heat in the area to prevent chilling of the young lambs.

TO REMEMBER CORRESPONDENCE COURSES

Many folks are not able to get away from home to take regular courses in college or universities. The solution might be to take one or more of the correspondence courses offered at Penn State; these are available on many home Economics and Agricultural subjects and are very practical. We have a publication that will explain the various courses available. One recently announced is course No. 191 entitled "Farm Financial Management". This is a very important item to all farmers since we are handling more money each year and have larger investments. Details are available at any Extension office.

TO KEEP DOWN MACHINERY INVESTMENT

Many of our agricultural economists feel that farmers in general are over-invested in farm machinery; they present the question of ownership of this equipment, or the hiring of the work done on a custom basis. Much of the larger specialized equipment carries a very high price tag. Economists suggest that we should figure the per acre or the per hour cost of using your own machinery and then compare with local rental or custom rates. I'm aware that it is nice to have your own and do the work when it is ready, but this plan might be costing too much money for overhead and depreciation. The loss of some quality and quantity of a crop might not be serious enough to offset the high cost of ownership. Local producers are urged to give this some consideration before making additional large investments.

Farm Calendar

Today, Feb. 5

Ephrata Area Young Farmers hold annual banquet, Mount Airy-Durlach Fire Hall, 6:45 p.m.

Monday, Feb. 7

Red Lion Area Young Farmers; 8 p.m. at the high school; pesticide applicators certification course.

Cumberland Countians note deadline for registration for Estate Planning Seminar, contact Extension Service.

Manheim Young Farmers hold meeting at the high school at 7:30 p.m. on crop fertilization and manure management.

Tuesday, Feb. 8

Lancaster County Extension Service Association annual banquet, 6:45 p.m. at the Farm and Home Center.

Hunterdon and Warren Counties, New Jersey, vegetable growers meet at Hackettstown High School, 1 p.m.

Dauphin County dairy barn meeting on mastitis control, 1-3 p.m. at the Robert Oellig farm, Hummelstown R4.

Ephrata Area Young Farmers hold third meeting on dairy breeding, at the high school, 7:45 p.m "USDA Sire Summary Analysis and Sire Selection" - Clarence Stauffer, Darvin Yoder, Dan Rush

Purina Dairy business management meeting, Kutztown, 10 30 a.m - 3 p m

Corn results with Unipel® 20-10-10 will outweigh "bargain programs."

Don't be fooled by prices for the "cheaper spread" when you're planning a corn fertilizer program The great differences you'll observe and get by using a good Unipel program vs bargain blends will cost less in the long run and return more

We have results showing that a heavy Spring application of Unipel 20-10-10 not only reached the goal but yielded up to 30 bushels an acre more than a blend of the same 2-1-1 analysis made from ammonium nitrate, 0-46-0 and 0-0-60

The difference of $12.15 invested in Unipels returned an additional profit over $85 above fertilizer investment On a per ton basis, the Ortho Unipel 20-10-10 produced an extra $195 worth of corn

Unipels combination of 2 forms of Nitrogen and Phosphorus, with Potash, in each pellet provides a lot of plant-growing advantages One is that both Nitrogen and Phosphorus occur in quick-acting and long-lasting forms to give a fast growth "kick' at the start—even in cool weather—and then feed continuously throughout the season The intimate chemical combination of Nitrogen and Phosphorus "interacts" to increase Phosphorus uptake 50% more than separate or blended applications of N & P The Phosphorus in Unipel 20-10-10 is able to resist Phosphorus fixation in the soil and feed continuously, even in low-P and acid soils

So, when thinking about corn fertilizer this Spring, think Unipel results not blend bargains We ll gladly recommend a Unipel 20-10-10 program that will make you significantly better off in yields and profits

FEEDER Pigs 125. US No. 1-3 (1 lot) 15 lbs. feeder pigs 11.00 per head, No. 1-3 20-25 lbs. 8.00-18.00, No. 1-3 30-50 lbs. 20.00-28.00, Utility 10-35 lbs. 5.00-11.00 per head.

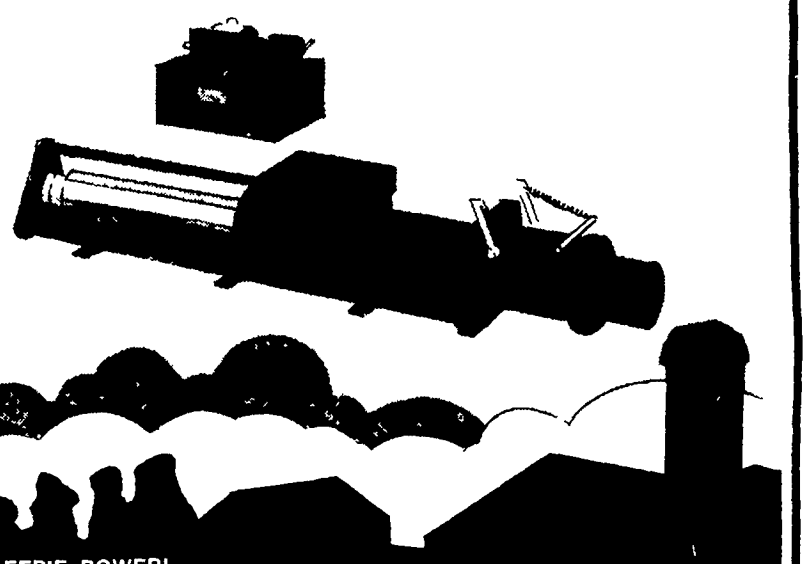
SHEEP 8. Few Choice 50-110 lbs. wooled slaughter lambs 50.00-56.00. Few Slaughter sheep 17.00-19.00.

GOATS 54. Bulk of supply of milking herd with milk goats selling mostly 20.00-48.00 per head, few to 53.00.

ACORN IS ON THE MOVE!

acorn

ACORN MONSTER



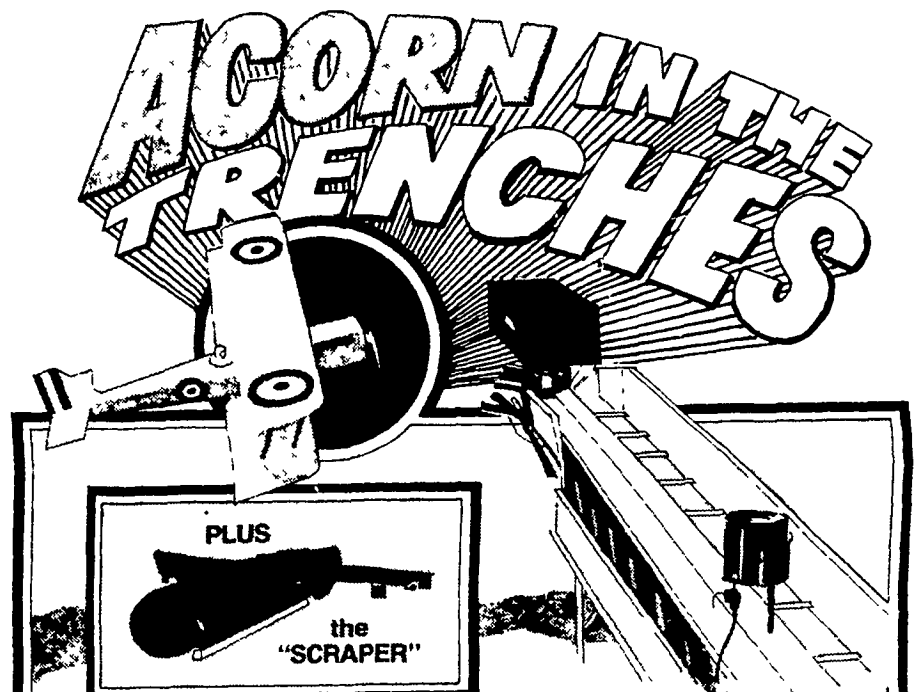
EERIE POWER!
Acorn's monstrous hydraulic manure pump reigns as king of the pit with ram-slam power performance difficult to match Expedites chunky manure and bedding — wet or dry

STAR FEATURES!
- Pump forces oxygen into remote pile with every stroke Mellows manure into rich product with less odor
- Fresh manure is forced up and into the pile retaining valuable nitrogen reducing odor and flies
- Eliminates daily hauling and with proper management can reduce fertilizer costs
- Massive piston—10½' dia x 41½"—rams home the toughest manure — from slurry to bulk with long straw
- Rugged spring-loaded gate valve prevents manure backflow Unique in design — proven in the pit

AMAZING NO-NONSENSE WARRANTY
Only the Acorn Hydraulic Manure Pump is fully backed by a no-nonsense one-year warranty

ACORN'S MANURE MONSTER. MAKE IT THE COMING ATTRACTION ON YOUR FARM SOON!

ACORN IN THE TRENCHES



BATTLE-PREPARED!
Nothing fights tougher in the trenches than Acorn barn cleaning equipment Put Acorn in your clean up platoon and start winning the manure battles

HEROIC FIGHTERS!

Super 600 Chain Gutter Cleaner — cleans at 23 ft per minute Flight tip up feature automatically tightens & cleans chains 11 ga galvanized steel box beam elevator Super-tough transmission

Liqui-Matic Cable Gutter Cleaner — for small to medium operations — ideal for slurry manure Lower energy use with 1 to 2 HP motor Tough paddle train operates at 140 ft per minute

Mark II Alley Scraper — rugged alley proven design features at less cost than other makes Quick response controls for total automation Special tip up scraper wipes more manure than other designs

ACORN GUTTER CLEANERS & SCRAPERS — PUT 'EM UNDER YOUR COMMAND. THEY'RE LOYAL FIGHTERS — BACKED BY ACORN'S NO-NONSENSE 1-YEAR WARRANTY.

Beef leader calls for unity to meet challenges

ATLANTA, Ga. - A more unified approach to public issues and more involvement of individual cattlemen will be necessary if the beef cattle industry is to meet the challenges which it now faces, members of the American National Cattlemen's Assn. were told here on Wednesday

Addressing the association's 80th annual convention, ANCA President Wray Finney reminded cattlemen that they have two choices as they deal with problems affecting their industry and their individual operations.

"We can sit back and blame everybody else for all of our problems," he said. "Or, we can join together, as an industry-wide organization, in fighting for the best possible political and economic climate for a free enterprise business like ours. At the same time, we as individual cattlemen can improve the performance of our own operations. Only by doing these basic things can we expect to earn a proper return on our investment, and a proper return for our management and hard work."

Finney's comments on the industry and ANCA were part of an over-all convention program which focused on the outlook - providing guidelines for individual cattlemen, their trade association, and the industry as a whole, as they move through an era of continuing change. He noted that the industry as a whole, as they move through an era of continuing change. He noted that the industry should begin this year to emerge from the prolonged economic squeeze brought on by cyclical overproduction of beef and sharp increases in production costs.

After outlining several challenges to cattlemen in both the public affairs and economic areas, Finney emphasized several things which he felt "we as individuals and as an organization must do if we are to prosper - indeed just survive - in a changing world:"

1. The industry must seek to maintain the incentive, free enterprise system in the cattle industry. "I am confident that, in spite of our cost-price squeeze in recent times, you did not elect me a year ago to preside over the abandonment of the free enterprise approach to the cattle business," he said.

2. The industry jointly must continue to work for improved marketing systems, and individuals must do a better job of marketing, in addition to improving their own production efficiency. As a whole, the beef industry still operates at no more than 75-85 per cent of possible efficiency, according to a recent college analysis.

3. More cattlemen and women, at the grass roots, must become actively involved in public affairs and the work of ANCA. Less than two per cent of the nation's population now depends on agriculture for most of its income, and less than half of all farmers and ranchers now produce livestock. The only way to offset this minority position is to have more involvement. Citing the accomplishments of ANCA and its affiliated organizations in 1976, Finney said, "We have proven that, when all of us work hard, and together, we can deal very effectively with public issues that affect our industry and our own operations."

4. The industry must have still more unity of purpose, and a stronger, more unified voice at the national level - provided by a larger, more broadly representative organization. Finney urged members to support the proposed consolidation of ANCA and the National Livestock Feeders Association.

He also noted the importance of approval of the Beef Research and Information Program - which - can provide the research, information and promotion needed to keep beef as the favorite meat in the nation of changing population characteristics and changing lifestyles.

In this connection, he cautioned that the latest available figures show consumer expenditures on beef have declined recently as a percentage of disposable income.

Finney outlined several public issues that the industry will face in the year ahead, and he said that the educational job in Congress will become still more difficult, in view of the trend to fewer lawmakers familiar with agriculture and the cattle business. More than half of the House of Representatives is new since 1970.

Citing the structure of the cattle industry - with more than 87 per cent of all herds having less than 100 head, and with most producers getting most of their income from non-farm sources - Finney commented: (1) Professional cattlemen will have to become even more efficient if they are to survive. (2) Professional cattlemen will have to become involved in national industry programs if those programs are to be successful. (3) ANCA must seek to make the national association and its work in Washington seem less remote from the concerns of most cattlemen.

The ANCA president also reminded cattlemen of the work still to be done in offsetting unfavorable comments about beef and the industry. "Like all farmers and ranchers, cattlemen enjoy a favorable general image among the public - although no one is going to rush out and offer to pay more per pound for larger supplies of beef just because we have been losing money," he said. "Our real public opinion problems usually revolve around specific issues."

He mentioned such issues as grain-for-livestock-vs.-humans, energy use in intensive agriculture, environmental concerns, and fat-and-health. He also cautioned that the boycott syndrome had developed again because of the coffee shortage - although there now is much broader understanding of the fact that boycotts and price controls are really counter-productive.

Finney went on to voice his concern about the growth of anti-business attitudes - including attitudes among at least some environmental and consumer activists. "Some of the people who claim this nation's greatest problem is unemployment are the same people who actually are doing the most to slow employment through their advocacy of excessive environmentalism, a no-growth economy and still bigger government," he commented.

He said the cattle industry should work with private and government groups really concerned about the environment and the consuming public. But, he added, the industry must challenge the activists when their positions are not really in the long term interest of the public as well as cattlemen.

"We must challenge those consumer activists whose positions are more anti-business than truly pro-consumer; who seem more interested in social change than in the economic performance of our private enterprise system; who talk frequently about business profits but never about union featherbedding and its far greater effects on food prices; who call for more government controls but seldom weigh the costs against the benefits, if any; who advocate a vague new "food policy" but say nothing about the controls and subsidies which their policies would require," Finney said.

"We alone cannot stem the anti-business, anti-free enterprise tide, but we should do better on particular issues with which we are involved.

Livestock market

Carlisle

Carlisle, Pa.
February 1, 1977

CATTLE 226. Compared with last Tuesday's market, slaughter steers uneven. Slaughter cows mostly steady to $1.50 lower. Few Choice No. 2-4 1230-1490 lbs. slaughter steers 36 85-39.10, Good 34.25-36.85, Standard 32.25-34.60, few Utility & Low Standard 28.00-31.10. Ice damaged trees need immediate care

Ice storms can do considerable tree damage. Should one hit this winter knowing what to do and how to do it will mean the difference between saving your favorite tree or chopping it up for firewood.

Greatest storm injury is likely to occur on the faster growing trees. These include poplars, maples, willows, black locust, and Chinese and Siberian elms. Stronger species of oak, sycamore, and honeylocust.

If you're faced with the job of straightening a toppled tree or mending the wounds of broken or split branches, Donald B. Lacey, home horticulture specialist at Cook College, Rutgers Univeristy, suggests the following first-aid treatment.

Remove all broken branches. Do all cutting with sharp tools. You may need saws, knives, and wood chisels. Make cuts either at a good side branch or nearly flush with the mother branch. This avoids leaving "dead end" stubs.

Make smooth, fast-draining wound surfaces. Remove splintered, rough, or loose wood from all parts of any wound with a wood chisel or sharp knife.

Trim off all bark not solidly attached to the wood. Use a sharp knife, exposing uninjured bark on all edges of the wound.

Orange shellac makes a quick, tight seal and will protect the surface of a large wound until the bark grows over it. A good tree asphalt paint will last longer and prevent rot of the heartwood.

Cover small wounds with orange shellac and paint the heartwood with a good tree paint or linseed oil house paint. Repaint open wounds each year until completely healed.

After the wood has thawed, lift, straighten, and support trees, shrubs, or evergreen trees with wire encased in a hose wherever it touches the bark. Supports should remain a full season. Cover exposed roots with soil and mulch with leaves or straw.

What's New

SCALE WAGON

Pioneer Hi-Bred International recently introduced a Yield Comparison Scale - a bin wagon with electronically operated scales which can weigh crops in the field for comparison purposes.

Key vote coming in Spring for beef and dairy producers

STATE COLLEGE, Pa. - Beef and dairy producers in Pennsylvania and throughout the country, will have an important decision to make next March and April. Although the date has not been definitely set, there will be a vote on the Beef Market Development Plan. The goal is to expand domestic and foreign markets, increase research on production and marketing problems, promote the continued use of beef and veal, and to improve marketing and distribution of cattle and beef products.

The program has been on the drawing boards for about three years. The Beef Development Task Force - a national organization of about 60 cattle producers - developed the plan, then followed legislation through Congress allowing the cattle industry to hold a referendum on the program this Spring. If the measurer passes with two-thirds majority of all cattle producers voting, cattle producers will invest 0.3 per cent of their sales in the program. The use of the funds will be administered by a 68-member Beef Board - all beef producers. The 0.3 per cent of sales is 30 cents for each $100 of cattle sold.

Promotion of the product and education of the consumer will be emphasized. For instance, few consumers realize that most of the feed and land required for beef production is not grain or grain-producing land. Almost 90 per cent of the total land which is used to produce beef is the type that cannot be used to produce grains.

Practically all of the national beef cattle and dairy organizations support the program. The continued soundness and improvement of the beef industry is important not only to beef producers, but also to dairymen. According to Harold W. Rotz, Waynesboro, R2, member of the Pennsylvania Beef Development Task Force Committee, "Between five and 10 per cent of the dairymens' gross profits are obtained from selling of cull cows, bulls, and calves. It is entirely possible that through the efforts of the BDT program, prices for cull cows could be increased by 5 cents per pound or more in the future. For a 1200-pound cow, this would be $60, and the cost of the BDT program for this same cow would be about 90 cents. Surely the program would be a good investment for dairy and beef producers alike."

The mechanics of voting on the program will be as follows: Anyone owning beef or dairy cattle will be able to register at the County Agricultural Stabilization and Conservation Service (ASCS) office in late March; In early April, those producers registering to vote can return to County ASCS office to vote yes or no onthe referendum; Fifty per cent of the producers registering in March must vote in April; and Two-thirds of those actually voting in April must vote yes.

The program will work very simply, with only the packer or slaughterer actually sending money into the Beef Board. The packer will deduct 0.3 per cent of the sales price of the animal from the check he gives the producer owning the animal at time of slaughter.

Approval of programs will be made by the 68-member Beef Board, which includes representation from the dairy and livestock industries in Pennsylvania, New York, and the New England states.

Producers or others wishing more information about the program are urged to contact Harry H. Stambaugh, Green Park, Pa. 17031, chairman of the Pa. Beef Development Task Force Committee, or Richard C. Sanders, president, Pa. Beef Council, Lewisburg R3, Pa. 17837.

THE GOOD WORD *from the Bible*

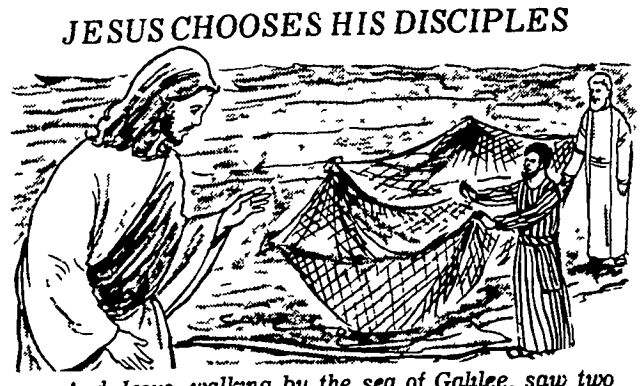
In the Gospel according to St Matthew, we cannot be sure of the reaction of Peter, Andrew, James and John when Jesus came to the shore of the Sea of Galilee where they were working and said, "Follow me "

These were average men, fishermen We must wonder if they were not beset with doubts The natural response would be, ' Why me? Why not someone from a higher station in life? Why not someone who is educated, or trained for the work you have in mind?"

The education of the disciples was to come as Jesus went forth to preach and multitudes followed him from Galilee, Decapolis, Jerusalem, and from beyond Jordan

How do we today respond to the call of Christ? We are not asked to leave our jobs, our homes, our families Christ comes to us For us, there is no sacrifice, we need only accept and believe How can such a simple choice sometimes be so difficult?

JESUS CHOOSES HIS DISCIPLES



And Jesus, walking by the sea of Galilee, saw two brethren, Simon called Peter, and Andrew his brother, casting a net into the sea, for they were fishers

And he saith unto them, Follow me, and I will make you fishers of men

And they straightway left their nets, and followed him

And going on from thence, he saw other two brethren, James the son of Zebedee, and John his brother, in a ship with Zebedee their father, mending their nets, and he called them

LETTERS TO THE EDITOR

Beef program supported

Dear Editor:

Remember the DES ban? Remember the meat boycotts? Remember the price freeze on beef? Remember consumer and other groups twisting the facts about the amount of grain needed to produce beef? **Have you asked, why doesn't someone do something about these kinds of theings to make sure they don't affect our industry again?**

Well - we now have a chance to do something. In May, 1976, enabling legislation was passed by U.S. Congress for a Referendum to be voted upon by cattle producers, which, if successful, would make available 30-40 million dollars annually for educational, promotional, and research porograms to help the beef industry. These funds would come from an automatic deduction of 0.3 per cent on the sale value of each animal slaughtered. This means that for each $100 sold, 30 cents will be deducted. Only the packer would send money to the Beef Board. The Beef Board would be composed of 68 beef producers elected from every section of the country. These producers would activate the programs which would be funded from these monies. Pennsylvania and the Northeast, with its large consumer population will benefit greatly from the influx of these intensified programs. A voluntary clause will enable any producer to obtain a refund if he wishes. In late April, beef producers can register at the County ASCS office and return there in May to vote. How long can we survive campaigns like colon cancer scares or the eat less beef campaigns? The beef industry needs your help now. You have a chance to do your part. Will you...? **Please encourage everyone who owns an animal, including youth club members to vote "Yes" on this Referendum.** With the decreasing amount of agricultural representation in Washington, this may well be the last type of self-help program that will be possible for any industry.

The "Slurry Gun"

Field day scheduled

A demonstration of the new Slurry Gun operating in liquid manure systems will be held Tuesday, February 8, at 10:30 a.m. on the Charles and Nelson Habecker Farm, Lancaster. The Slurry Gun has been working in Canada on dairy, beef and swine operations and has recently been introduced to Southeastern Pennsylvania.

Charnelle Manor Farm, a father and son partnership owned by Charles and Nelson Habecker is located about two miles south of Mountville. They have 110 dairy animals and farm about 150 acres. Waste from 60 dairy cows is run into a holding tank outside the barn. From there it is pumped into an above-ground storage tank where it is stored until the tank is filled. The slurry is then pumped out for spreading.

Weather hurting celery production

LITITZ, Pa. - It's not news anymore, but it's still true, the winter of 1976-77 has been rough for everyone.

In the Lititz area, one farm family in particular has suffered from the severe cold by the loss of their celery crop.

Glenn D. Thomas, owner of a farm and farm market along the Lititz Pike, south of Lititz, has grown celery for about ten years, according to Mrs. Thomas. Though she couldn't be definite about the effect of this year's hard winter on the crop, she did say that it has been "very much affected by the weather."

She revealed that weather problems began in the fall with the first rush of early intense cold. Fall freezes caused some rotting of outside portions of the stalks, resulting in smaller bundles, she said.

Mrs. Thomas explained that when the celery is prepared for winter, the stalks are cut down to ground level, then placed in trenches where they send out shoots from which the hearts will grow.

If the weather is too cold, she continued, the young celery does not grow or bleach as well as it should. This year, they had to contend with artic winds blowing up under the protective coverings of paper, straw, and plastic, as well as the frost which has penetrated the ground to an almost unprecedented depth this year.

But, she added that some loss is not unusual, and they have some rotting from cold each year. Even extremely warm winters can cause stalks to rot, she said.

Most of Thomas' celery is sold through his own market, though he supplies several local markets with celery, too.

Like other county growers, Thomas grows the home-grown variety, which means that the stalks are white and tender with a flavor unmatched by any other celery.

Mrs. Thomas said she thinks Lancaster County is the only place in the nation that grows home-grown, bleached celery. Tourists often come to the market, she said, and wonder what's wrong with the celery because it is so white.

Local consumers, used to the delicious pale stalks, are often unaware of the method used to bleach the celery. Mrs. Thomas explained that keeping the stalks covered and out of the light prevents them from turning green and results in a less stringy celery. She noted that it also enhances the flavor, though the local home-grown variety may be from a special seed she added.

During the winter when no local celery is available, Thomas buys celery from Florida, "lets it sit" for a period of time, then strips the outer stalks off. This procedure, according to Mrs. Thomas, bleaches the Florida celery so that it resembles the home-grown kind in texture, taste, and color.

Comments on grain invited

NEW YORK, N.Y. - Individuals and firms that will have to register and keep records under a new federal grain inspection law will soon be asked to comment on registration and record-keeping regulations.

Officals of the Federal Grain Inspection Service in the U.S. Department of Agriculture (USDA) will begin drafting the regulations in a few months. Before that, the Inspection Service will solicit ideas and comments from grain merchants, elevator owners and operators, and others who might be affected by the new rules.

The record-keeping regulations will define what records will have to be maintained and how they will be kept. The rulemaking on registration will include policies and guidelines for grain exporters to follow.

With some exceptions, the new law-the U.S. Grain Standards Act of 1976 - requires all grain exporters to register with the Inspection Service and furnish Inspection Service officials detailed information on company locations, ownership, management, and control.

Grain merchants and elevator owners and operators receiving official inspection or weighing under the new law are required to keep an assortment of business records for five years after service is provided.

In addition to official inspection and weighing records, the law states that records must be maintained for "purchases, sales, transportation, storage, weighing, handling, treating, cleaning, drying, blending, and other processing" of all grain merchandised or handled during the five years.

Until final rules are issued, grain exporters will not be expected to register. Persons and firms receiving official inspection or weighing services, however, are expected to continue their present record-keeping procedures and permit Inspection Service officials access to those records on request.

Second Opinion

One neighbor goes to the doctor and gets the following diagnosis: "You have the dirtiest, most unkept, uncivilized body I have ever seen" The patient replied that he had been told the same thing by another doctor earlier in the week "Then why did you come to see me?" "I wanted a second opinion," answered the patient

N.J. schedules farm meetings

FLEMINGTON, N.J. - Cultural practices, insect control, and a new crop for New Jersey farmers will be subjects of the first Extension Service sponsored series on field crops, livestock and dairy. The first session is scheduled for Wednesday evening, February 9, beginning at 8 p.m. Programs are to be held on successive Wednesday evenings, and are conducted here at Hunterdon's Extension Center, Route 31, North.

Open to all farmers in Hunterdon, Somerset, Mercer and other central Jersey counties, the programs will feature the latest research and Extension Service recommendations on a wide range of agriculture operations. Included are the production of field corn, soybeans, wheat, barley, beef, milk, wool, and pork.

The February 9 meeting will include the following subjects: "A First Year Experience With Kenaf," Jack Rinehart, J-B Farm, Annandale; "No-tillage Forage Renovation," will be presented by one of the area farmers and Dr. James Justin, crop specialist at Cook College.

Also on the program will be Dr. Justin's topic, "Field Crop Varieties for New Jersey" and Dr. Stuart Race, entomologist at the College, on "The Forage Crop, Soybeans, Corn, and Small Grain insect and Bird Picture."

The second session on field crops, February 16, will be devoted to weed control and fertilization.

Check our deal on corn herbicides

When you're ready to plan for this year's corn crop, come see us. We'll work with you to lay out a program to help you grow a good crop. Picking the best herbicide has got to be at the top of your list.

Chances are the best herbicide for you is liquid AAtrex® 4L. It's so easy to use, and so dependable. Gives you the kind of weed control you're after.

Of course you shouldn't overlook cost per acre, especially this year. That's why we think you should check our liquid AAtrex 4L program before you put your money on the line.

We think we've got a deal you won't turn down. Ask us about it.

Drumore Township looking into alternatives

Farmland preservation being planned

DRUMORE, Pa. - Anticipating a state mandated plan in the future which will leave little decision making to the local governing bodies in regards to preservation of agricultural lands, the Drumore Township Planning Commission in Lancaster County has set out to find what the residents of its jurisdiction propose as guides to be followed in the sale and development of the farmland in that township.

Approximately 35 residents attended the first meeting on Jan. 26 called for this purpose by the planning commission. Chairman Aldus Martin prefaced the open discussion with a summary of what types of alternatives are in use or speculated for future use. He also cited statistics pointing out the population growth, sale of land and tax assessments.

Quoting figures given last March at the Pennsylvania Planning Commission, Martin said 60 per cent of the state was in farm land in 1920. By 1940, that percentage had decreased only five points. As of 1970, farmland constituted only 30 per cent of the state's land. In 1920, 202,000 people lived on farmland as compared to 172,000 in 1940 and 62,000 in 1970. Two per cent of the population in Pennsylvania lived on farmland in 1970.

Due to the stepped up rate of land being sold and subdivided for housing purposes rather than agricultural, the highly productive farmlands which are near to the metropolitan areas have developed at least four plans which could slow down or eliminate the conversion of farmland into housing or industrial real estate.

One proposal is titled purchase and lease back which provides for agricultural land to be bought by a governmental body such as a township or district. This land is then leased back to the farmer for farming purposes only. No one could buy this land for development

A second alternative is the agricultural district plan whereby a group of farmers with adjoining land may have their land declared an ag. district for a specific length of time, such as ten years, and during the duration of that agreement the real estate in that district may not be developed; it must remain agricultural. According to Martin, New York does have these ag districts in operation presently.

Selling development rights is a third option to encourage ag land preservation. The farmer may sell his land to a governing body which in turn pays the farmer the difference between the price of the farm if sold at market value as farming land and the price of the farm if sold for development. An initial sum is paid to the farmer at the time of sale and the remainder is paid over several years. This land is never to be sold for development. The reasoning behind such an arrangement is that the farmer may still maintain a just compensation since farmers traditionally hold their land as an investment which when sold will provide retirement finances.

A final plan is the transfer of development rights in which a township sets aside a certain percentage of the land for residential development. Builders must pay development rights to the farmer in order to develop the land he purchased from him. Costs of such rights usually prohibit development.

Martin pointed out that the purchase and lease back and sale of development rights plans are expensive for the tax payers who provide these funds.

As things stand at the present, Martin urged that the local governments decide how they want their land used before they are told how by the state "At present it is economically more practical to sell to developments than to keep in agriculture," one resident summed up the situation.

"Where do we draw the line?" Martin asked. Although the Clean and Green Act, applying for variances, and county ordinances offer some aids to keeping sub-division and taxing in check, they are not sufficient to stop the trend of converting good farmland into housing, says Martin.

Jacob Gicker, secretary for the commission gave projections for the county in 1985 which included an increase in population by 42,000 with an additional 27,093 housing units needed.

"Why are people moving into Drumore Township?" Gicker asked. "Do the Drumore residents want population growth? The answers have to come from the residents themselves," he stated by way of explaining the meetings.

One resident said, "We are an area for exploitation because we are letting it be done."

"There is too much ease in accepting the state's mandates," reflected another.

"We must allow for some development in our comprehensive plan or it will not hold up in court," explained another.

"The energy crisis will put pressure on people to live closer to their work." "Cities need to be more attractive for housing than they are now." "Driving fifty miles to work with one person to a car will be impossible," concludes another resident.

"Right now the only thing that keeps farmland in farmland is a personal commitment to the land. The profits in selling to developments are powerful forces though," said a farmer present.

"When the farmer gets a decent price for his products he won't have to sell the land for development," another commented.

"Farm commodities will come up to realistic standards some day," prophesied another.

Until they do, Drumore Township has decided to make more specific subdivision requirements, establish building codes which at present are not in effect in it or in surrounding townships and set up the mechanics for enforcing ordinances and codes. Although this will be a time-consuming undertaking, the first phase has started.

Chairman Martin invited the public to attend the next meeting to be held at the township shed February 23 at 8 p.m.

What's new

RAT BAIT BOX

A new metal rat bait box is being marketed by McCoy's Chemcial Company of Cleveland, Ohio. The heavy-duty, Galvanized Box is designed to help farmers comply with EPA poison label requirements that state: "Baits should be placed in areas inaccessible to children, pets, wildlife and domestic animals or in tamper proof bait boxes." Stamped "POISON" in large, raised letters, McCoy's galvanized rat bait box helps meet these requirements by using 23 gauge metal for the one piece stamped base and separate, snap-on lid and by providing two one-way nylon security ties to seal the unit. The security ties must be cut to be removed. The overhanging lid and raised entrance holes help prevent spoilage of bait by the elements including seepage. The tray is sturdy, yet inexpensive enough to be disposable. Access to the private bait chamber is provided by 2-⅛ inches diameter entrance holes in both ends of the box. For extra security, the bait box may be nailed in place.

Weather spared none

[Continued from Page 1]

been strong for months and that the end of that cycle would have come soon if the weather had not interfered to the extent it did. Now the situation is that egg prices (as well as prices for most other farm products) will continue to be strong and maybe even go up in some cases.

Surprisingly, egg production in Pennsylvania has not been affected to a great degree for the simple reason that northern farmers are generally reasonably prepared for winter weather. The real crunch comes in the South. Southern poultrymen are not prepared for the extreme conditions they've experienced and are encountering a six per cent drop in production as a result. That affects Pennsylvania because egg supplies are now running on the short side and prices are strengthened. Hoffman noted that Pennsylvania ranks fourth in the nation in egg production but that due to its close location to huge metropolitan marketing areas, it must still import eggs from the South to meet area demands.

The weather has forced a few marginal poultrymen in the South out of business.

Also affected by the cold wave and energy crunch are turkey, broiler, and brooder houses, all of which require auxiliary heat. Hen houses are "heated" by the chickens themselves which means they had their work cut out for them for all of this year so far.

Maintaining reasonable temperatures inside broiler and layer houses hasn't been the only problem, according to Jacob Musser, manager of Victor M. Weaver's broiler growing department. He pointed out that humidity becomes a problem due to the poultry houses being totally dependent on fans for fresh air. Cold air must be pulled into the building. When it is, it not only cools the building, but causes condensation as well. Then heat is required to warm the air and cut the moisture level. "Ventilation is very critical," said Musser.

The poultry manager knew of no severe energy situations in the area, adding that his New Holland based firm has had an energy conservation program for years. Weaver pays bonuses to growers who use their gas supplies prudently.

Ed Moshier, president of the Lancaster County Poultry Association, recently returned from a poultry convention in Atlanta, Ga. He reported that some poultry processors are booked solid through March due to weather-caused upsets in schedules. Some flocks in the South went into molting.

According to Lancaster County Agent Jay Irwin, area farmers were lucky in the fact that the cold weather did not come suddenly. "Most were prepared due to the prolonged cold," he said.

Agriculture Secretary Kent Shelhamer noted the same thing. A Columbia County farmer with 60 acres of orchards, he applied the hardening theory to fruit trees. The fairly constant temperatures and the early onset of cold weather may prove to be the saving factor in the end, the Secretary estimated. "If we get by at all, it'll be because of that," he commented. Damage at this point is definitely expected, but a true assessment won't be possible until Spring.

Penn State livestock day slated

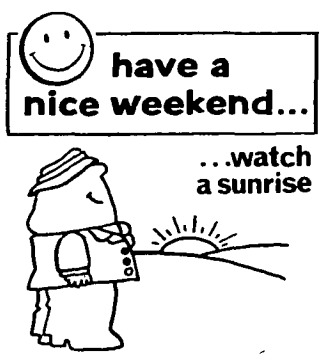
STATE COLLEGE, Pa. - The Penn State Livestock Day will be held on Tuesday, March 1, at the J.O. Keller Building, University Park. Sessions will begin at 9:30 a.m.

The program will include discussions of practically every aspect of beef cattle feeding, breeding, management, and marketing. Most of these discussions will be led by Penn State Faculty, with a special presentation by Dr. Roy Kottman, the dean of the College of Agriculture, Ohio State University, Columbus, Ohio. Dr. Kottman will speak about the future prospects for the U.S. Animal Industries.

During the beef cattle section meetings, silage and hay additives, hay harvesting and feeding programs, changes in beef grades, growth and carcass traits of different types of steers, and maximizing the productivity of herd bulls, will be discussed.

The annual Cattlemen's Spring banquet will be held at the Holiday Inn, State College, with a social hour beginning at 6:00 p.m., and a banquet at 7:00 p.m. Guest speakers will be Bill McMillan, executive secretary, American National Cattlemen's Association, Washington, D. C., who will speak on "Problems of the Past and Opportunities of the Future." Also Webb Snyder, Watsontown, will present a discussion on European agriculture, the result of a tour through Europe last year.

The recipient of the annual "Cattleman of the Year" award by the Pennsylvania Cattlemen's Association will also be made. Advance reservations are required for the February 28 evening banquet, and more information may be obtained by writing to the Department of Dairy and Animal Science, 324 Animal Industries Building, University Park, Pa. 16802. Programs for the Penn State Livestock Day may be obtained from the Short Course Office, J. O. Keller Building, University Park, Pa. or from County Extension Agents.



Payments eased

DES MOINES, Iowa - A special machinery-purchase program to assist farmers in locations classified as "disaster-areas" by the U.S. Department of Agriculture has been announced by Massey-Ferguson, headquartered here.

Shelhamer eases

[Continued from Page 1]

had been temporarily lost because of processing plants shut down due to the energy crunch. This was accomplished, said Shelhamer, by contacting processors whose primary fuel was oil rather than natural gas.

"In several cases," Shelhamer noted, "farmers were given the opportunity to move their product to short-term alternate buyers. Cooperation at all points was excellent."

Shelhamer said that milk designated for school use would still be well within coded dates if the schools reopened "relatively soon." Should those markets be lost to farmers, he observed, oil-using processors would probably still accept the milk for manufacturing purposes.

A survey of food stores, statewide, revealed that supplies are in "fine condition and reasonable supply," Shelhamer said. He indicated that in some areas of the state, hay supplies were down to a seven day figure but that the shortage was mainly confined to the northwest region where a wet Spring curtailed the hay harvest last year.

He said hay was "in generally good" supply in most of the remainder of Pennsylvania. Shelhamer urged all farmers to keep accurate records of losses of product, materials, and livestock as "a good step to take in these circumstances."

There has been no indication, as yet, of possible federal indemnities at a later date, but Shelhamer urged record-keeping as a "solid precautionary measure."

Shelhamer also mentioned that a "sizeable portion of the peach crop, especially the Jersey variety," would be adversely affected by the freeze and that a shortage could be expected by consumers. "Fifteen degrees Fahrenheit is the danger zone for the Jersey variety," he said, "and of course we have gone far beyond that point."

He stated that egg supplies in Pennsylvania would be hurt as "they always are by substained periods of cold" and that frostbite to animals could minimize supplies of milk, although he foresaw no drastic shortage at this time.

Another area of possible loss cited by the Columbia County farmer concerned apiaries where drifting snows could cause considerable losses. In addition to the obvious cutback in supplies of honey, Shelhamer said a more serious potential problem existed: "Fewer bees mean less pollination in the seed-propagating process and this, in turn, may add up to crop loss in vital areas like hay and fruit."

Shelhamer said his Bureau of Weights and Measures had been calibrating oil trucks but would postpone such action for now so that fleets could be utilized to full effectiveness by dealers. He asked any farmer who had problems with fuel to contact the Department of Agriculture which would turn such requests over to the Governor's Energy Resource people immediately. He emphasized that fuel problems could include such matters as frozen water supply pipes.

"In summation," Shelhamer said, "we're talking long range about shortages in many crop areas come harvest time, about the need for alternative energy sources for food processors as already urged by the Public Utilities Commission (PUC) and about some kind of help for those farmers hardest hit.

"On the short range scene we're talking about getting roads open to farms, getting fuel deliveries regularized, finding secondary markets where fuel shortages have closed primary buyers, assuring the consumer of a healthful food supply at retail and keeping all lines of communication and effort open with an eye to solving problems as, and in some cases even before, they occur."

"Let us never forget that the cultivation of the earth is the most important labor of man."

What's New

DETACHERS

The Bou-Matic line of automatic detachers now includes three different models, with varying degrees of sophistication, to serve the needs of a wide variety of dairy operations.

The most advanced of the line, the "Champion EP," features solid state electronics, automatic or manual operation, pre-set time delays, air operated retract mechanism, positive vacuum shut-off, automatic positioning 4-link arm assembly, indicator lights, heavy duty retract chain, snap-swivel claw and hose connections and electronic flow sensing. An available option allows the detacher to operate entrance and exit gates and feed bowl covers.

The mid-line "Junior Champ" detacher is basically the same as the "Champion EP" detacher without the electronic automation features.

The "Little Champ" is a basic, inexpensive unit that provides basic detacher functions, such as milking mode establishment, milk flow sensing, positive vacuum shut-off, time delay and removal of the milking unit from the cow.

Now, from Beacon--
Super-Pels*
--the proven feed with more usable protein.

*available in pellets or mash

Cows need protein for milk production. Agreed. But all protein is not usable protein.

The amount of soluble protein a cow can use is definitely limited. Many cows today may get too much soluble protein and the excess may be wasted. That's expensive!

The current trend is to feed more fermented roughage and high moisture grains and less dry hay, dry grains and commercial formula feeds. The combination of fermented roughages and fermented grains may have a higher level of soluble protein than the cow can use. This decreases efficiency and lowers milk production.

To balance roughage programs high in soluble protein, Beacon has formulated Super-Pels, a high-quality grain ration low in soluble protein levels, to compensate for the highly soluble roughage. The Super-Pels formulation is constant. It will never change, and it's one of the most palatable feeds ever produced.

Super-Pels have been tested for two years on farms in two states. The result? Significantly higher production.

WHO NEEDS SUPER-PELS?

Super-Pels is only for the herd that meets all of these qualifications:

- A well-managed herd of 15,000 pounds or more production average.
- Fed a diet which, in large part, is high in fermented roughage.
- The farm is on a roughage analysis program.

Beacon Super-Pels, fed properly, is just one more example of why so many dairymen look to Beacon for **"No-Nonsense Feeding."**

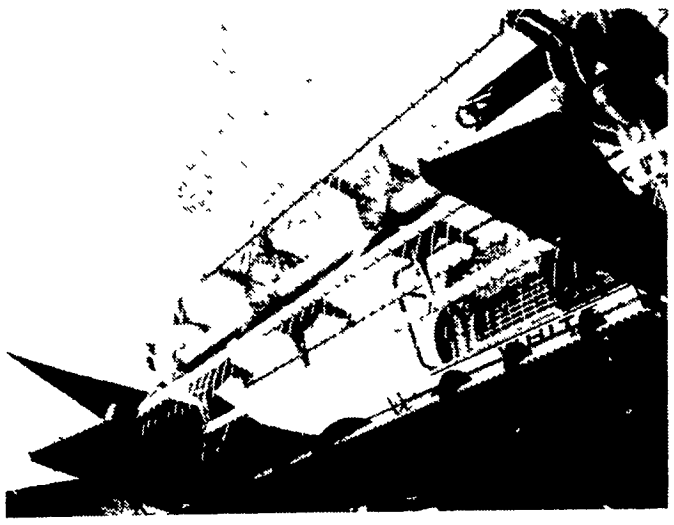
What's new



CUTTER BAR FOR WHITE COMBINES

White Farm Equipment Company announces the development of a vastly improved cutter bar for its "Harvest Boss" combines.

Called "Kwik-Cut," the innovation offers farmers significantly reduced soybean field losses, faster combine field speeds, longer cutter bar wear and many additional advantages over other cutter bar types available.

Causes of soybean harvesting losses at the header, White said, are 79.6 per cent due to inefficient cutter bars. With the new cutter bar, savings of up to $1,500 per day may be possible.

In announcing the development during its annual, national dealer convention here, White said the new "Kwik-Cut" will improve field collection efficiency by at least one bushel per acre, boost combine field speed by at least 33 per cent, and wear longer because of its unique "live knife" and "stub guard" design.

The company said combines equipped with the new Kwik-Cut units are in production now for delivery prior to the 1977 soybean harvesting season.

Other details disclosed by White include Kwik-Cut's ability to harvest soybeans planted in any configuration - row spaced or broadcast, to cut weeds and fine grasses without plugging, and to better utilize combine capacity because it rapidly moves material into the machine for processing.

All Kwik-Cut testing and improvements noted were made in comparison to conventional soybean cutter bars and in comparison to floating cutter bar types which have become popular within the past five years.

White Farm Equipment Company's new Kwik-Cut design features unique, "live knives" and "stub guards" which lead an extremely flexible, floating cutter bar. The knives extend slightly beyond the short, stub guards and effectively break up mud and trash and slice weeds and fine grasses before they can jam or plug the Kwik-Cut unit. There are twice as many knives and guards per foot on Kwik-Cut as on competitive designs.

The increased number of cutting surfaces results in reduced movement of plants and shatter, thus improving collection.

It also results in lengthened life for the cutter bar, since each Kwik-Cut knife section endures less wear through the field.

White also announced its Kwik-Cut includes an improved flexible, floating cutter bar with lock-up for small grains, new feathering shields, new automatic header height control and improved flotation system.

DUAL HERBICIDE IS LABELED FOR NUTSEDGE, GRASSES IN CORN

Dual 6E preemergence herbicide has received label acceptance from the Environmental Protection Agency for full-season control of most annual grasses, yellow nutsedge and certain broadleaf weeds in corn. Ciba-Geigy Corporation's new herbicide is registered for use alone and in tank mixes with AAtrex 80W and 4L herbicide.

Used alone, Dual controls barnyardgrass (watergrass), crabgrass, fall panicum, foxtail millet, foxtails (giant, green and yellow), pigweed, witchgrass, and yellow nutsedge. The tank mix with AAtrex also controls such weeds as cocklebur, lambsquarters, ragweek, smartweed, velvetleaf and many other problem weeds

Mixing is easy with the emulsifiable - concentrate liquid Dual 6E will be marketed in five-gallon cans containing six pounds of active ingredient per gallon

The chemical should be sprayed on the soil surface using a minimum of 15 gallons of water per acre. If rain is insufficient within seven days after application, Dual can be incorporated into the top one inch of soil using a rotary hoe or rolling cultivator.

The compound is cleared for use on corn grown for grain. The Environmental Protection Agency (EPA) prohibits using the material in 1977 on sweet corn, popcorn, or corn for grazing, fodder, or silage. Only corn may be planted on treated acreage during the following crop year. The chemical is not labeled in Wisconsin for 1977

Ciba-Geigy says it expects to apply to EPA soon for corn-label expansions and for an experimental permit to use Dual in soybeans The company will also seek a label expansion for the use of Dual in potatoes and peanuts

FLOATING PUMP

The Floto-Pump, a high-performance portable pump that floats on water, is now being marketed by the Waterous Company, South St. Paul, Minnesota.

A self-powered, self-priming unit, the Floto-Pump is small enough for one man to carry anywhere on farm or ranch, yet powerful enough to pump over 140 gallons per minute, or provide pressure up to 100 psi.

It is particularly well-suited for transferring water from pond to outlying stock tank, for hosing down feeding floors and livestock confinement areas and for emergency fire protection. In the case of the latter, it could even reduce property insurance rates.

To operate, all one must do is connnect a discharge hose, start up the easy-pull, 8-hp, two-cycle Chrysler engine, and set the unit in any water supply that is at least 4 inches deep. One five-quart tankful of fuel keeps the unit pumping for 60-90 minutes.

The float assembly is made of a cross-linked polyethylene shell filled with polyurethane foam, both of which are extremely durable.

The entire, self-contained Floto-Pump unit, which weighs less than 50 pounds, can be purchased for under $700. (Hose and nozzle are extra.)

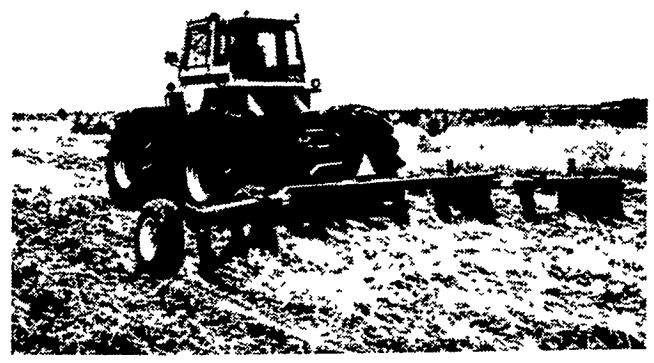
POSTEMERGENCE HERBICIDE

American Hoechst Corporation's new Hoelon postemergence herbicide has successfully controlled wild oats and many annual grasses during recently completed tests on spring seeded wheat and barley fields.

The new herbicide, formerly known as HOE 23408, was used by cooperating farmers throughout the wheat and barley growing states under an Environmental Protection Agency experimental permit. The tests are being conducted to obtain final EPA registration.

The herbicide was applied to spring seeded wheat and barley test fields at rates of three-quarters to 1-¼ pounds of active ingredient per acre The herbicide will most likely be sold as a three pound per gallon emulsifiable liquid if full registration is granted by the EPA Applications can be made with conventional ground or aerial equipment

The herbicide should be applied when the majority of annual grass weeds such as wild oats, yellow foxtail, green foxtail and ryegrass are in the one-to-three leaf stage of growth



New Case Model 513 V deep chisel plows will fit into conservation tilling operations of most farmers. This deep chisel plow rips up hard pan and allows percolation of moisture through the soil, making more efficient use of irrigation water and fall rains. The use of this tool lets oils "breathe" air, warming up fall chiseled fields for early spring plantings. Chiseling soils 12 to 18 inches deep with Model 513 V permits roots to penetrate deeper into the soil and find more subsurface moisture during dry spells, making possible higher crop yields.

Model 513 V deep chisel plows are available in two basic main frame sizes, seven shank units reducible to five shanks and nine shank units expandable to 11 or 13 shanks. Shank spacings are 20 inches, with provision for 30 or 40 inch spacing to meet particular soil conditions. Shear bolts protect the 1¼ inches x 30 inches shanks during operation.

Tractor horsepower requirements range from 15 to 20 hp per shank, depending on soil conditions. By utilizing the deep chisel plows with their high horsepower tractors, farmers can save time, trips to the field and fuel.

Frames for the basic seven shank models are constructed of ⅜ inch thick five inches x seven inches tubular steel. A reinforcing tie bar and ½ inch thick tubing adds additional strength on basic nine shank models. Wings fold easily for narrow transport width. Adjustable gauge wheels are positioned in tandem, allowing for gauging action to take place on uneven terrain. One set of rigid type gauge wheels is standard on five and seven shank models while two sets are standard on 9, 11 and 13 shank models. Screw type gauge wheels are available as optional equipment. Hitches can be Category II or III.

GENERATORS

A new line of portable electric generators redesigned for increased performance and durability has been announced by McCulloch Corporation.

McCulloch Mite-E-Lite generators in continuous duty wattage sizes of 1200, 1500, 2000 and 3300 are now on display at McCulloch dealers throughout the country.

The lightweight power packs provide electricity anyplace beyond utility service - construction sites, vacation homes and camp sites - and are used by fire departments and other emergency services, as well as by homeowners and others for standby power.

Basic unique design elements of the generators remain unchanged. Instead of electromagnets used in conventional generators, powerful barium ferrite permanent magnets develop a magnetic field with no loss of power and no residual heat.

And, instead of having a coil spin between the magnetic field elements, the McCulloch coil is stationary and the permanent magnets spin. By reversing the conventional procedure, electrical power flows directly from the coil to the receptacle. Brushes and slip rings are eliminated in this simplified process.

Improvements in the new McCulloch Mite-E-Lite line include Increased horsepower in the 1500 and 2000 watt models, with commensurate power in the new 1200 and 3300 watt models

New air core stators (coils) made of round wire with improved bonding for enhanced reliability and easier maintenance. All-copper coils are used on the 2000 and 3300 watt models.

Heavy cast six-boss aluminum stator mountings for increased stability.

Rubber mounted shock systems to dampen vibration and isolate electric components from the ground.

Improved carrying cradles.

Resistor spark plugs which remove static interference from the engine.

Screw-type oil fill cap with a double seal to eliminate oil leakage through the crankcase.

Doubled stability of receptacle montings to eliminate the harmful effects of vibration.

All McCulloch Mite-E-Lite generators are powered by Briggs and Stratton four-cycle engines. All are designed for 110 volt use, with 220 volt capability in addition on the 330 watt model.

PHOTOGRAPHY DEMONSTRATES WINDOW HEAT LOSS

Season-all Industries announces the availability of photographic prints which portray the heat lost through single and double-glazed windows.

This photography, done in total darkness, photographs heat rather than light. And computer elements incorporated into the camera draws a graph which depicts the heat loss mechanically, and demonstrates that insulating glass reduces heat lost through single glass by 50 percent

Complete information regarding the thermal efficiency of Season-all's revolutionary vinyl-clad Thermal-Gard replacement window is available without cost or obligation upon request from Season-all Industries, Inc., Indiana, Pa. 15701.

SWINE BOOKLET

"Swine: A Complete Feeding and Management Program", a 38-page booklet with photographs and charts, is available from Albers Milling Company.

A section on "Selective Breeding" has several tables including the judging points of a meat-type hog, the maximum number of service per boar, puberty, heat and gestation periods for swine, and a multiple farrowing schedule. Within the "Nutrition" section is a comprehensive feeding guide for swine broken down by market, breeding, and lactating animals; developing breeders; and gestating and farrowing animals.

Throughout are sample record sheets as well as management appraisal systems. Additionally, several of the various swine diseases are discussed in terms of causes, symptoms, prevention and treatment.

BADGER 10-INCH TRANSFER PUMP

Livestock producers planning a new manure handling system or just modifying an existing one might like the flexibility offered by the Badger Transfer Pump, now available with a 10-inch cylinder.

The 10-inch model pump is designed for liquid manure systems where increased animal numbers produce larger volumes of liquid manure. The heavy-duty piston also permits its use in solid and semi-solid systems where bedded manure is stacked.

Both the Badger 8-inch model and the 10-inch model pumps are available with a short or a long hopper, and with a parallel shaft or worm gear drive.

The Badger 10-inch Transfer Pump, with worm gear drive, is recommended for installations requiring shorter pumping distances up to 50 ft., for stanchion barns, or up to 75 ft. for free stall barns. The parallel shaft model with recommended motor can be used for pumping distances of up to 120 ft. for stanchion barns, or up to 175 ft. for free stall barns.

AERIAL APPLICATION FOR SOYBEANS ADDED TO PROWL LABEL

Farmers can now have prowl herbicide applied by aircraft to control certain weeds in soybeans. The Environmental Protection Agency has registered aerial application of prowl in all areas where soybeans are grown.

According to Cyanamid, the manufacturer, the new registration for the PROWL label is an important addition. Since prowl is low in volatility, farmers have up to seven days following application to incorporate Prowl. Aerial applicators can now treat at one time, all the land that a farmer can mechanically incorporate within seven days following application. The farmer can begin incorporation, and if a rain of one-quarter inch or more occurs within seven days after application, no further mechanical incorporation is necessary.

This added flexibility can reduce equipment needs and save time during spring planting, says Cyanamid.

Stored grain up

HARRISBURG - Total stocks of wheat, corn, barley and oats stored in Pennsylvania on January 1 at 97.3 million bushels were four per cent above a year ago, according to the Pennsylvania Crop Reporting Service. Farm stocks at 86.2 million were up six per cent while off-farm holdings of 11.1 million were down four per cent.

Wheat stocks at 6.2 million bushels were down 13 per cent. Farm stocks fell 2.8 million to 1.6 million bushels, while off-farm holdings were 4.6 million bushels compared to 4.3 million in 1976.

Tota corn in storage near 76.8 million bushels was up ten per cent. Although off-farm stocks of 5.3 million were about 600,000 bushels below last year, the farm holdings of 71.4 million, up 7.8 million bushels, were more than offsetting.

Barley stocks at 2.8 million bushels were off 21 per cent. Farm holdings of 234,000 bushels were about one-half a year ago while the 2.6 million in off-farm storage was 16 per cent below the 3.1 million of last year.

The 11.4 million bushels of oats on hand was ten per cent less than last year Farm holdings of 849,000 were seven percent over the 790,000 a year ago but off-farm stocks of 10.6 million, 11 per cent lower than last year's 11.9 million, was more than offsetting.

Of the grain stored off-farm producers retained ownership of 74 per cent of the oats, 50 per cent of the barley, 26 per cent of the corn, and seven per cent of the wheat as of January 1 1977.

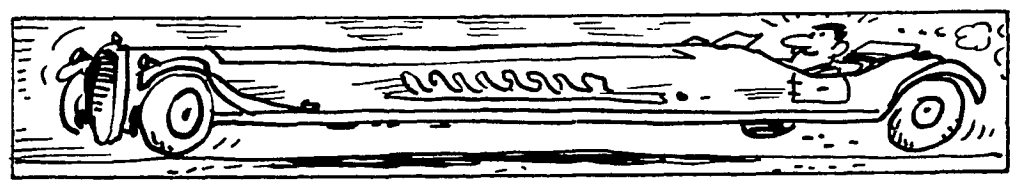
Corn in all storage positions in the United states on January 1, 1977 totaled a record high 4,861 million bushels, up nine per cent from the 4,449 million bushels a year earlier and 34 per cent above January 1, 1975.

Sorthum grain in storage Jan. 1, 1977 amounted to 490 million bushels, three per cent above a year earlier and 29 per cent above the same date in 1975.

Oats in storage Jan. 1, 1977 totaled nearly 421 million bushels, 16 per cent less than a year earlier and 17 per cent below Jan. 1, 1975. Barley stored in all positions on Jan. 1, 1977 totaled 272 million bushels, one per cent below a year ago.

All wheat stored on Jan. 1, 1977 totaled 1,777 million bushels, 28 per cent more than last year and 60 per cent greater than Jan. 1, 1975. Durum wheat stocks on Jan. 1, 1977 amounted to nearly 177 million bushels, 36 per cent greater than last year and 65 per cent more than two years ago.

On January 22, this picture appeared on page 20 of Lancaster Farming. Unfortunately, the caption underneath the photo was not correct. In actuality, the boy and girl pictured are Billy and Nancy MacCauley of Atglen R1. They are posing with Billy's reserve champion lamb and the buyers of the animal.



The largest car ever built was the Bugatti "Royale" of which only six were made. It measured over 22 feet in length and the hood alone was over 7 feet!

Cattlemen assess future, outline opportunities

ATLANTA, Ga. - Will the cattle industry continue to be buffeted about by unrelenting changes in U.S. society and the economy, or will cattlemen take steps themselves - individually and collectively as an industry - to determine more successfully their own destiny?

If cattlemen take advantage of the opportunities outlined Wednesday by a series of American National Cattlemen's Assn. convention speakers, they appear much more likely to have a more stable and profitable business in the years ahead.

The speakers - authorities from colleges, the cattle business and industry - presented their views of short and long range developments in domestic and overseas markets for beef; cattle production; business management; cattle cycle modification and industry-wide actions through programs like those of ANCA and the Beef Research and Information Act. The objective of the program was to provide cattlemen with a roadmap to the future and to help them manage change within a free enterprise business, and not just be managed by change.

The speakers were Dr. John W. Allen, food system expert from Michigan State University; Alan R. Middaugh, U. S. Meat Export Federation president; Dr. Robert Totusek, animal science department head at Oklahoma State University; Donald L. Staheli, president of Allied Mills, Inc.; Richard A. McDougal, president of Cattle-Fax and first vice president of ANCA: and George Strathearn, California cattleman and vice chairman of the Beef Development Taskforce.

—Outlining developments in the marketplace, Allen said the future for beef producers depends largely on how they - individually and as an industry - respond to changes in population characteristics, life styles, and food processing and marketing trends. Packer-processors, retailers and other food businesses can survive if need be without beef; so it is up to cattlemen to become more market-oriented and take the lead in seeing that beef does not follow a normal product life cycle and start going downhill. Every successful food product must be continually evaluated, be improved when necessary, be competitively produced and be properly promoted.

Changes in the market place include trends to smaller families, relatively more young people, more working women, higher per capita incomes, different life styles, more eating out, more convenience foods, more processed foods, changes in distribution. All of these things have implications for the types and quantities of beef that can be profitably produced and sold to the different market segments that are merging.

Traditional meat cuts will continue to be used, but beef also may become more of a "raw material" in a variety of products. Hamburger will remain popular, but we will not become a strictly "hamburger society." For beef to compete, there will have to be new efficiencies in beef handling. For example, still more boxed beef is likely, as are pre-packaged fresh and frozen consumer cuts.

—U. S. exports of all livestock products (mostly by-products) now equal all imports, Middaugh noted, but beef exports amount to only 0.2 per cent of domestic production. The MEF program is aimed at developing and opening larger markets for U. S. red meats and variety meats. Some of the best prospects are in the Far East and Europe, and MEF offices will be opened in Tokyo and Europe during 1977.

To take advantage of the opportunities, the U. S. livestock and meat industries will have to make a greater commitment to the export market. The MEF is now supported by 23 livestock and meat organizations, but more support will be needed. Among countries where meat imports may increase are Japan and other Far Eastern areas, West Germany, Russia, Poland and Chile.

—Totusek noted that there now are cattlemen who are properly evaluating and using available production techniques and are experiencing much better returns than the average. He reviewed management practices which can improve efficiency, and he noted the need for flexibility in adjusting to changes in demand for different types of beef.

When input costs were low, the main objective was just to increase production. Now the objective must be maximum efficiency, in terms of profit, with each practice more critically evaluated in terms of costs and returns.

---Some of the same business management principles used in corporate agribusiness can be profitably applied to cattle operations, Staheli said. One of these is planning - including (1) analysis of one's resources and alternative use of resources; (2) clearly defined short and long term objectives which can be measured, including production, marketing and financial objectives; (3) a plan of action, spelling out the who, what, when, where and how it will be done; (4) evaluation of results in relation to objectives.

Among other key principles is risk management and use of tools such as hedging, forward sales and purchases, production-marketing agreements, etc. Doing away with futures markets would not be a forward step, Staheli said.

He also cited the need for the industry to become more market-oriented. Profitable cattlemen of tomorrow will recognize that they are part of a dynamic food business, will plan and maximize their resources to meet consumer needs, will be flexible enough to gear their business to a changing market place, and also be efficient producers and marketers.

—It may not be possible to completely eliminate the 10-year cattle cycles, but the industry should not sit back and accept an even more devastating situation in 1984, McDougal said. Cattlemen should set out to develop some discipline within the industry; individuals and the industry should watch more carefully for the economic storm signals that precede each crash; and they should adjust their operations accordingly.

The industry, through its own programs, must constantly analyze supply and demand, relate the data to needed cow herd and feeding industry size - and then constantly communicate the information back to the country. No one has really tried the kind of comprehensive economic research, analysis and information program described, so how can one conclude now that it won't help? McDougal said cattlemen have the choice of becoming better informed, better disciplined and better long range decision-makers - or letting "Big Brother in Washington do it all for us."

Strathearn reviewed points brought out by previous speakers - noting how individual cattlemen could respond more profitably. He also emphasized the need for the industry as a whole to help itself through such organizations as ANCA, the Meat Board, state Beef Councils and Cattle-Fax. The problem is that not enough of the 1.8 million producers are supporting needed economic and technical research, market development and

and from the Sperry New Holland Company she received a gold watch.

Heading the list of lamb club award winners was Barbara Herr, Narvon R2, who garnered an armful of three trophies and awards for her performance at Farm Show. Barbara was the only grand champion the club had at Harrisburg this year when she was named grand champion lamb showman. For this honor, Earl Sauder, New Holland, presented Barbara with a pen set and the Sheep and Wool Growers Association awarded her a plaque for her performance. Wenger's Mill, Rheems, completed her cache of honors with a silver bowl in honor of her county reserve champion pen of lambs.

Repeating last year's performance, Sarah Lynn Brubaker exhibited the county champion lambs at Farm Show. For this honor and for owning and showing this year's state reserve grand champions, Sarah received a silver vegetable dish from Pennfield Corporation, Rohrerstown.

In beef club honors, Jeff Martin, New Holland R1, was the first individual to receive a silver trophy after Miss Burkins. Jeff had the reserve champion animal at the district show. Cope and Weaver Co., New Providence, provided his award.

Farm Credit Association awarded Tim Hess, Lancaster R2, with an electric clock for owning and showing the reserve champion steer at the county roundup.

Three cousins, Ernie, Jamie, and Fritz Frey, Quarryville R2, received trophies from Agway, Inc., Lancaster, for having the champion lightweight trio at the Farm Show.

This year's top beef showmen were also in the limelight at the Thursday evening banquet. Gary Eberly, Denver R2, was honored by Grubb Supply company, Elizabethtown, for his showmanship abilities at the county roundup. On the state level, Ken Brubaker, Lancaster, was named champion beef showman at the Pennsylvania Farm Show. For this performance, Grubb Supply Co. also presented him with a trophy.

Although there were no trophies to hand out for the livestock judging teams, Max M. Smith, Lancaster County Extension agent and coach to the Lancaster teams, paid special recognition to both the junior and senior teams for their performances this year. In national judging, the senior team took the second-ranked berth at Louisville, Ky., where Kevin Rohrer, Manheim R7, was named the top individual livestock judge in the country. Behind him came Ken Brubaker who was also the best 4-H sheep judge in the nation. The two other members completing the senior team are Bob Hess, Lancaster R2, and Tony Eberly, Denver R2. Kevin will be receiving a $500 U.S. Savings Bond for his performance and Ken a $400 U. S. Savings bond. Since the bonds were not available the boys each received $20 for their winnings in various contests along with the rest of the members of the team.

Smith also expressed his pleasure with the junior team for their championship performance at state days. The members of the team are Linda Martin, Kim Weaver, Judy Zimmerman, and Tim Long.

As a token of their appreciation to their coaches, the senior judging team presented Smith with a sheep skin rug. Gary Dean, Strasburg R1, the team's assistant coach who is a recent graduate from Penn State, received a number of gag prizes and a gift certificate.

Toastmaster of the evening was Kevin Rohrer, the club's president who is in his last year of clubwork.

4-H'ers acknowledge buyers

LANCASTER - Members of the Red Rose Beef and Lamb Club gratefully acknowledge the purchases of their Farm Show steers and lambs. Following is a list of those individuals and businesses which purchased 4-H steers and lambs at the Farm Show sales.

School milk

[Continued from Page 1]

announcement of the closings. Milk already in the schools was well under the freshness date and remained there for the reopenings of classes.

"We had some chocolate milk ready to package, but we diverted about half of that through our regular channels and converted the rest into ice cream mix. None was lost," said James Green, Sr. The dairy is supplied by Interstate Milk Producers Cooperative, Inc., Southampton, and can adjust the deliveries they receive from the cooperative to meet their supply-demand needs.

A larger problem now looms on the horizon for the dairy industry. Much of Class II milk supplies become skim milk powder, process I in manufacturing plants. Those plants use gas, natural and propane, to dry the fluid milk down into the finished powder. Because these plants are classified Class II gas users, they are waiting in line with other industries for allotments.

Penn Dairies maintains a plant in York which drys powder. Harold Butz, of the home office in Lancaster, said that the natural gas supplies to the York plant had been cut back, and the drying operations had been stopped. The dairy was able to utilize the milk through other manufacturing processes.

One large Pennsylvania powder plant in Somerset County had not received any gas shipments for several days. Normal milk supplies to this plant were being diverted to the Laurel, Md., manufacturing plant owned by Maryland and Virginia Milk Producers Association, Inc. The Laurel plant converted from natural gas to propane in November, 1976 But their propane supplies were running low and only enough was on hand to last through Thursday.

"We're not dumping yet, but it could forseeably happen if fuel supplies don't come through," indicated Boyd Cook, assistant manager of Maryland Cooperative Milk Producers, Baltimore. Some of the cooperative's excess production is handled at the Laurel manufacturing plant.

"We can continue to use it for butter production, but without that gas you can't dry powder. There's just no other way," added Cook.

Green's Dairy in York uses mainly oil in its processing operations. Ironically, though, the fuel oil burner needs natural gas to ignite it.

"We do use natural gas for sealing our pure-pak containers - that we must have And as industrial users, we're threatened with cutoffs, too," concluded Green.

Both Boyd Cook and James Green indicated that dairy officials are meeting with national representatives to appeal for fuel supplies for processing operations, stressing the crucial need as the very nature of the industry.

Production Costs Up

All types of wheat cost farmers around $58 an acre to produce in 1976 — compared with $56 in 1975, according to the U S Department of Agriculture. Cotton production costs, meanwhile, rose about eight per cent in 1976, to $218 an acre

internal and external information and promotion programs.

Strathearn asked: "Are we going to wait for another cycle and then say we have to do something? Or are we going to try to make things happen now? We have an excellent opportunity to do just that through the Beef Research and Information Program...We simply have to do a better job of improving the economic climate in which we do business.

"We can no longer afford the luxury of being rugged individualists and taking things as they happen, good or bad. It is time for us to get together and finance a program needed to maintain our independence and greater profitability. The most positive help we can expect is that of helping ourselves. The best opportunity we have, or probably ever will have, is through passage of the Beef Referendum."

What's New

SWING-DOWN TRACTOR STEP

Minneapolis based Metro Hydraulics Inc. has designed an innovative new tractor step called the 'Swing-Step," that simplifies gas tank fill-ups.

Metro's new swing-down step drops to an easy step off the ground. Puts the gas cap in easy reach on most tractors. On the giant models, the tractor axle is just a short step away.

The "Swing-Step" spring locks in both up and down positions. A push of the lock releases it. Swings either way for left or right mounting. Also has applications for other farm machinery with hard to reach features.

White® Plant/Aire™... the simple planter that provides you with job security.

You can plant with confidence with a White Plant/Aire because the Plant/Aire comes with a standard built-in seed monitoring system. Monitor sensors are built in exactly at the seed drop point for quick, accurate response. If there should ever be a planting problem, the Plant/Aire monitor will warn you audibly and visually... instantly. See us today for planting job security... next fall's harvest depends on it.

Port of Baltimore playing important agricultural role

BALTIMORE, Md. - The Port of Baltimore and agriculture teamed up last year to set an all-time record of exporting 216,357,791 bushels of grain and this meant a $40 million dollar boost to the state's non-farm economy.

Figures supplied by the Baltimore Chamber of Commerce which oversees grain shipments through the port showed grain shipments in 1976 increased by some 46 million bushels over 1975 which also was port record year for grain.

C. Philip Manger, president of the Baltimore Chamber of Commerce said of the record, "we actually could have gone much higher if it had not been for a slowdown in loadings during the Fall due to changes in grain inspection standards and practices. We believe the future is bright for heavy shipments of grain through Baltimore." Historically, the Port of Baltimore has an outstanding record on grain shipments and has not been involved with the recent scandals that have given other ports a black eye.

According to the Maryland Port Administration, each ton of bulk cargo such as grain has an economic impact of $6.48 on the Maryland economy through the generation of jobs and services.

According to calculations of the Maryland Department of Agriculture, the 216.3 million bushels grain shipments through the port for 1976 translated into 6,191,078 tons of bulk cargo for the port and, this times the $6.48 MPA benefit figures equals the $40 million boost to the state's economy through the partnership of the port and agriculture.

Historically, the Port of Baltimore grew up with Maryland agriculture through grain shipments and fertilizer imports and this relationship continues today to the benefit of all. However, the port now has outgrown the supply of local grain and today ships grain from many states.

Actually, the port's three grain terminals in 1976 shipped three times as much corn, wheat, barley and soybeans than were produced in Maryland. However, the port is a good customer of Maryland grain, and last year shipped about 20 million bushels of it, or about 20 per cent of the state's production, providing a key outlet for local grain at harvest time.

The breakdown of grain shipments through the Port of Baltimore in 1976 showed the following immense quantities: 145,815,076 bushels of corn, 30,155,502 bushels of wheat, 28,550,785 bushels of soybeans, 10,349,828 bushels of boybean meal, 1,262,600 bushels of barley and 224,000 bushels of miscellaneous grain meal - mostly corn screenings.

Officers chosen

ALLENTOWN, Pa. - The Lehigh County Extension Association elected their officers from the Board of Directors at a regular meeting on January 20. Elected president for the third year is Mrs. Orrin (Ramona) Fink, Slatington; poultry operator; Donald Breininger, New Tripoli, elected to his second term as vice president; Mrs. Donald (Renie) Patt, Breinigsville, was selected to assume the secretarial position and Timothy Lichtenwalner, Macungie, will serve his third term as Treasurer.

The Association also appointed Mrs. Kenneth (Mae) Kolb, to a three year term to the Board. Mrs. Kolb is a 4-H club leader from the Coplay-Whitehall area.

Timothy Lichenwalner was appointed to be a delegate to the Southeastern Pennsylvania Extension Advisory Board to serve with Mrs. Fink and Mrs. Alex Tercha who represent Lehigh County.

Program concerns in Agriculture, Home Economics and 4-H Club activities were discussed by the Directors to help the Extension Staff in their yearly program planning.

Meat output up 22 pct.

HARRISBURG - Red meat production in Pennsylvania during December 1976 totaled 98 8 million pounds, 22 per cent more than December 1975 according to the Crop Reporting Service.

Cattle slaughter at 90,500 head was up nine per cent; calves at 37,000 head were up 19 per cent; hogs at 296,000 head were up 41 per cent; and sheep and lambs at 12,100 head were up six per cent from a year ago

Nationally, commercial red meat production in December totaled 3.4 billion pounds, up seven per cent from a year earlier Number of cattle slaughtered was down three per cent, calf slaughter was about the same, hog slaughter was up 18 per cent Sheep and lambs slaughtered was down nine per cent from a year ago.

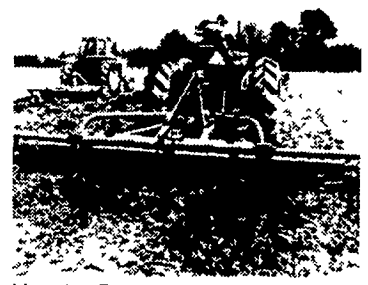
Vicon THE VICON SOIL TILLERS

Use the Jumbo Buster to mix surface trash into top soil



Use the Power Harrow to prepare a perfectly graded seedbed

Maximum soil movement—low draft. Jumbo Buster is the first step to better seedbeds. Highly efficient, low draft tines have tremendous soil movement capability in wet or dry soil. An exclusive soil "lifting" effect also reduces tine breakage, trash problems and horsepower requirements

Perfect seedbeds with minimum maintenance. Vicon's Power Harrow with two high speed reciprocating tine bars keeps moving parts and maintenance to a minimum. Requires as little as 80 horsepower to produce a perfectly graded seedbed—usually in only a single pass. Durable no gear construction and high working speed.

Nationwide parts and service. Vicon dealers and distributors are strategically located nationwide for fast action on all parts, service and equipment.

•Meyers known as enthusiatic farmer

By JUDY MITCHELL
Berks Co. Reporter

KEMPTON, Pa. - Ask someone in upper Berks County to name an enthusiastic young farmer in the area and the chances are good that "Don Meyers" will be the reply. How does Meyers come to fill the "enthusiastic" bill in the minds of so many people?

"I don't know," Don replied to that question in a recent interview with Lancaster Farming, "except that people wonder how I do it all." The Meyers operation in Kempton, R2, consists of 210 acres of farmland (50 of which are rented), 60 milking cows, and 50 head of young stock. Don has singlehandedly run the farm since 1968, having worked it in partnership with his father for approximately three year before that time. The Meyers's moved to Berks County in 1965 because the family farm in Bucks County was not large enough to support the father-son partnership and additional farmland was becoming difficult to find.

Don recalls that he tried hired help for about six months after he took over the farm; but when that didn't work out, he decided "to go to machines."

According to Don, three Harvestores, a feed lot, and automatic equipment for feeding inside the comfort-stall barn have helped him make the conversion from a two-man to a one-man operation. Milking still takes a big chunk out of the young farmer's day, however, and in his wife Vernette's opinion, "a person really has to love cows to spend six hours a day with them."

Mechanized feeding equipment helps Don Meyers handle the workload on the family farm which he converted from a two-man to a one-man operation.

Although Vernette admits that she doesn't share her husband's passion for cows, she observes that "he wouldn't be happy doing anything else but dairy farming."

The Meyers's have three children: Stacy, age nine; Melissa, age six; and Brooke, who is 15-month-old. Although Don handles the morning milking chores alone, he points out that he does get a helping hand in the evenings from Stacy and Melissa. The girls, according to Dad, are a big help "washing the udders, sweeping up, and feeding some of the calves." Although it's much to soon to tell where son Brooke's interests will lay, it's obvious to the Meyers that Stacy has inherited her father's enthusiasm for cows. "Stacy is our cow girl," Vernette remarks. Besides her eagerness to help around the barn, this was Stacy's first year in 4-H, and Vernette recalls that although "many a tear was shed" while Stacy was training her animal this past Spring, it took just one show to convince the nine-year-old that showing and fitting dairy animals is going to be her thing

Although handling the workload on the Meyers farm is no small feat for one man, it seems likely that Don's attitude towards the business also contributes to his reputation for enthusiasm.

Although he says he doesn't like to paint "too rosy a picture," Don feels that 1976 was a good year for the dairy farmer, and he is optomistic about the future of the industry. Most significant, Don considers, "is that the price of milk stayed fairly stable last year" without experiencing the usual sharp drop during the summer months. Of course, farmers then started producing more milk, Don notes, "so milk prices are now dropping some." But although milk prices are expected to be overall slightly lower in 1977 than they were in 1976, Don is confident that prices will remain more or less stable throughout this year.

Don is a firm believer in milk promotion abd is happy to report that "my milk association supports the dairy council," because he notes that some do not. Don believes advertising is important and recalls that "after the push in 1975," the dairy council's measurements indicated that consumption was up significantly even though "the store prices were up too"

"Marketing is really important if you want to support your product," Don remarked. Don sees marketing as more than just paid media advertising

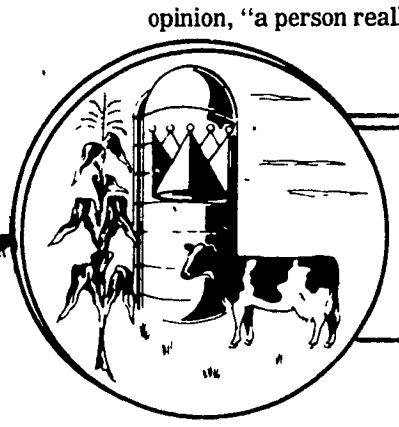
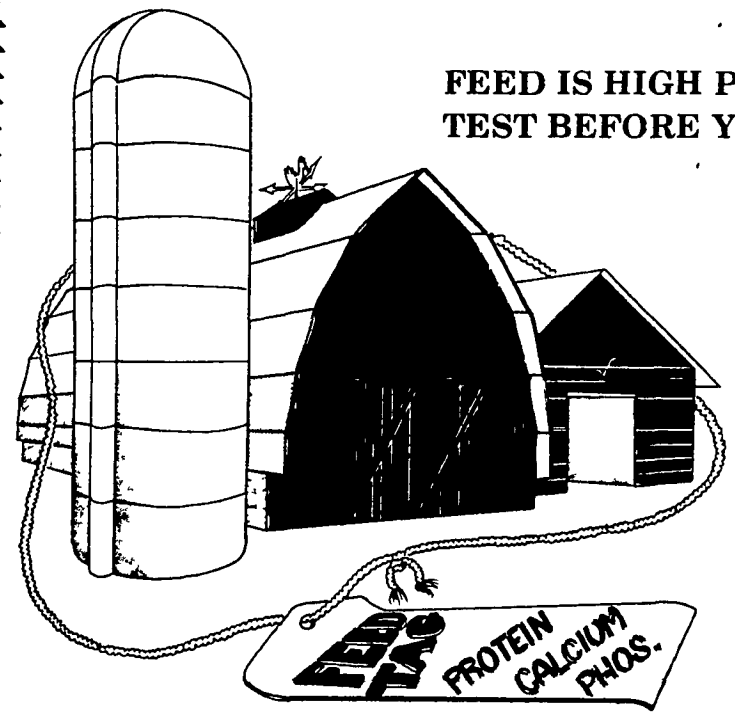
AGRI-KING
KEY TO PROFIT



FEED IS HIGH PRICED... DON'T WASTE IT!
TEST BEFORE YOU INVEST!



There isn't any way you can feed a balanced ration unless you test your home grown grains and roughages for protein, calcium, and phosphorus.

Then feed according to the nutritional values of your crops, in relation to the nutritionally balanced needs of your livestock.

In this way you will be utilizing your crops to their fullest extent, cutting other unnecessary feed costs and increasing your livestock profits. Agri-King feeding programs put it all together for you.

FOR MORE INFORMATION CONCERNING THE AGRI-KING FEEDING PROGRAM, CALL YOUR NEAREST SERVICEMAN.

The new officers and board of directors of the York County Holstein Association assembled for a photo at the most recent meeting. Seated are (left to right) Tom Boyer, York, vice president; Larry Amspacher, York R7, secretary-treasurer; and Leroy Bupp, Seven Valleys R2, president. Standing are (left to right) Mike Stewart, Airville, director; Paul King, Delta R2, state director; Jed Beshore, New Cumberland, director; David Stewart, Delta R2, director; and Ellis Crowl, Airville, director.

York Co. Holstein Assn. plans yearly activities

YORK, Pa. - The Board of Directors of the York County Holstein Association met January 26 at Moser's Restaurant, York, for their annual luncheon and yearly planning meeting.

Officers elected to serve during 1977 are: Leroy Bupp, president; Thomas Boyer, vice-president; Larry Amspacher, secretary-treasurer; and Paul King, state director.

Several other directors have been appointed to serve as committee chairmen. They are: Michael Stewart, sales committee; Larry Amspacher, special activities; Thomas Boyer, youth committee; Ellis Crowl, county show; Jed Beshore, breed improvement; and Thomas Boyer, annual banquet.

A calendar of activities for the year was scheduled for Association members. The Special Activities Committee will present an educational program during the Spring Barn Meeting, to be held March 16, at Avalong Farms, York. The meeting will begin promptly at 1:00 p m

Northern Virginia Holstein herds will be visited during a bus trip on April 5. Information on registration for the tour will be available at the barn meeting.

The Ellis Crowl family, Airville R2, will host the county-wide Holstein picnic. Scheduled for July 26, the meeting will include a program on diary operation manure management.

Other tentatively scheduled activities are the County Black and White Show, August 17, at the York Fairgrounds, and the annual meeting and banquet on October 21.

Legislation proposed to cut government programs

WASHINGTON, D.C. - "Sunset legislation" which would end each government spending program every five years unless Congress specifically re-enacts the program after a thorough review, has been proposed on Capitol Hill.

The type of zero-based budgeting called for by the "sunset legislation" is already being used in much of private industry as well as many state and local governments.

Under the proposed legislation, all federal laws authorizing the spending of money would expire after a five-year period. Programs in the same area would expire the same year.

What's new

MINERAL FEEDER

Feed Service Corporation, Crete, Neb. has introduced an all-new polyethylene mineral feeder It has ten compartments for the free-choice feeding of ten separate mineral elements. It is rugged, durable, light weight and it will not corrode or deteriorate. The feeder comes in two models. It can be mounted on a tripod and turns with the wind to make it weatherproof. It can also be purchased on a permanent steel base with a heavy cord-rubber door to make it weatherproof.

John Deere 60-hp 2440

Ideally compact size extends its capabilities

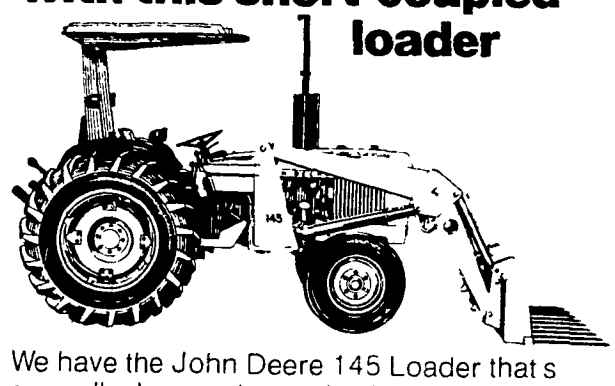
The 2440 isn't a "small" tractor, nor is it a "big" tractor The John Deere 2440's ideally compact size suits it well for many hard-to fit jobs Loading, for example — that's just one of many 2440 tight-quarter specialities

The 2440 comes with a variable-speed diesel engine, 8-speed transmission, draft-sensing 3-point hitch, "live" PTO, powerful closed-center hydraulics and much more — all as standard equipment That list of base-price features qualifies this compact John Deere Tractor for most any job — field or farmstead

The 60-hp John Deere 2440 — its specialties are many It's a great fit on any operation especially yours

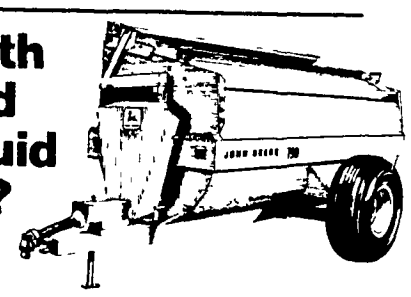
Stop in and see this lively John Deere 2440 today

Clean tight quarters with this short-coupled loader



We have the John Deere 145 Loader that s specially designed to make the most of John Deere Utility Tractor power Close coupling of tractor and loader gets you into the tight spots Visit us soon and see the 145

Have both solid and liquid manure?



Semiliquids frozen chunks wet sticky stuff Whatever your manure-handling problem we ve got the answer – a John Deere Flail Spreader Inspect one yourself You ll like the leakproof welded-seam tank Rugged flails claw away at the hard stuff And the exclusive single-pole hitch lets you make tight turns

Meyers known

[Continued from Page 31]

however. "When your milk inspector comes," he said, "there is no place on the score sheet for the outside appearance of the farm, and that is what the public sees." Consequently, Don believes, too many farmers ignore the general appearance of their farm which does not help improve the farmers' image in the eyes of the public.

In spite of a heavy workload at home, Don manages to be "fairly active" in several farm associations. He just retired from the board of directors of the Berks County Holstein Association and is a past district president of Interstate Milk Producers but still "keeps up to date" with the activities of both, and he currently serves on the advisory board for Sire Power.

Improving his stock is a primary concern for this young farmer, and Don feels that association memberships can help on that score. He is presently looking forward to helping establish a county sale sponsored by the Berks Holstein Association. Although plans for such a sale are still tentative, Don points out, in his opinion a county sale would be a real boom for the young farmer who does not have the cash outlay to purchase the quality of dairy animals now being offered at most existing sales throughout the state. A county sale offering good sound stock, within a reasonable price range, according to Don, would enable a farmer to improve his herd by "gradually" upgrading his stock.

Out in the barn, Don pointed out other association benefits that aid in improving herd quality. Pointing out one animal rated "very good" according to the Holstein Association's type classification system, Don remarked "this is the kind of cow I look for - she's sound, and she gives lots of milk." Don feels the classification system is of great value "because it lets you see the whole family line without a picture." Production and type figures, according to Don, should correspond to help a farmer improve his stock through breeding. Classification also "counts on the pedigree," Don noted, which is an asset for future selling. Don was also pleased to point out two other cows he's named Stacy and Melissa after his daughters. Interestingly enough, each animal received 88 points in the Holstein Association's last rating - just two points off an "excellent" classification.

What kind of picture does an enthusiastic young farmer of today see for future young farmers? Don feels, first of all, that more and more young people will be staying on the farm in the coming years. "In the 60's and 70's," he notes, "the push was to get off the farm and go to college, but I think this will reverse itself." Don adds that he thinks that possibly the trend is already reversing itself as more and more young people are coming out of college only to find that they are unable to find jobs related to their studies.

"A lot of young men and women," in Don's opinion, "are finding out that there is more enjoyment in a lot of jobs not related to books - not just farming, but other labor jobs as well." Don feels that new legislation aimed at easing the financial burden for young farmers should also help by making it more economically feasible for young people to continue family farm traditions; but for the young man or woman without a family farm to take over, "it will still be difficult."

Reminded before the conclusion of this interview that this was his big opportunity to "have his say" on any aspect of farming, Don replied: "People who have their holidays and weekends off, people who would never milk a cow, should appreciate the dairy farmer. The only way we get away," he added with good humor, "is to hire someone to do the work and then hope everything is in one piece when we get back."

Top It Off

A bowl of red and golden apples and a plate of mild-flavored Camembert or Brick cheese will top off any meal

At home on their farm in Kutztown R2 are Don and Vernette Meyers with daughters Stacy, age nine (standing), and Melissa, age six (sitting on her mother's lap). Fifteen-month-old Brooke was not available for the family photo due to an extended afternoon nap.

Northern farms

(Continued from Page 1)

Jefferson and Lewis counties in northern New York being buried under tons of snow from blizzard conditions, continued York

In some areas, milk tank trucks have been unable to transport milk off the farms in nearly a week, York commented. However, cows must be milked twice a day, he stated. Dairy farmers who have reached their holding capacity are having to dump thousands of gallons of milk, he remarked

Federal assistance is imperative to help these dairymen who have come to the end of their rope, stressed York. "We can't shut the milk faucets off and we can't stand by idly and watch these people succumb to nature's fury," he said

Under these conditions it is only logical that the federal government offset these losses, explained York. No one in the dairy industry can stand such losses, least of which, the individual farmer or his co-op, he said. Moreover, both New York and Pennsylvania pay large sums in federal taxes and receive a disproportionate share of return on taxes paid, informed York

Eastern Milk Producers Cooperative, alone, could lose in the neighborhood of one half million dollars when the final figures are in on the blizzard of '77, the co-op leader projected

Dairy situation

(Continued from Page 1)

conversation with Lancaster Farming. He pointed out that changes since mid-week have been mostly for the better. The milder weather has allowed roads to be opened up and energy legislation is keeping ag industry supplied. Shelhamer initiated a program early in the week to aid the state's farmers.

"It takes a lot of gas to turn powder into milk," Sumner said, expressing gratitude over Shelhamer's actions to put dairy manufacturing plants high on the energy priority list. The result has been that Pennsylvania's dairy industry has been hit with only a minimum of problems. That's not to say, however, that there weren't any.

Although Inter-State did not notice a drop in production on their final tally sheets at headquarters, individual accounts throughout the state (especially western counties) indicate that cows' production was affected. A newspaper article appearing in Thursday morning's Morrison's Cove Herald in Blair County, tells of numerous difficulties dairymen had in that area. Manure on one farm was reported to have been piled up to a depth of 13 feet. There have been no reports of milk having to be dumped,

Jim Sumner

although that very well may have happened.

So far milk has been able to move to markets, in spite of cutbacks at processing plants and lost sales to schools. Sumner observed that one of the advantages a dairyman has by marketing his milk through a cooperative is that the co-op has a number of buyers it can turn to if and when a problem develops. "It protects the market against a potential crisis situation," he said. In explaining the school milk program as it affects Inter-State, Sumner noted that five per cent of the cooperatives milk supply enters that market. That works out to 1.5 million pounds of milk per week.

Although some relief in the weather was seen for the past several days, more cold weather is being forecasted. So far, according to Shelhamer and Sumner, things have worked out pretty well considering the circumstances.

Efforts are continuing to keep agriculture from running out of gas and freezing.

Eggs counted

HARRISBURG - Pennsylvania layers produced 258 million eggs during December 1976, up four per cent from the previous month but twelve per cent below a year earlier, according to the Pennsylvania Crop Reporting Service.

The December average of 12.8 million layers is up about one per cent from the previous month but eleven per cent below a year earlier. Egg production per 100 layers during December totaled 2,021 eggs, up three per cent from the previous month but one per cent below a year ago.

The nation's laying flocks produced 5.5 billion eggs during December, four per cent above the previous month and one per cent above a year ago. Layers on hand during December averaged 281 million compared with 280 million a year earlier.

From Local Ag Teachers:

Thoughts in Passing

By GLENN SPANGLER
Vo-Ag Instructor
Manheim Central
High School

Cold, cold, and more cold. This is the description of the winter of 1977. We will remember the snow, ice, wind, fuel shortages, broken fuel pipes, cars and tractors that would not start, and other things. Yes, this is the season to remember or to forget.

The winter months on the farm seem to be a time for sitting down and resting in the living room. Some of this time is spent reading farm magazines or books, watching TV, and talking with family and friends, but some time is wasted. Many of us view the winter months as an unprofitable time, because we can not be out in the fields planting corn, baling hay, or other field tasks. But are we right? How many dairy calves and piglets die each day because we did not spend the time with the animals? How many pounds of gain are lost by our steers and fattening swine, because of poor herd health that was not noticed? The list of poor management practices could be very long, but fortunately we are not always guilty of poor management.

I would like to point out one area of management which is rather poor on many of our Pennsylvania farms. This area is machinery management. Too often it is only keeping the machine running or fixing it after it breaks down.

I do not know a good definition of machinery management, so I will not try to present one. However machinery management can be broken down into four basic areas: 1. Operation 2. Maintenance 3. Selection 4. Replacement.

Operation: This is the wrong time of year to talk about machinery operation or is it? Being a vocational agriculture instructor and working with area farmers, I have seen examples of excellent management and an occasional example of poor operating practices. I have seen drills clogged with trash driven over large lengths of the field, corn planters set to plant a population of 12,000 plants per acre and up to 32,000 plants per acre. I have seen the results of herbicide damage in the next year's crop, and a 100 horsepower tractor raking hay. I have made mistakes when operating machines, and I imagine you have too. Unfortunately one saying is too correct, "When all else fails read the directions." Now is a good time to read the directions before all else fails this Spring.

Maintenance: Maintenance involves repairing, lubricating, checking, resetting, storage, and a lot of labor. This is an excellent time of year to paint machines, repair worn belts, chains, gears, and other parts. Note the parts which are showing wear and that may break this coming season. You will be able to purchase these parts now, but next Spring when you have 25 acres of corn to plant, the dealers are sold out of the needed part, and it is going to rain tomorrow, what are you going to do? If you do not have a heated shop, I would not expect you to freeze trying to do these jobs. However ask a neighbor, who has a heated shop, what he does this time of year. Do not forget to grease your machines, or clean them when you are finished. (Have you ever seen the fertilizer box on a drill that was not cleaned out?) One area in which farmers in Lancaster County can be complimented is storage. There is no way to eliminate the labor you use, you can only change the time when it is done. One good note is that the good machinery manager will have 20 to 25 per cent lower repair bills.

Selection and Replacement: These two can be very closely related, since you would often select a different machine to replace an obsolete or worn out one. A large number of machines and tractors will be bought before the coming crop season. Each purchase on each farm will differ from others because of wide varying circumstances. One of the first things to consider is field capacity. There is a difference between the machine capacity and the amount of work which can be done in one hour. This is due to crop conditions, turning around and other things which will slow different machines down. Some other things to consider are the cost per acre and the life of the machine. If the cost per acre is too high, you should consider having the work done by a custom operator. Consider the timeliness; the ability of the machine to complete its job at the optimum time. Other things to consider are depreciation, investment credit, interest, the risk of ownership, taxes, and insurance. Make your management decisions based on wisdom.

Tomato pamphlet published

NEW YORK, N.Y. - The U.S. Department of Agriculture has issued a new publication outlining the marketing channels through which fresh tomatoes move on their way from the farmer's field to the consumer's table.

"How Fresh Tomatoes Are Marketed" was written by USDA's Agricultural Marketing Service (AMS) to help those unfamiliar with the tomato trade understand how this leading fresh market vegetable gets to the reatail store. The publication describes sources of tomato supplies, per capita consumption, and farm price trends. It outlines harvesting practices and packinghouse operations. Industry terms such as "vine ripe" are defined and color photos illustrate the various stages of maturity for fresh tomatoes. The new bulletin details the local industry in 11 tomato-producing states and gives information on greenhouse tomato operations and tomato imports.

"How Fresh Tomatoes Are Marketed" (Stock No. 001-000-03591-6) is for sale to the public for 90 cents per copy from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20250.

STOP BEDWETTING!

If your child is a healthy individual, we can help stop the distressing problem of bedwetting when not caused by organic defect or disease. Our organization exists for only one purpose - to eliminate bedwetting, which is extremely serious to those so burdened. Our program is based on many years of successful experience in this unique field helping many thousands. **Let us help your child too!** A booklet containing additional information about this important subject will be sent without cost or obligation to you.

DISC BLADES

New Heat Treated Disc Harrow Blades

Made of heavy gauge high carbon alloy steel heat treated for long trouble free service The special forging process used gives the blades a finer grain in the steel and makes it tougher and much more able to withstand rough usage The cutting edges are hardened to hold their edge longer yet are not brittle and will not easily break or split when striking stones or other hard objects All fit square axle unless indicated

Grain price report available

ANNAPOLIS, Md. - The Maryland Department of Agriculture's Division of Marketing is offering the Maryland Grain and Feed Report free to those interested in the grain industry. The report, published weekly at Annapolis, has been acclaimed by many as one of the best up-to-date sources of statewide and national grain and feed price quotations available.

Heading the weekly report is a narrative by John L. Crother, Jr., Extension Service marketing specialist at the University of Maryland, giving global conditions and their influence on Maryland grain. The remainder of the front of the report is devoted to "Maryland Cash Grain Prices", with averages from Baltimore, Western Maryland, Central Maryland, and the Eastern Shore; "National Cash Grain Prices"; and "National Grain Futures Prices."

The second half of the report, starting with the "National Feed News Highlights", is primarily concerned with feed prices. "Maryland Cash Feed Prices" in Western Maryland, Central Maryland, and the Upper and Lower Eastern Shore help livestock and dairy producers relate their feed costs to current grain values. "National Cash Feed Prices" with selected feedstuffs and markets are also quoted.

Richard Baker, livestock marketing specialist for the Maryland Department of Agriculture provides Maryland livestock and poultry prices, the newest addition to the report. These weekly quotations complete the price cycle from grain to feedstuff to meat.

Richard P. Parsons, director of MDA's Division of Marketing, says "grain production is Maryland's second largest agricultural enterprise; and since it accounts for annual cash receipts in excess of 160 million dollars, the Maryland Grain and Feed Report has become a useful tool to farmers, grain dealers and processors."

The Maryland Grain and Feed Report, compiled by Bradley H. Powers, field crops marketing specialist with the Maryland Department of Agriculture is a cooperative effort between the State Department of Agriculture and USDA.

To receive a free subscription to this report write: "Grain and Feed Report", Maryland Department of Agriculture, Parole Plaza Office Building, Annapolis, Md. 21401.

Lube book published

WASHINGTON, D.C. - The American Petroleum Institute has published the third edition of Publication No. 1567, "Farm Equipment Lubrication - Questions and Answers."

The publication was prepared by the Farm and Construction Equipment Lubrication Task Force of the API Marketing Department's Fuels and Lubricants Committee to answer questions most frequently asked by farmers and ranchers about lubrication. It includes answers dealing with API engine service classifications and API gear lubricant service classifications, SAE numbers, multi-viscosity oils, additives, contaminants, and storage and handling of lubricants.

Copies may be purchased for 15 cents each from the Publications and Distribution Section, American Petroleum Institute, 2101 L Street, N.W., Washington, D.C. 20037.

Truman Talks

Harry Truman often told this gag on himself: "There was a Californian who remarked to a man from Houston that he heard Truman was going to raise taxes The Texas man stood up and knocked the visitor cold with an uppercut to the jaw. "What did you do that for?" "I thought he said Truman was raised in Texas!"

Rodgers joins Grange staff

HARRISBURG - George W. Rodgers, Slippery Rock RD 3, has joined the staff of the Pennsylvania State Grange as assistant to the state master. Much of the responsibility of the new position will pertain to legislation and legislative matters, according to J. Luther Snyder, the State Grange master.

The position was established by delegates to the 104th annual State Grange Convention in Sharon last October.

Rodgers, a son of Mr. and Mrs. Walter Rodgers of Slippery Rock RD 3, Lawrence County, has been active in the Grange for 15 years.

In 1974 he was chosen State Grange prince. A year later, at the national convention in Columbus, Ohio, he was named National Grange prince, the highest youth honor of the organization.

Last year, at the annual state convention in October, Rodgers was elected assistant steward of the Pennsylvania State Grange.

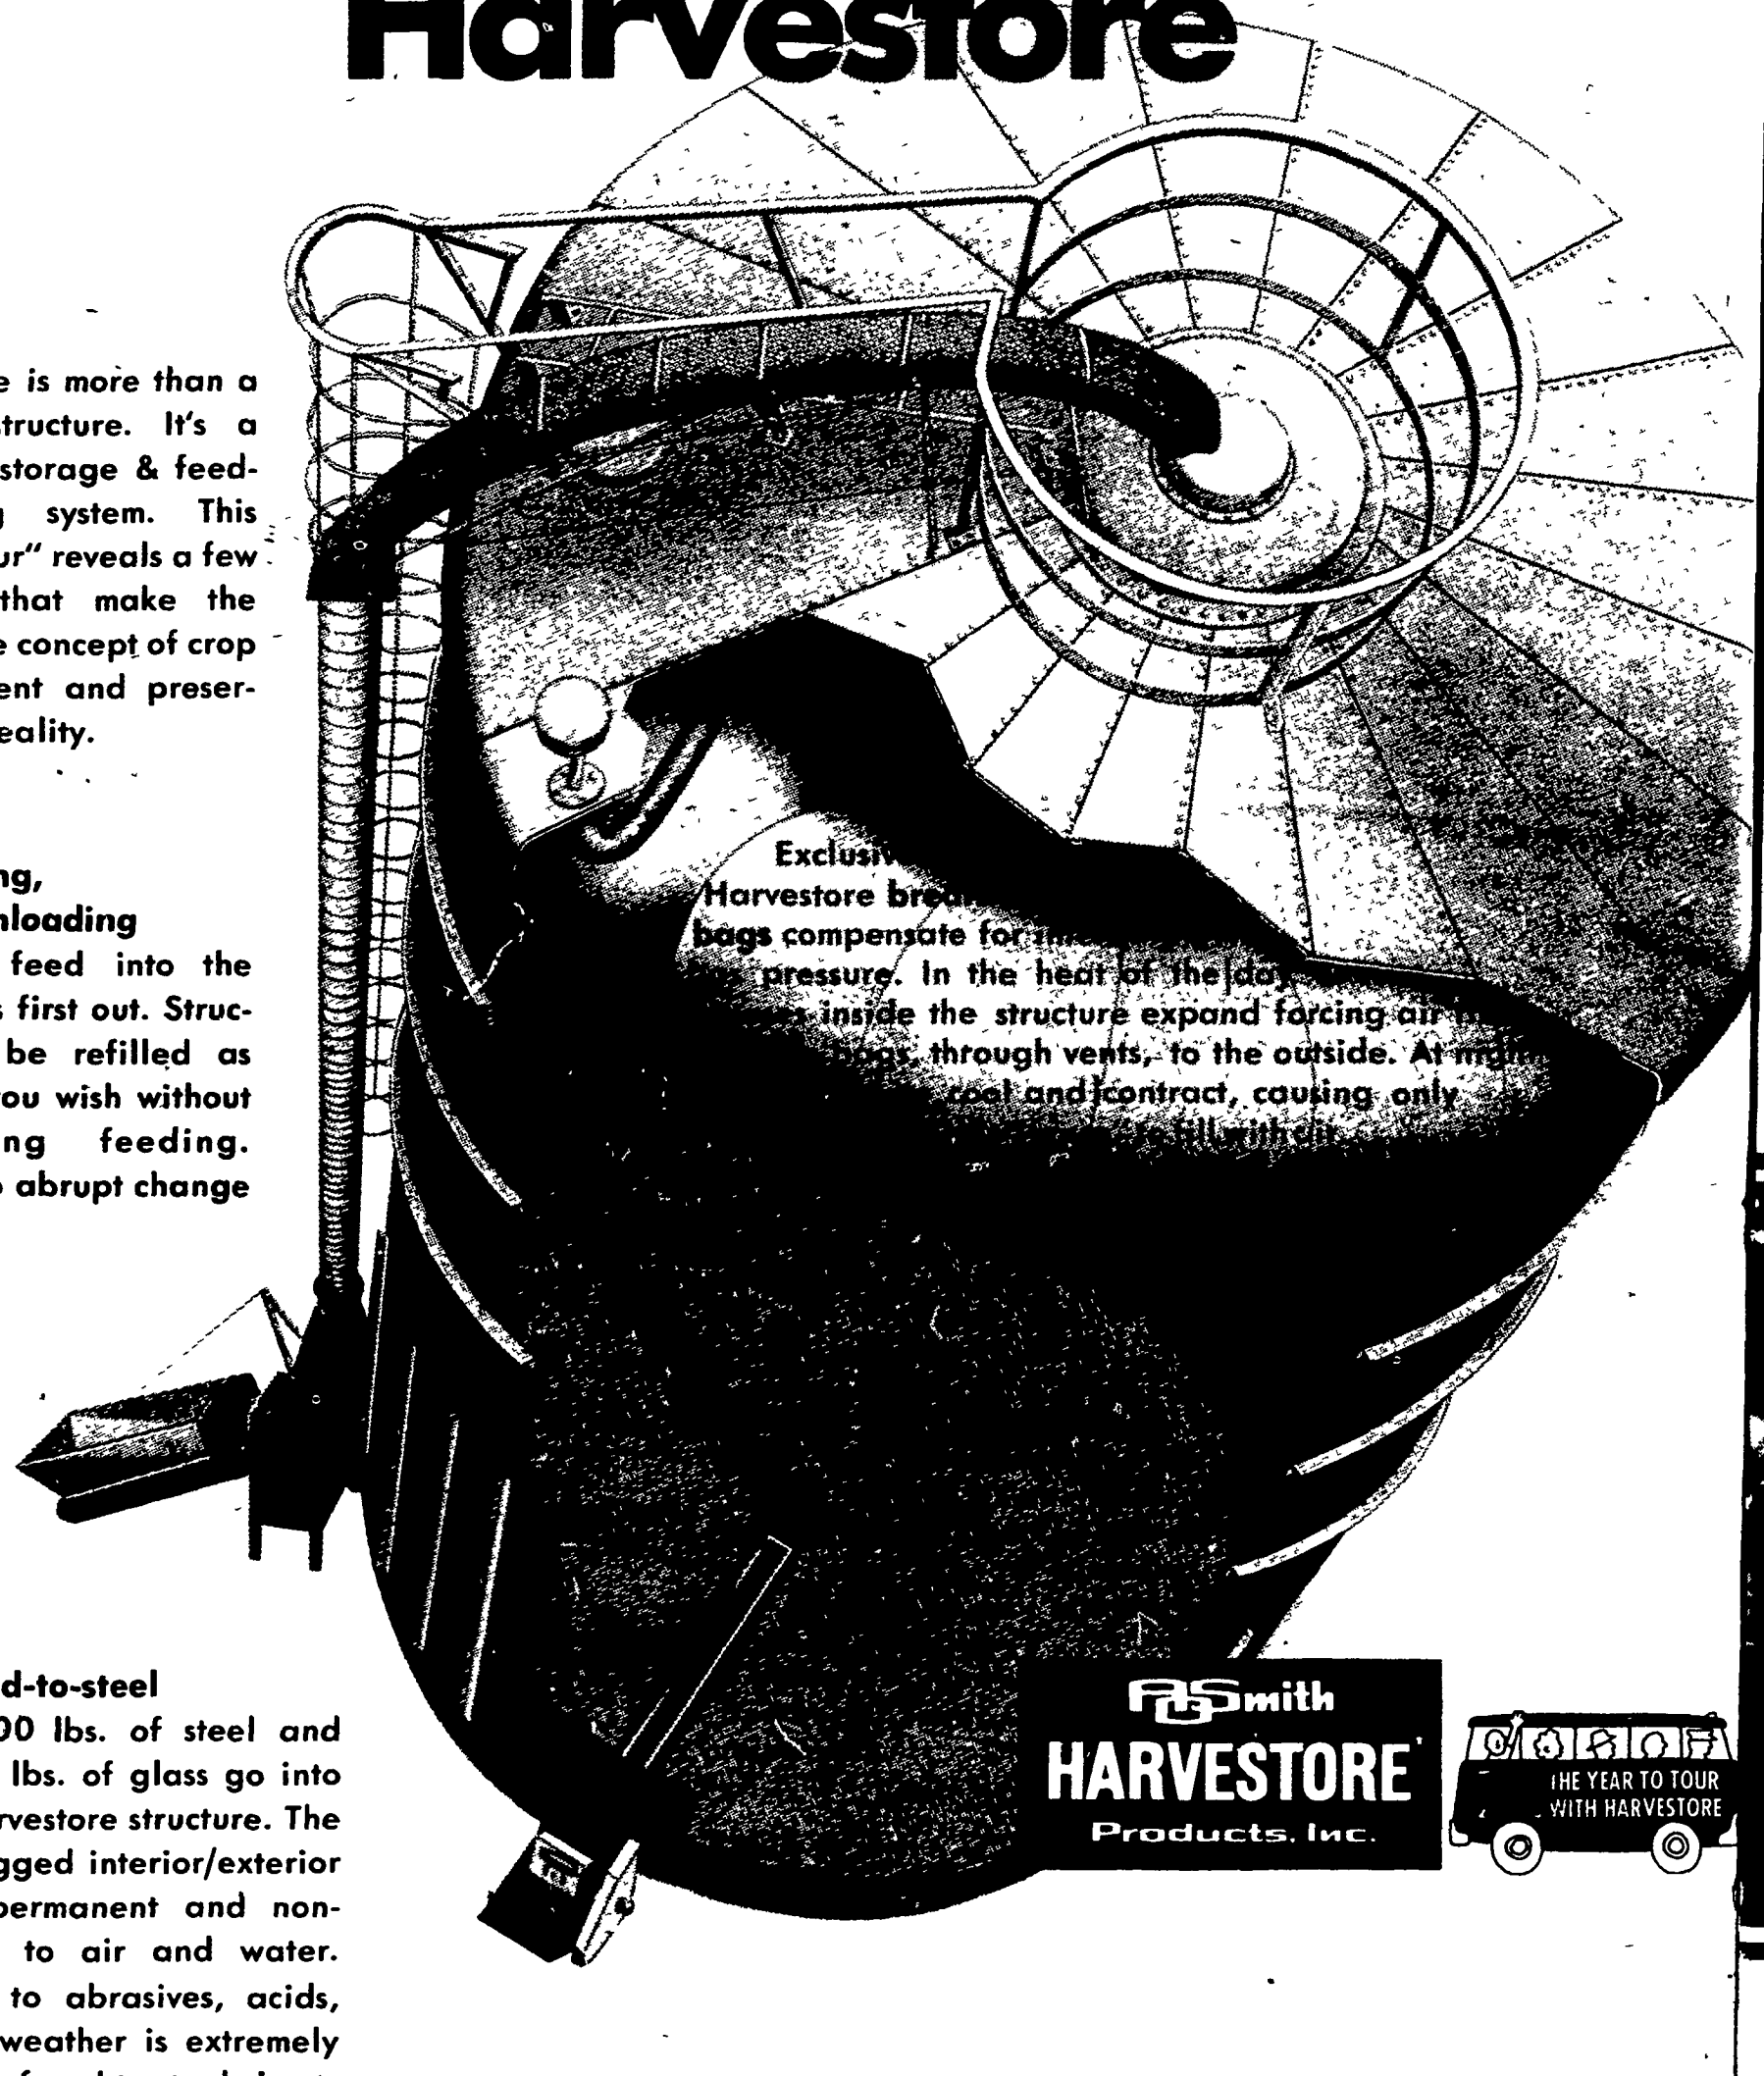
Rodgers also had been elected master of his subordinate Grange at Plain Grove, Lawrence County, last year but resigned to accept the new position with the state organization.

A graduate of Wilmington Area High School, Lawrence County, in 1974, he completed a course in agricultural engineering at Alfred, N.Y. State College in 1976 and holds an associate degree in applied science.

Dairy cattle water intake will vary with the weight of cow, ration fed, amount of milk produced, fat content of the milk and temperature. Cows producing 88 pounds of milk daily may drink up to 29 gallons of water daily when fed dry feeds. Dairy heifers fed fresh forage and silage may obtain up to 20 per cent of their water requirement from the feed. A study showed that when water intake was reduced 60 per cent, five of six dairy cows refused part of their hay ration and all of them lost weight.

Per capita consumption of chicken in 1976 is expected to exceed the 1972 record of 42 pounds per person perhaps by as much as a seven or eight per cent increase, according to the United States Department of Agriculture. That's one-fifth of all meat consumed by Americans!

Take a tour inside a Harvestore



Harvestore is more than a storage structure. It's a complete storage & feed-processing system. This "inside tour" reveals a few features that make the Harvestore concept of crop management and preservation a reality.

Top-loading, bottom-unloading

The first feed into the structure is first out. Structure can be refilled as often as you wish without interrupting feeding. There is no abrupt change in ration.

Glass-fused-to-steel

Over 51,000 lbs. of steel and over 1,800 lbs. of glass go into a 2580 Harvestore structure. The smooth, rugged interior/exterior finish is permanent and non-permeable to air and water. Resistance to abrasives, acids, wind and weather is extremely high. Glass-fused-to-steel sheets overlap. Torqued bolts are tightened with pneumatic wrenches. Joints and seams are sealed. Every structure is pressure-tested for air leaks.

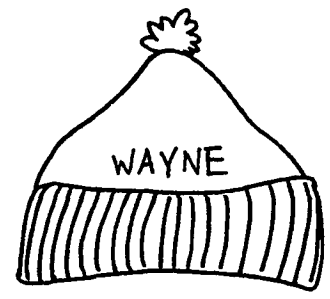
Dairymen!

Try WAYNE's new Maxine computer service, and get a Wayne stocking cap - free!!



Wayne has just announced a new innovation for dairymen. It's Maxine - Wayne's new Maximizer Computer Program.

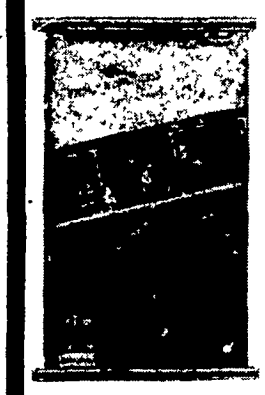
Let us introduce Maxine to your dairy operation, and we'll give you a free stocking cap. We want to show you how Maximizer calculations can now be done with computer speed and accuracy. The Wayne Dairy Maximizer calculates proper balance of protein, energy, fiber, calcium, phosphorus and magnesium for each dairy herd on an individual basis. The process, which formerly required hours of hand calculations, is computed and printed within seconds by Maxine.

The result is an easily-read, easily understood printed report - clear, useful and relevant information for dairymen.

It's simple, and if you'll let us show you how it works, we'll provide you with a warm, winter cap for those cold, winter days. Just contact any of the Wayne Feeds dealers listed below.

Maxine - from the Innovators.

Your Wayne Feeds dealers also bring you the best in dog and horse feed nutrition.



WAYNE DRY DOG FOOD

Used and recommended by professionals, who love and know dogs best.

WAYNE FORTI-O'S

Formulated to be equal to oats in energy value fortified with vitamins and minerals.

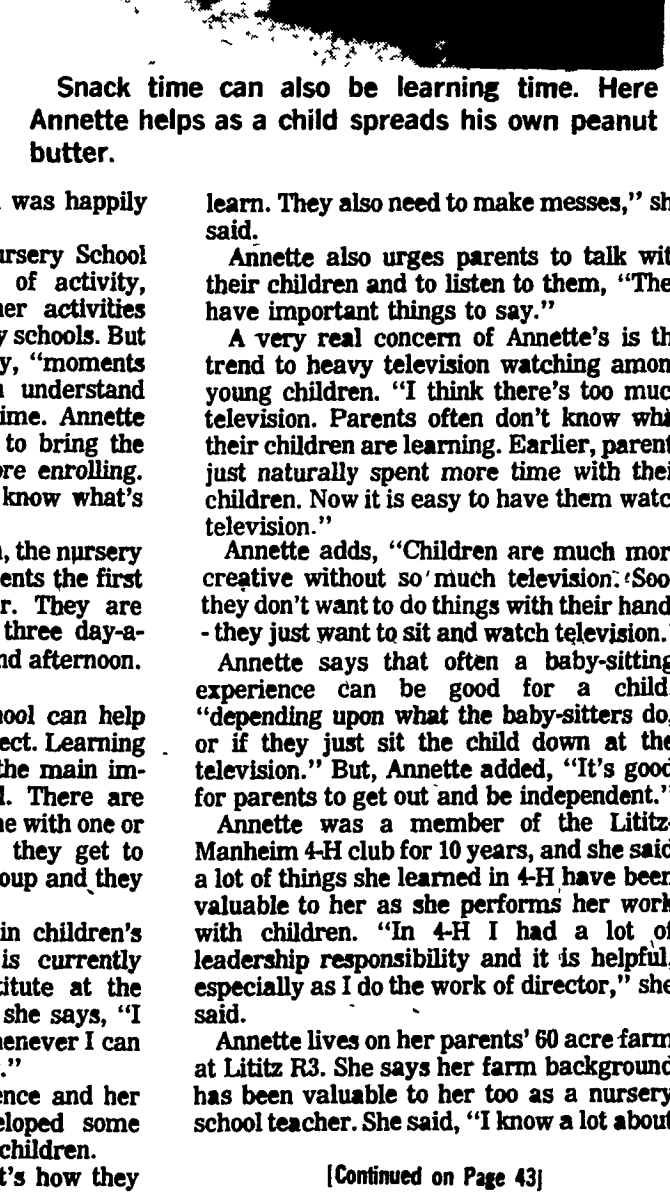
Pre-schoolers learn in Christian atmosphere

Homestead Notes



Snack time can also be learning time. Here Annette helps as a child spreads his own peanut butter.

By SALLY BAIR
Feature Writer

"I enjoy everything about working with children," Annette Long says with a dimpled smile.

Annette is the director of the Neffsville Christian Nursery School, and is responsible for administering the school as well as teaching a class on Mondays, Wednesdays and Fridays. As she greets the children and speaks softly with each, the enjoyment shines through.

For Annette, working with children is something that comes naturally, and something which came about by chance rather than by specific planning.

Her directorship of the nursery school program resulted from a program she presented for the United Methodist women's group in her church, Long Memorial United Methodist Church. To prepare for the program she visited 25 different nursery schools and day care centers in Lancaster County. What she found was that although many nursery schools are housed in churches, there is no Christian education as part of their basic program.

So the church decided to sponsor its own nursery school, and Annette was asked to organize it. She said they wanted to have "a definite Christian emphasis, with Christian ideals." So, Annette took a course at Messiah College on nursery school administration, but her professor told her it was impossible to open a school in the short time they had proposed. She worked hard, and says with a laugh, that her professor came to her open house, and was happily surprised.

The Neffsville Christian Nursery School incorporates all the periods of activity, painting, free play, and other activities usually associated with nursery schools. But they also include a Bible story, "moments with God," to help children understand Christian living, and prayer time. Annette says she encourages parents to bring the child and get acquainted before enrolling. She said, "we like parents to know what's going on."

In its three years of operation, the nursery school has grown from 25 students the first year to 73 children this year. They are divided among one, two, and three day-a-week sessions, both morning and afternoon.

Annette says, "Nursery school can help children a lot from a social aspect. Learning to adapt to a large group is the main importance of a nursery school. There are some children who get along fine with one or two other children, but when they get to school there will be a large group and they must learn to cope."

Annette also took a course in children's ministries at Messiah, and is currently enrolled in the Evening Institute at the Lancaster Bible College. Now she says, "I take courses and workshops whenever I can - in my spare time, if I have any."

In the course of her experience and her classwork, Annette has developed some definite opinions about young children.

"Children need to play. That's how they learn. They also need to make messes," she said.

Annette also urges parents to talk with their children and to listen to them, "They have important things to say."

A very real concern of Annette's is the trend to heavy television watching among young children. "I think there's too much television. Parents often don't know what their children are learning. Earlier, parents just naturally spent more time with their children. Now it is easy to have them watch television."

Annette adds, "Children are much more creative without so much television. Soon they don't want to do things with their hands - they just want to sit and watch television."

Annette says that often a baby-sitting experience can be good for a child, "depending upon what the baby-sitters do, or if they just sit the child down at the television." But, Annette added, "It's good for parents to get out and be independent."

Annette was a member of the Lititz-Manheim 4-H club for 10 years, and she said a lot of things she learned in 4-H have been valuable to her as she performs her work with children. "In 4-H I had a lot of leadership responsibility and it is helpful, especially as I do the work of director," she said.

Annette lives on her parents' 60 acre farm at Lititz R3. She says her farm background has been valuable to her too as a nursery school teacher. She said, "I know a lot about

[Continued on Page 43]

Annette watches one of her preschoolers paint at the easel.

Simple things can occupy preschoolers

By SALLY BAIR
Feature Writer

With a deep snow cover, sub-zero temperatures and no hope of warmer weather for a while, many mothers of pre-schoolers are beginning to wonder how to get through the long Winter days inside.

Annette Long, director of the Neffsville Christian Nursery School, agreed to suggest some activities which may keep children busy for a few pleasant hours and give mothers an answer to the questions, "What can I do now?"

Annette's first words of advice are: "Don't throw anything away." Of course, she laughs as she confesses that her attic is filled with things she never throws away. But, she says, the most simple things can provide amusement and education for pre-schoolers.

[Continued on Page 43]

Pre-schoolers

[Continued from Page 42]

animals that the children don't know. And in the Spring I usually bring lambs in for them to see."

In 4-H Annette had a wide variety of projects, including sewing, cooking, home improvement, flowers, vegetable gardens, bees, field crops, wildlife and conservation and capons. She said she did well with her capons and had several grand champions.

She held all offices in the local club and was treasurer for 4-H County Council. She participated in an exchange trip to Colorado and was on the vegetable judging team. She also attended Camp Kanesatake, and 4-H Citizenship Short Course at the National 4-H Center in Washington, D.C.

When Annette graduated from Manheim Township School, she attended the Thompson Institute in Harrisburg and became a qualified computer programmer. However. she said she graduated at a time when there were no jobs without experience.

So, she volunteered for two weeks at the Joy Ranch, Inc. in Millsville, Va. Joy Ranch is a children's home, and after her two weeks, she was asked to stay for the summer. When the summer was over she stayed on for three-and-a-half years as a house parent for 16 children ranging from four-19 years old. She says, "Even though I was just 20, the 19-year-olds would listen to me."

She expressed surprise at finding she got along so well in this position, because she is an only child. She is the daughter of Mr. and Mrs. Melvin Long. Her mother works as a helper in the nursery school several days a week.

While at Joy Ranch Annette began taking courses at Radford College in psychology and sociology, and from then on she was launched on her career of helping young children.

Annette works three days a week at the nursery school, but on the other two weekdays she does not stray from her children. She has received a day camp license from the Pa. Department of Environmental Resources, and brings children into her home for a group experience there. She said she has the day camp license because no one was sure what department her home work should come under. She offers more than a day care program.

Even in the summers Annette's life is busy - and exciting. For the past four summers she has traveled to Guatemala and helps to operate a mission guest house there. She also teaches biligual children, and, not surprisingly, works with them in a nursery school environment. She said teaching there is a challenge, because materials are not so readily available. But she said she uses materials at hand, just as she advises young mothers to do here.

Annette Long leads a full and fulfilled life helping the very young get off to a good start. The world of a pre-schooler is important to Annette and she strives to help them in a constructive way, loving, Christian manner.

Finger plays can be fun. Here Annette shows a group of pre-schoolers a favorite play.

Simple things

[Continued from Page 42]

Old magazines and catalogues can be a source of many activities. Annette suggests having children cut out things by color or make category scrapbooks. She said children can cut and paste scrapbooks of all cars, all toys, all foods, things with wheels, things with windows, things with doors, things in our homes, things on a farm, things in a grocery store, or any category your imagination can suggest.

Painting is a favorite pre-school activity, and if you're weary of seeing sheet after sheet of construction paper being consumed by your pre-schooler, try using old grocery bags or other shopping bags. If you're concerned about using paint, Annette suggests letting your child finger paint with chocolate pudding.

If that startles you, Annette says, "Children have to make messes - that's when they have fun." Another fun activity, she says, is playing in water - in the sink or in the bathtub. She adds that often a young child can wash dishes quite well - and have a grand time doing it.

"Dressing-up" can bring a lot of joy to a dull afternoon. Next time you go through your closet to discard out-of-date clothing, look at the garments as a treasure for your pre-schooler. There is nothing more fun than wearing parents' old shoes, hats, gloves or neckties.

Another time-consuming activity, and an inexpensive one, is having the child string beads, spools or macaroni, or straws which have been cut in short lengths.

Annette feels there are a lot of things which can be re-cycled to add to your child's pleasure. For instance, paper bags can be used to make puppets and egg cartons can be used to make bees and caterpillars. An egg carton can also be put to use as a "sorter." Annette suggests letting a child sort buttons, or you can teach a child to count by having him put one button in the first section, two in the second and so on up to twelve.

Milk cartons can make great building blocks, and nothing gives a child more pleasure than a huge, empty carton - and a little imagination.

One very important activity for a pre-schooler, Annette says, is reading to them. She said, "Reading is so important - if a child sees a parent reading, they will want to read. You can start very young. Reading is the most important skill."

If your child is just learning to use scissors, Annette suggests letting them practice by cutting strips of newspaper. It helps them perfect a skill and doesn't waste good paper.

Annette sums up her advice by saying, "you don't need elaborate things. Detergent bottles, fabric scraps, juice can lids - everything can be used."

So start saving your throw-a-ways, and begin enjoying time with your pre-schooler!

Meat and poultry committee meets

WASHINGTON, D. C. - The U.S. Department of Agriculture's National Meat and Poultry Inspection Advisory Committee will meet Wednesday, Feb. 9, at 9 a.m. in Room 4306 of USDA's South Building, 14th and Independence Avenue, SW, Washington, D.C.

The meeting is open to the public. However, space and facilities are limited. Persons wishing to file written comments with the committee may do so at any time either before or after the meeting. Information pertaining to the meeting may be obtained from Dr. James K. Payne, Room 4347, South Agriculture Building, 14th and Independence Avenue, SW, Washington, D.C. 20250; Area Code (202) 447-6313.

Officials of USDA's Animal and Plant Health Inspection Service said this committee advises and makes recommendations to the Secretary of Agriculture regarding operations pertaining to meat and poultry inspection programs.

Ida's Notebook

Ida Risser

I have a talkative daughter and I'm glad. It is interesting to hear what happened at school as we eat our evening meal. That is, we hear about the classes on the nights she doesn't stay late to play basketball. On those nights, she comes home on the activities bus and eats her meal alone.

The favorite topic is home economics class where they prepare food in groups of threes. She has two boys in her group and they were so glad to hear that she had experience in the kitchen. They do a lot of baking and most of the time the things turn out to be delicious. Then again, three cooks can be a few too many until it comes time to clean-up.

Nowadays, the equal rights amendment is much discussed in our newspapers on an adult level. At the eighth grade level, it puts girls in industrial arts classes, too, and they find it quite enjoyable to make things that, at one time, we only expected boys to make. The first semester Cindy made a beautiful metal candlestick of polished aluminum on a lathe and earlier made a bootjack for our hearth.

xxx

I don't know what we'll do around here when we don't have ashes from the furnace. Maybe we should stockpile some!

This Winter they've helped get the big milk tank truck out of the field - where he usually doesn't turn around. They've assisted the mailman when he slid off a straight stretch of road and even helped move the van which hauls our Amish neighbor's children. The small children piled out of the vehicle and tried to push it, but to no avail. So again, all that coal that I've been carrying to that hungry furnace this especially cold Winter does some extra duty.

Women's Calendar

Saturday, Feb. 5

Lancaster County Society 10 at 1:30 p.m. at 2349 Middle Green Apartment Village of Old Hickory. Hostess is Mrs. Raymond Dixon.

Lancaster County Society 6 meeting at the home of Katie Brandt. Program is music by Lisa Hollinger and Friends.

Lancaster County Society 1 meeting at 1:30 p.m. Program is workshop for embroidery.

Tuesday, Feb. 8

Dauphin Co. Society 1 meeting at home of Jean Janssen at 7:30 p.m.

Wednesday, Feb. 9

Berks Co. Society 1 meeting at the home of Naomi Howard at 8 p.m.

Friday, Feb. 11

Lancaster Co. Society 13 meeting at 7:30 p.m. Hostess is Mrs. John Denlinger and Mrs. Benjamin Landis.

Junior Cooking Edition

How has the weather been affecting you lately? Have you found yourself liking to stay snuggly warm in the house? And, have you found yourself looking for something warm and fun to do? Why not try some of the foods we have this week in "Junior Cooking Edition." They are all desserts, once again, and they sound like they'd be fun to try.

We have a recipe for cocoa brownies supreme - any chocolate lover's delight; and there's a marshmallow candy recipe for people with really sweet, sweet tooths; and for the ambitious, there is a chiffon cake and an overnight doughnut recipe. That last recipe could entertain you for several days running. Of course, the oatmeal pancake recipe and the trailside treat recipe shouldn't be ignored, either, although it's doubtful that many readers will be going camping on a trail in the next few weeks.

At any rate, have fun trying these recipes. And, if you decide that you'd like to send us a recipe while you have time this Winter, don't forget to add your phone number or a place where Lancaster Farming can reach you along with your name and address.

CHIFFON CAKE

2 cups flour
1-½ cups sugar
1 teaspoon salt
3 teaspoons baking powder
½ cup oil
7 egg yolks
¾ cup water
1 teaspoon vanilla
7 egg whites
½ teaspoon cream of tartar

Combine first four ingredients. Make a well and add oil, egg yolks, water, and vanilla. In another bowl combine egg whites and cream of tartar. Pour batter into stiffly beaten egg whites. Stir to mix. Bake at 325 degrees F. for one hour.

Joyce Brubacker
Myerstown, Pa.
Age 10

xxx

MARSHMALLOW CANDY

3 tablespoons gelatin (unflavored)
½ cup cold water
⅛ teaspoon salt
3 cups sugar
1 cup water
1 teaspoon vanilla

Soak gelatin in ½ cup cold water for 20 minutes. Combine sugar with one cup water and bring to a boil. Remove from heat and add to unflavored gelatin. Beat for 20 minutes. Add vanilla and salt. Pour on buttered tins, making a layer two-thirds inch thick. When cold, cut in squares and roll in confectioner's sugar or shredded coconut.

Mary Ella Fox
Ephrata, Pa.
Age 10

xxx

PUMPKIN PIE

1 quart pumpkin
¾ cup light brown sugar
¾ cup granulated sugar
2 tablespoons molasses
1 teaspoon salt
4 egg yolks
4 egg whites
2 cups scalded milk
Pumpkin pie spice

Mix everything together except for milk and egg whites. Milk and egg whites are added last. Sprinle pumpkin pie spice on top. Bake in two 9" pie crusts at 400 degrees F., then 350 degrees F. for 30 to 40 minutes.

Savilla King
Quarryville, Pa.
Age 15

xxx

TRAILSIDE OATMEAL TREATS

1 cup butter or margarine
1 cup peanut butter
1 cup granulated sugar
1 cup brown sugar
4 eggs
½ cup milk
2 teaspoons vanilla
1 cup semi-sweet chocolate pieces
1 cup raisins
4 cups sifted all-purpose flour
2 teaspoons soda
1 teaspoon salt
5 cups oatmeal

Beat together butter, peanut butter, and sugars until creamy. Blend in eggs, milk, and vanilla. Sift together and add flour, soda, and salt. Stir in oats, chocolate pieces, and raisins. Drop by tablespoons onto ungreased cookie sheet. Bake in pre-heated moderate oven 350 degrees F. about 15 minutes. Makes 3-½ dozen.

Laurence Fox
Ephrata, Pa.
Age 8

xxx

OVERNIGHT DONUTS

2-½ cups lukewarm water
2 packages yeast
2 eggs
¾ cup sugar
¾ cup butter or lard
2-½ teaspoons salt
8 to 8½ cups flour

Dissolve yeast in one cup warm water. Add remaining ingredients except for four-and-a-half cups flour. Beat until smooth with mixer. The remaining flour may have to be added by hand.

Cover and store in refrigerator overnight or up to three days. When ready to use, punch down, and pinch off desired amount. Roll out on floured sheets. Let rise at 80 degrees for one hour. Fry at 375 degrees F. about two minutes on each side.

Anne Fox
Ephrata, Pa.
Age 13

xxx

OATMEAL PANCAKES

1-½ cups rolled oats
2 cups buttermilk
½ cup sifted flour
1 teaspoon sugar
1 teaspoon soda
1 teaspoon salt
2 eggs, beaten

Mix rolled oats and buttermilk. If not using Quick Oats, it is a good procedure to soak the oats for a short time.

Add remaining ingredients and beat. Makes a thin batter. Fry in a well-greased hot frying pan.

Elva Eberly
Narvon, Pa.
Age 12

COCOA BROWNIES SUPREME

½ cup shortening
1 cup sugar
1 teaspoon vanilla
2 eggs, unbeaten
½ cup cocoa
¾ cup sifted all-purpose flour
½ teaspoon salt
½ teaspoon baking powder
¾ cup chopped walnuts

Preheat oven to 350 degrees F. Grease an eight-inch square pan. Cream shortening and sugar. Add vanilla and eggs. Beat until light and fluffy.

Stir in sifted dry ingredients. Add ½ cup of the chopped walnuts. Spread the mixture in a greased eight-inch square pan. Decorate top with remaining ¼ cup walnuts. Bake for 25 minutes until done in a 350 degrees F. oven. Yield: 16 two-inch brownies.

Cheese Cooking

The most important thing when cooking cheese is to remember that it is very sensitive to high temperatures and to prolonged periods of cooking. Overheated cheese usually forms a rubbery curd and tends to toughen after cooling.

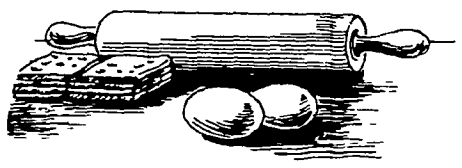
Home on The Range



Several requests have come into the Lancaster Farming office in the past few weeks. One very timely request is for Snow Ice Cream. Says the faithful contributor who made the request, "With the way things are going, we are going to have plenty more snow this Winter, so we should know how to do something with it!" Most people would probably agree -there's got to be more to do with snow than just shovel it.

The contributor also made mention of the fact that "Junior Cooking Edition" did publish a Snow Ice Cream recipe near Christmas, but that it consisted of different ingredients in it than she had ever used. Maybe you can help her out - she seems to recall that her old recipe took milk, eggs, and sugar, and a few other things. Perhaps someone can elaborate.

Another recipe which is being sought after is "Johnny in a Blanket." A staff member at Lancaster Farming would also like a good Swedish Meatball recipe - something not too spicy, but not just another ordinary meatball recipe.

And, don't forget when you are preparing the recipes to be sent into us, we are now asking for a phone number on each separate recipe or pages of recipes sent into us.

We'll be looking for the replies to these request.

xxx

FROZEN PEPPER CABBAGE

1 large head cabbage
3 peppers (red, green, yellow)
Carrots (optional)
2 teaspoons salt
2 cups sugar
1 cup vinegar
¼ cup water
1 teaspoon celery seed

Chop together cabbage, peppers and carrots. Add salt and let stand for one hour. Then boil sugar, vinegar, water, and celery seed. Cool this mixture before adding to cabbage and put in containers and freeze.

Mrs. John Ebert
Hegins, Pa.

xxx

BARBEQUE ROAST CHICKEN OR TURKEY

One third cup chopped onion
3 tablespoons butter
1 cup catsup
One third cup vinegar
2 tablespoons sugar
½ cup water
3 teaspoons mustard (prepared)
1 tablespoon Worcestershire sauce

Slowly cook onions in butter until soft. Add remaining ingredients. Cook 15 minutes. Pour over chicken or turkey. Bake at 300 degrees F. until soft.

Mrs. Luke Wise
Lebanon, Pa

xxx

BAKED DRIED CORN

1 cup dried corn
2 cups hot milk
1 cup cold milk
2 eggs
2 tablespoons brown sugar
½ teaspoon salt
1 tablespoon butter
Dash pepper

Soak dried corn in two cups hot milk for one hour. Add cold milk, eggs, brown sugar, salt, butter, and pepper. Put all ingredients in bender and blend until fine. Bake at 350 degrees F. for 45 minutes.

Mrs. Elmer Wenger
Manheim, Pa.

JIFFY LIMA BEAN BAKE

1 pound can dried limas
1 pound hamburg
1 can tomato soup
½ can water
Dash of cinnamon
1 tablespoon brown sugar

Brown hamburg with a little onion. Drain grease. Put in baking pan - add beans, soup, water and cinnamon. Add brown sugar; mix well. Bake at 350 degrees F. about 45 minutes.

Harriet Greenawalt
Lancaster, Pa.

xxx

POTATO FILLING

1 cup mashed potatoes
2 beaten eggs
4 slices bread, cubed
1 cup milk
2 tablespoons melted butter
2 tablespoons onion

Pour milk over mixture of potatoes, eggs, and bread. Brown onions in melted butter. Stir in greased casserole. Cover. Bake one hour at 375 degrees F. Serves six.

xxx

CHICKEN LOAVES AND PEAS

1 cup soft bread crumbs
2 cups milk
2 eggs, beaten
1 teaspoon salt
¼ teaspoon paprika
3 cups cooked diced chicken
¼ cup cooked peas

Mix above together and bake at 350 degrees F.

Above two recipes by:
Anna Joyce Martin
East Earl, Pa.

xxx

DON'T PEEK CHICKEN

1 cup rice, (uncooked and not minute)
1 can cream of mushroom soup
1 can cream of celery soup
1 can cream of chicken soup
1 can of chicken broth or bouillon

Mix all the soups together and the broth. Mix and ladle over the rice. Take six pieces chicken, skin and butter it over the top. Salt. Lay the chicken in the rice. Cover with foil. Bake two and one-half hours at 300 degrees F. Take cover off. Bake 15 more minutes. (Don't peek during cooking).

Sara Maust
Berlin, Penna.

xxx

CHICKEN ROLLS

Use biscuit dough. Roll out about ¼ inch thick, then spread with finely cut-up chicken. Roll up as you do to make rolls and cut into slices. Bake at 350 degrees F. until biscuits are finished. Serve with chicken gravy.

Anna Nolt
New Holland, Pa.

xxx

CHICKEN CACCIATORE

1 broiler-fryer chicken, cut in parts
3 teaspoons salt, divided
1 teaspoon paprika
½ teaspoon pepper
1 cup flour
¼ cup corn oil
1 small onion, finely chopped
2 thin slices green pepper, finely chopped
1 bottle (32 ounces) tomato juice
1 small bay leaf, broken
1 teaspoon ground oregano
1 teaspoon flavor enhancer
¾ teaspoon chili powder

Mix together, one teaspoon of the salt, paprika, pepper and flour; coat chicken, shaking off excess. Heat corn oil in fry pan over medium heat. Add chicken and brown on all sides. Remove chicken from fry pan. Add onion and green pepper. Saute. Add tomato juice, bay leaf, oregano, flavor enhancer, chili powder and remaining salt. Bring to boil; reduce heat and simmer 15 minutes. Place chicken in single layer skin side up in baking pan. Pour sauce over chicken. Bake in 350 degree F. oven, covered, about 45 minutes, basting occasionally, or until fork can be inserted with ease. Serve with spaghetti. Makes four servings.

Farm Women head for Harrisburg

HARRISBURG, Pa. - Farm women will be taking to the Capitol next month when the Pennsylvania Farmers' Association sponsors a Sweethearts Legislative Conference for all its female members. Slated Feb. 15 and 16, at the Penn Harris Motor Inn, Camp Hill, the conference reflects the growing interest and involvement of women in this prime area of concern to all farmers - legislation, according to political education program head Carolyn Rutter, York.

"This legislative conference will enable women to visit with their legislators on the Hill during the afternoon of Feb. 15. The legislators will then be invited to dine with the women that evening," she stated.

Scheduled for the second day, are workshops on political energy program, policy development and policy implementation. The event preceeds the annual legislative tour for men March 28.

Peanut Butter

Peanut butter is about 25% protein One tablespoon of processed peanut butter contains about four grams of protein

New warranty ruling on the books

WASHINGTON, D.C. - Beginning the first of the year, the new Magnuson-Moss Warranty Act requires retailers to provide customers with pre-sale information on written warranties.

For any consumer product that sells for $15 or more and carries a written warranty, the retailer is required to make the text of the warranty available to the consumer, prior to sale, in one of the following four ways; 1. The retailer may display the written warranty near the product being offered for sale. 2. Or, the retailer may maintain an indexed, up-to-date warranty binder which contains copies of all warranties on products sold in a particular department or store area. This binder must be clearly labeled "Warranties" and be prominently displayed for customers' perusal . . . or display material must indicate where the binder can be found. 3. Or if the written warranty is printed on the package, the retailer may display the package so that the warranty is clearly visible to the customer. 4. Or, if the same warranty covers a line of products, the retailer may place a common sign containing the text of the warranty in close proximity to those products.

The retailer need not restrict himself to only one method.

Another aspect of the new law is that the retailer may not remove or obscure any pertinent warranty information supplied by manufacturers except for special circumstances, such as window display, fashion shows, photography.

Warrantors must provide the retailers with all the warranty materials necessary to help comply with the Act.

Delaware County offers sewing courses

MEDIA, Pa. - New sewing techniques for this year's fabrics, proper fit in sewing, and tips for the beginning seamstress are the topics of three new seminars in a series of workshops planned by the Penn State Extension Service which are being held in Delaware County. Maryetta Duffner, Delaware County home economist, invites the public to attend either one or all of the workshops, but cautions that Delaware Countians have first priority.

"New Techniques for New Fabrics" will be held in the Toal Building Auditorium, at the corner of 2nd and Orange Sts., Media, on Wednesday, February 9, 16, 23, and March 2, from 10 a.m. to 12 p.m.

The cost of registration is $10.50.

Fitting Workshop

The workshop of "Fitting" has been planned for February 9, 16, 23, March 9, 16, and 23 from 1 to 3 p.m. in the Toal Building Auditorium. Registration is $15.75.

Beginners' Workshop

Sewing workshops for the beginner will be held on Tuesdays February 8, 15, 22, and March 1, 8, and 15. These classes are slated for 1 to 3 p.m. and will also be held in the Toal Building Auditorium.

In the beginners' classes, a simple cotton garment will be made, although no actual sewing will be done at the workshops. Registration is $15.75.

In all cases of registration, a check for the required amount should be made payable to "Home Economic Workshops, Maryetta Duffner," after a check on availability of the course is made by phone. The phone is 1-215-566-0142.

What's new

PORTABLE CLEANER

American Screener Corporation announces the development of the Portable Grain Cleaner.

The Portable Cleaner is mounted on a variety of trailer sizes, from 12 inches long to 32 inches long, is available in capacities from 1500 BPH to 20,000 BPH and is available for all grains.

On being a farm wife - and other hazards

By Joyce Bupp

Stopping briefly before the mirror, I hurriedly applied a coating of lipstick. It was icy cold and the biting wind was harsh on unprotected skin. The coating of lipstick would help just a bit.

Patty, our eight-year-old, took one look at the lipstick, put her hands over her mouth and giggled.

"Are you expecting to meet a boy on the way to the barn?" Third grade girls are positively obsessed with talking about boys - already.

"Oh, at least two or three," I laughted as I left the warm house for the jaunt to the calf barn.

Any boy, or girl even, who met me coming across the yard on a cold night would probably experience nightmares for weeks. Bundled up in winter barn wear, I could easily become the stuff from which legends are made - legends like Bigfoot, or the Abominable Snowman, for instance.

A shapeless, fuzzy red ski cap completely covers my hair, ears and forehead, with only two beady eyes peering out. The hooded blue sweatshirt is pulled high around my neck and tied tight. Emblazoned across its one side is a feed company emblem. Business-minded farm women never turn down free gifts; unhappily for the generous dealer, the advertising is usually too covered with barn dirt to be legible. A pair of bleach-spotted, out-of-shape knit slacks hide my most valuable "winter of'77" possession - long thermal underwear.

Finishing off this glamorous outfit is a pair of fine gloves. Rubber ones. The left one is yellow; the right one is blue, and three sizes too large. No one borrows them to wear. No one else would be caught wearing them on a bet.

Patty was right. I did meet a "boy" during the trek to the barn. He came racing toward me from around the garage, barking furiously all the way. Upon sudden recognition, he turned and fled into hiding in the barn.

I might look like I'm "going to the dogs", but it just isn't true. Even they won't have me, in this get-up.

Floral designer to speak Longwood

KENNETT SQUARE, Pa. - Frances Jones Poetker, internationally known floral designer and lecturer, will speak at Longwood Gardens on February 9, at 8:30 p.m. Her speech, the second in Longwood's 1977 series of horticultural lectures, will cover "Period Arrangements with Ecological Orientation." Emphasizing the use of natural materials in floral design, she will demonstrate the creation of period and contemporary arrangements. Admission will be $1 per person.

Mrs. Poetker is co-author of the book, **Wild Wealth**, which reflects her intense interest in ecology and the environment. She has written numerous articles on floral design and ecology, and once presented a nationally syndicated television course on plant ecology.

The conservatories at Longwood will be open for one hour before and after Mrs. Poetker's talk, so that lecture-goers can enjoy the many winter floral displays. Acacia trees, camellias, spring bulbs, yellow and white freesias, and primroses fill the beds in the large conservatories with spring color. In the smaller houses, amaryllis, orchids and members of the African violet family are blooming.

Longwood Gardens is open every day of the year, the grounds from 9:00 a.m. to 5:00 p.m. (6:00 p.m. in summer), and the conservatories from 10:00 a.m. to 5:00 p.m. Admission is $2 for adults and $1 for children six through 14. Children under six are admitted free.

Toddler Topics packet available by request

WEST CHESTER, Pa. - Parents of preschoolers in Chester and Delaware Counties can get helpful and timely information on all aspects of rearing children from "Toddler Topics", a learning packet of information developed by the Extension Home Economists in the Southeast Region.

The packets are free. Some of the subjects covered in the series are: children and obesity; coping with stress and the small child; legislation for child care; choosing a babysitter for the working mother; recycling clothing; selecting a nursery school; allowance for preschoolers; death and the preschooler; dental health; gardening ideas for children; creativity; and working mothers.

"We've received letters from parents of young children who have used the "Toddler Topics" packets in previous years and overwhelmingly the comments have been that they were extremely helpful..." says, Valerie Peoples, Extension home economist in Chester County.

Ms. Peoples also reminds parents who received the Toddler Topics in the past that they, as well as new subscribers, must phone 696-3500 or mail requests to the Cooperative Extension Service, Paul B. Dague Bldg., 235 W. Market St., West Chester, Pa. 19380, to receive the series this year. Those parents in Delaware County who are interested in the packets should call or write the Delaware County Extension Service, Toal Building, 2nd and Orange Streets, Media, Pa. Phone is LO 6-0142. The Delaware Co. series was prepared by Maryetta Duffner.

Rush seat workshop set

MEDIA, Pa. - Do you have a chair that needs a new rush seat to refurbish it? If so, the Penn State Extension Service has planned a workshop on rush seats to enable you to learn this new skill, says Maryetta Duffner, Extension home economist. The classes will be held from 10:00 a.m. to 12:00 p.m. on Tuesday, February 15, 22, March 8 in the Total Building Auditorium, corner of 2nd & Orange Sts., Media, Pa. 19063.

To register make your check for $11.50 payable to Home Economic Workshops, and mail them to Maryetta Duffner at the above address. Registration is due Feb. 8. The public is invited to attend. Rush to reweave your chair is included in the cost of the course.

HOUSING OUTLOOK

The housing market, sluggish for the last few years, began to show some improvement in 1976. The single family home is still a high priority for American families and many seem willing to allocate a larger portion of their budget to housing in order to achieve this goal.

The cost of the median new house rose 14 per cent in 1976 to more than $45,000 - out of the reach of most families.

In fact, the specialists say, very few housing starts are "first homes." Most are built by families who are "stepping up" to a second or third home with the money obtained from the sale of their previous home. Inflation has meant sizable profits for many home sellers.

We are likely to see more activity in the home improvement area as families upgrade existing homes. This trend should improve the existing housing stock and forestall much of the deterioration once taken for granted.

The cost of energy has had its effect on the housing market. Families that can handle monthly mortgage payments often find ever rising operating costs such as utility bills,local taxes, insurance and maintenance to be a hardship.

Early 1977 may be a good time to finance a home, but mortgage rates are expected to creep up as the year progresses. The trend in California and New England to the variable interest mortgage may work its way to Pennsylvania. Another approach, the graduated payment mortgage, in which the initial payments are lower and the later payments higher to reflect increased income during the family life cycle, is also on the horizon.

Americans spent an average of $345 per man, woman and child on clothing and shoes in 1976 - that's up 5.2 per cent from 1975. But only half of this 5.2 per cent was due to increased prices. The other half came from increased buying.

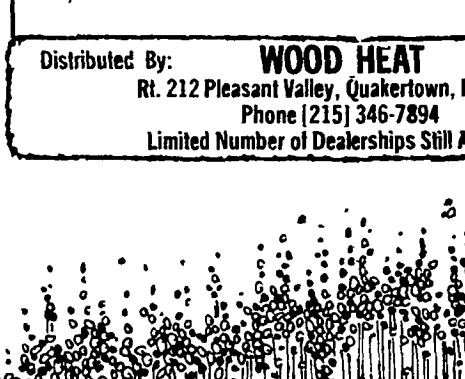
Demand is high for clothing made from natural fabrics, especially cotton and wool. This reflects a fashion trend toward the natural look. At the same time, demand for clothing made with double-knit fabrics, popular for many years, has dropped significantly. Many double-knit factories have reduced production or shut down altogether.

Consumers should expect price hikes for both cotton and wool. The 1976 cotton crop was about 25 per cent larger than the 1975 crop, but the high demand and increased exports are going to keep supplies tight and prices up. Wool supplies are down and because of high demand, this will up prices. More blended fabrics will be on the scene, with a lower proportion of cotton or wool to the man-made fabric than has been traditional. These blends will stretch the available supplies of natural fibers and simplify care of the finished garments.

COOK STOVE FOR WOOD OR COAL . . .

Built with Old World Craftsmanship yet

MODERN AS TOMORROW!



the STANLEY Kitchen Range from Waterford, Ireland

CHOOSE BLACK IRON OR WHITE PORCELAIN

Priced From $599

Model shown

White with backsplash warming shelf and base extender options

A household word in Ireland, where the use and technology of solid fuels has never ceased, the incomparable Stanley is now available for the first time in America

AMPLE COOKING SPACE An even heated oven large enough to roast a 25 lb turkey, and a finely finished, cast iron hot plate that accommodates the everyday needs of most families

LANCASTER, PA. 17601
MANUFACTURER AND BUILDER OF QUALITY CONCRETE-STAVE SILO'S

CLEAN-CHUTE SILAGE KIT:

Climbing the silo chutes is now an easier and safer chore. Silage is received by the durable molded hopper unit which can be trimmed to fit any conventional silo door opening. Silage flows down the 11" plastic tube—large enough to carry the output of heavy duty silo unloaders. The tube is cut to length at the lower end as the silo is unloaded. All the silage is confined to the silo flow. With silage no longer hanging up on chute and steps, corrosion inside the chute is sharply reduced.

Silo's For The 1977 Season Are Available Now. We Will Be Happy To Quote Your Silo Program.. Take advantage of Early Delivery Terms.

York Co.'s Womens' Committee plans public relations events

YORK, Pa. - The Women's Committee of the York County Farmers' Association set priorities, outlined goals, and budgeted for a full year of activities this month, according to Phyllis Gross, Manchester R2, chairman of the group.

With the appointment of Carolyn Rutter, York, to the political education program for the county, the women are stepping into carrying out their number one goal of legislation education and support of Pennsylvania Farmers' Association policy.

Public relations ranks second on their slate of action with a March 18 and 19 National Agriculture Day exhibit at the York Mall the first in a line of events. Women from all commodity lines will tell the farmers' story in static and live presentations with special story times for children, a color film of American agriculture by Jerry Litton, and special tributes to York County Farmers.

Other public relations affairs will include some farm-city weekends with down on the farm open houses, floats in big community parades, exhibits at fairs and whatever else catches the imagination of members.

Member education of P.F.A. functions and services will be fostered through the organization's monthly newsletter, Agri-Journal, by telephoning when needed, and by an annual Spring meeting sponsored by the Board of Directors.

Evaluation of the welfare system as it functions in York County will be the project of Joyce Bupp, Seven Valleys R2, and Ethel Gross, Manchester R2, before any committments will be made by the group.

Although a specific program on farm health and safety will not be institued this year by the committee, there will be safety features in Agri-Journal for those interested.

The committee is presently seeking to design a logo and banner for the association to display whenever and wherever it participates in events. Ideas from members will be welcomed by Gail McPherson, New Park.

A Ladies' Day will be conducted within the near future.

Energy Tips

Almost 15 per cent of the energy used in the home is used to heat water. Every time you open the door to the oven, the temperature drops from 25 to 50 degrees If you have an electric range, cut your time five minutes and let the reserve oven heat continue to cook your food.

Grange sponsors sewing contest

HARRISBURG, Pa. - The Pennsylvania State Grange's annual sewing contest, with five classes of competition this year instead of four as last year, opened February 1.

The contest is open to men and women, and to youngsters 10 years old or older, according to Mrs. Leroy Hoover, of Roaring Spring, Blair County, who is director of women's activities for the State Grange. Grange members, and nonmembers sponsored by Grangers are eligible to enter the competition, Mrs. Hoover said. The contest closes April 30.

The five classes in this year's contest are:

Class A, women's garments - Any type coat, dress, suit or pantsuit made for a female 18 years of age or older for self or another person.

Class B, boys, girls and teen garments - any type dress, suit or pantsuit, jumper and blouse, skirt and blouse, shirt and pants made by a contestant 10 to 17 years old for self or another person of the same age group.

Class C, children's clothes - any type garment made for someone else 10 years of age and under.

Class D, teen clothes - any type garment made by a contestant 18 years of age or older for someone else between the ages of 11 and 17 years.

Class E, men's garments - any type sport coat, shirt and pants, or suit made for a male 18 years of age and over for self or another person.

The broader range of categories is expected to stimulate increased interest in this year's contest and more entries than in the past, Mrs. Hoover said. Last year 2848 garments were judged.

In addition to the State and National Grange, sponsors of the contest are: Singer Co., Scovill Manufacturing Co., B. Blumenthal and Co., Inc., Simplicity Pattern Co., William E. Wright Co. and Coats and Clark, Inc.

Dietary Fiber

There's dietary fiber in all plant foods — in the fruit, leaves, stems, roots and seeds This fiber is often called roughage. Dried fruits and nuts,whole grain cereals and flour, as well as fresh fruits and vegetables have fiber, but some foods contain more fiber than others. Whole grains are our best source of fibers, specialists say Fiber helps the intestines get rid of waste by providing bulk and absorbing moisture.

'All about England' planned by Rotary

LITITZ, Pa. - On Saturday, Feb. 12, the Lititz Rotary Club will present its fourth program of the Travel and Adventure Series at 3 and 8 p.m. in the Warwick High School Aucitorium, Lititz.

The program, "All about England", was filmed by Joe Adair, a native of Iowa.

He has lived, worked and traveled in over 40 countries, exploring these places with his camera. He had originally planned a career in education, receiving degrees from Georgetown University and the University of Northern Iowa, but his interest in travel lead him to many other places outside of the classroom.

He has visited Scandanavia, Africa, the Arctic, India, Ethiopia, and many other places. Through his films, he explores the lives of the natives, their daily work and activities, their festivals, their dreams, and their aspirations.

In "All About England", Adair brings his audience to the small country and takes them to all the well-known places, as well as some that are new to many.

His film includes London, with the double-decker buses and bobbies. He explores Piccadilly, Penzance, Salisbury, Canterbury, and the English Riveria.

He studies English history and humor, including the home of Robin Hood, and the home of Shakespeare. The exciting royal history of King Arthur and of Queen Elizabeth is also presented in his film.

The bustling cities and the quiet villages provide a contrast for the lifestyles of England's natives.

Anyone interested in attending the presentation can purchase tickets at the door the night of the show.

have a nice weekend...

Say hello to a neighbor

IMPORTANT NOTICE

FOR PP&L CUSTOMERS

The coldest winter in thirty years has created an unprecendented natural disaster with hardships much like those suffered from the Agnes flood in 1972. Fuel shortages have resulted requiring emergency conservation measures, including industrial shut-downs with temporary loss of employment for thousands of our customers.

At the same time, the record-breaking cold weather has produced significantly higher-than-normal heating and electric bills.

PP&L recognizes that some of its customers may find it difficult to pay their most recent electric bills in full by the date shown on their bills.

If you have a serious temporary hardship caused by the recent cold weather, PP&L will work out a payment plan with you to fit your individual situation.

If you need this special assistance at this time, please call PP&L at the number listed in your telephone directory under Pennsylvania Power & Light Company.

PENNSYLVANIA POWER AND LIGHT COMPANY

My Thoughts

By JOANNE SPAHR

By JOANNE SPAHR

I never thought that it would happen. Never, in a million years. From the time I was small, I remember growing up with barn cats and dogs, loving them, and watching them go through periods of sickness and sometimes death with never so much as a call to the vet for advice. I was the one who always wanted to get them shots and buy them medicine, but I had to learn that in the barn it was the survival of the fittest, and that was that. Oh, sometimes they'd get a shot of whiskey if they were lucky, but mostly, they just had to get over what was ailing them with their own natural defenses.

So, after 22 years of thinking this one way, imagine my amazement to walk into the kitchen one day and hear this conservation between my father and the vet: "Doc, it's our Siamese cat. He's slobbering so bad; do you think something's wrong with him? (Silence) No, nothing else seems to be wrong - he eats his food and acts just like always, it's just that he slobbers so bad."

In a short time the conversation was over and the verdict was in - the cat's mouth was probably infected by a wound he'd received while playing with a pin. So, said the vet, we had to take a cotton swab and wash his mouth out with Listerine, and if he didn't get better, we had to take him into the office for a check-up.

Amazing. Three grown people hanging on for dear life to a cat who is screaming, and squirming, and clawing, and biting while my father washes his mouth out with Listerine. Dad was smart, he was wearing heavy-duty gloves.

After we were all done, the three of us just looked at each other with silly expressions on our faces and laughed the embarrassment away. The things we do for that Siamese house cat are sometimes beyond our own belief. The cat drools and we get all upset, the cat wants to eat and we stop what we're doing to feed him, the cat wants in or out and we open the door - and, it's not like a dog either, because the cat has a litter pan. So, whatever we do is simply fulfilling all the cat's whims. Crazy.

I wonder what would happen if I'd start drooling? Probably be told to go to the barn if I wanted to act like an animal. Yes, well, that's life

CUT FUEL COSTS

Future Homemakers of America

They're not just cookie bakers!

It's FHA Week

By JOANNE SPAHR
MILLERSVILLE, Pa. -

Question: The Future Homemakers of America is an organization of girls devoted to cooking and sewing. True or False.

Answer: FALSE! And, don't let the senior chapter of the Penn Manor FHA catch you saying that it's true.

"We're not just a bunch of cookie bakers like everybody thinks we are," proclaimed four representatives of the above mentioned organization in defense of the FHA.

Cindy Hess, the 16-year-old daughter of Paul Hess, Conestoga R2; Sue Raftovich, the daughter of Mr. and Mrs. Bernard Raftovich, Holtwood R2; Nancy Fry, the daughter of Mr. and Mrs. W. Ben Fry, 65 Oakridge Drive, Lancaster; and Renee Groff, the daughter of Mr. and Mrs. Robert Groff, Lancaster R6, were all assembled to dispel some old wives tales about FHA in honor of "FHA Week" which begins Monday.

"We really don't just bake and sew," re-emphasized Renee. To this Cindy added that only one project the group will be doing all year involves baking.

"And, that's the countywide bake sale for the March of Dimes," she pointed out. So, if it hadn't been for the charity fundraising in which the group wanted to get involved, they might never have set foot in a kitchen on the organization's behalf all year.

"Another thing," noted Cindy, who is the president of Penn Manor's senior chapter, "Guys can be members in FHA because it's for 'homemakers', and it takes two to make a home."

"And, besides," added Sue, a second later, girls can be members of FFA, so guys can be members of FHA." Of course, the girls all noted, guys think the only thing the FHA'ers do is cook and sew, so they don't want to join. So, its time to set everybody straight as far as they are concerned.

But, as is usually the case, the job of saying what the organization is not is a lot easier than saying what it is.

"It's really pretty complicated," said Cindy. In essence, FHA is a program through which the members come to know themselves and their community through projects and interaction.

The purposes of the organization as outlined in the FHA manual are: 1. To provide opportunities for self-development and preparation for family and community living and for employment; 2. To strengthen the function of the family as a basic unit of society; 3. To encourage democracy through cooperative action in the home and community; 4. To encourage individual and group involvement in helping achieve worldwide brotherhood; 5. To institute programs promoting greater understanding between youth and adults; 6. To provide opportunities for decision making and for assuming responsibility; 7. To become aware of the multiple roles of men and women in today's society; 8. To develop interest in home economics, home economics careers, and related occupations.

Another, and perhaps better, way to explain exactly what the group does is to describe some of the Penn Manor projects and the degrees the girls earn.

"Our first project was a Thanksgiving food basket for a needy family in the community," said Cindy. The money for the turkey came from the group's treasury but the rest of the food on the menu came from donations which the girls, themselves, brought in.

"That project helped us to see that there are more people in our community who aren't as fortunate as we are," explained Renee.

Talking about the group's second project brought a lot of giggles from them.

"That second project was the Farm Show," laughed reddish-blond-haired Cindy. "We made a window exhibit."

"I guess you heard about it," chuckled Sue, "we took eighth place." There were only nine placings in the competition, all told. But, not a group to be defeated, the girls say that there's almost no place they can go but up, so they will definitely be taking another window exhibit to the Farm Show next year.

Although it only took eighth place, the concept of the window exhibit was a subject pertinent to today's society. It was entitled, "Follow the litre," and explained the metric system in comparison to our present system of measures.

Besides serving as a lesson on converting the two systems, this project helped the girls to realize that the new system is really coming.

While at Farm Show, the girls also attended the Winter meeting held at the Forum in Harrisburg. At that time, the various degrees were handed out.

The first degree a girl can receive in the FHA is the Key Degree. This degree is involved with "getting to know oneself."

"You look toward a goal that is going to help you improve yourself, and when you've reached it, you fill out a form telling about your experiences," says Sue.

As an example of a Key Degree project, Sue and Cindy explained that they observed in a home for the elderly to learn about the conditions and feelings with which the elderly must cope.

"We learned that they

They're not

[Continued from Page 52]

really need love, and we learned how they feel about not having a home of their own," explained Cindy.

A second degree that the Future Homemakers are able to receive is the Scroll Degree. This is subtitled, "Getting to know your community," and the project can be any community service the girl wants to perform.

A third degree is the Torch Degree, otherwise known as a preparation for adulthood. Cindy, who has received both the Key and Scroll degrees is now in the finishing stages of her Torch Degree. For her project, she is milking her father's cows, and plans to incorporate how this experience is helping to prepare her for her future career.

"I hope to go into farming," she says, "because it's what I've always been around, and I'd like to help my father."

After the girls have received all three chapter degrees, they are eligible to compete for state recognition. This certificate is given away at the Winter meeting in Harrisburg. This award is special because "it shows you've grown in all three ways and that your teachers have recommended you," the girls explain.

Now that the winter meeting is over, the girls are looking forward to their Spring activities. In March they have their three-day Spring convention in Pittsburgh, and in April, they will be taking part in the Walkathon for the March of Dimes. Two months later, in May, they will again be busy when they take part in the March of Dimes bake sale and hold their annual banquet.

At the banquet, the girls receive their chapter degrees. And, for fun, they are hoping to twist the arms of the FFA members to serving the food.

"The FFA helps us out a lot," says Cindy. "They helped us with our window exhibit, and they give us support at other times. They're always there when we need them," she adds.

Before the Spring activities take place, the girls will be having their one fund raising activity for the money that goes into their treasury. They've chosen the old favorite - a sub sale, and are looking forward to it.

Although the FHA is set up very closely to FFA with regional and state divisions, there is a major difference in the two. The FHA is, at this point, still at a "club" status and is not integrated into the classroom. Patricia Heffner, who is the advisor of Penn Manor's senior chapter, points out, however, that the state organization is trying to implement it's use in the classroom. But, for the time being, the Penn Manor group meets during the last period of the day on Wednesdays, and they have a "rap session" once a month in a member's home. The junior chapter is also active and is under the direction of Tina Hiller.

When asked what the organization has done for them, each girl responded with individualized, personal answers. But, generally, the basic answer was summed up by Nancy who said, "It helps you get to know yourself better, and it helps you get to know others. And, when you help other people it really makes you realize that there are people who aren't as fortunate as you and who need help." Now, try to answer this question:

FHA is an organization made up of girls devoted to sewing and baking cookies - True or False. . .

Four members of the Penn Manor senior FHA chapter rose with their advisor, Patricia Heffner. The girls are: (front, left to right) Nancy Fry and Sue Raftovich, (back, left to right) Cindy Hess, Miss Heffner, and Renee Groff.

ABS has SNF sire summary

DEFOREST, Wis. - American Breeders Service, headquartered here, has come up with a sire summary based on solids-non fat, (SNF).

Forty-two current and former ABS Holstein bulls were ranked by SNF production of their daughters in the first ABS SNF Sire Summary. First lactation SNF records of more than 8,000 cows were included in the analysis.

Daughters of ABS bulls were compared with their herdmates, calving for the first time in the same year and season, for SNF per cent. From these comparisons an Estimated Daughter Superiority (eds) for SNF per cent was computed for each bull.

Predicted Difference (PD) for milk production from United States Department of Agriculture Sire Summaries was combined with SNF per cent data to develop EDS for total SNF production for each bull. Although results for some bulls are surprising, the most important findings agree completely with expected results.

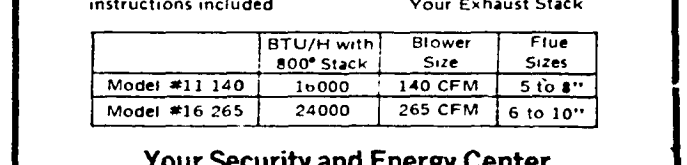
1. There are definite differences between bulls in their ability to sire daughters that produce milk containing large amounts or a high percent of SNF.

2. Bulls with high PD for butterfat test tend to have high EDS for SNF per cent. However, the correlation is not perfect. There are notable exceptions, and they occur quite frequently.

3. PD for milk production and EDS for SNF per cent are negatively correlated, thus, somewhat antagonistic.

4. It is possible to find sires with high PD for milk production and positive EDS for SNF per cent.

5. PD for milk production and EDS for total SNF production are highly correlated.



According to a study by the F.B.I., the most probable months for burglaries are December, January, and February.

Hempfield home economics students discuss award-winning projects

Dee Garren's tunic dress didn't take her long to make, but it scored very well at Farm Show.

By JOANNE SPAHR

LANDISVILLE, Pa. - If taking one top placing at the Farm Show is a big event (which it is), what is it like to take 50 or more first, second, or third places? In that case, it's exciting for the 50 or so girls involved, especially if they all come from one high school and all know each other from home economics classes.

Hempfield High School is such a school. This year the 80 entries from the home ec department swept nearly all the school classes at the Farm Show, and came up with more than 50 winners.

A group of 11 of the girls who were part of the "Hempfield 50" gathered one day last week to discuss their Farm Show experiences with Lancaster Farming.

When the girls were asked who offered the most encouragement for them to get involved with the Farm Show competition, all eyes turned to their home economics teacher, Mrs. Barbara Shenk, who is known for urging her classes to get involved. She usually has a high rate of success as was evidenced by this year's winnings.

"I didn't even think my outfit was that good," commented one girl. "But, Mrs. Shenk wanted me to enter, so I did." It turned out that she received a first place on her garment as a result.

Winning at the Farm Show is something each girl can appreciate, as is getting a field day from school to see how her entry made out. To be able to submit an entry, in the school division the rules at Farm Show stipulate that each must have been made in school or as part of a guided experience by a pupil enrolled in a home economics department under the guidance of a home ec teacher.

There were specific categories under which projects could be entered, and if a garment or type of food was not of the right specifications, it couldn't be entered. As a result, many of the girls quickly tried something new just to enter under the different divisions, and surprisingly enough, many took top prizes with these first attempts.

For instance, Debbie Herr, the daughter of Mr. and Mrs. Carl Haberstroh, 3635 Horizon Drive, Lancaster, decided that she wanted to enter baked goods as well as clothing, so she picked out a recipe that sounded good, and at the last minute baked it and entered it. It turned out that she did pretty well, although she lost a little sleep when she stayed up late preparing her entry the night before.

Her clothing entry was a unique doublefaced wool unlined wrap coat. Although she claims the coat was easy, it took nearly all hand sewing except for the side seams, shoulder seams, and hood.

"My fingers got sore from the handsewing," she admits.

Debbie probably will enter more things next year, because she found it really exciting to win a first place.

Nancy Erb, the daughter of Mr. and Mrs. J. Roger Erb, 2875 Graystone Road, East Petersburg, is another

[Continued from Page 54]

person who took a first placing with a project that was a trial attempt - a macrame wall hanging.

"I got a book and decided that I wanted to try every stitch in it," she says, "so with my own pattern, I made this wall hanging." She and Mrs. Shenk agree that her macrame took the top prize because of the assortment of stitches, and also because it was so tightly constructed.

"She had some pretty stiff competition," explained Mrs. Shenk. "We got up there, and another entry was a macramed hammock - a really huge and useful project." Explaining the situation further, Mrs. Shenk said, "So, naturally, everybody expected that to take first place, but Nancy's did, instead."

Nancy also entered a pillow which was Florentine embroidery and needlepoint on canvas. Both projects were made during the summer.

Diane Harnly, the daughter of Mr. and Mrs. Raymond Harnley, Manheim R1, won awards for both her embroidery and her sewing talents. Diane entered a dress, a three-piece outfit, and two embroidered tops.

Diane's embroidery is so delicate and the stitches are so fine and perfect that is seems impossible for hands to have created her works of art. She's been embroidering since she was in eighth grade and says her stitches are now so fine that she can only work for 10 to 15 minutes before her eyes bother her.

"I wear my father's glasses, now," she grins.

But, what is the most amazing about Diane's work is that she never uses a pattern - instead she creates all her patterns, herself, including the colors and stitches she uses.

"I never look at kits to see what they do," she says. Instead, she refers to art books and other such sources of reference.

For instance, she is now working on a piece that is oriental in nature, so she took books out from the library on oriental art to give herself ideas on the type of embroidery she will use.

For those beginners who look at Diane with envy, she says that only practice helps - the more you embroider, the finer your stitches will become.

Sue Givler, the daughter of Mr. and Mrs. Henry Givler, 3112 Cochran Drive, Lancaster, also has a knack with her hands. This is evidenced by a quilted and appliqued pillow she entered in competition. Sue had never quilted or appliqued prior to making the pillow, and took on the project simply because the applique was a strawberry.

"My aunt loves strawberries," she says, so she made it for her as a Christmas gift. So far, the aunt has not seen the gift, but as soon as all the pictures of it have been taken for various articles, she will be receiving her overdue gift.

"I give away nearly everything that I make," says Sue. I have only one rug at home that I kept for myself."

Sue's been entering at Farm Show for three years now. The first year she entered a hooked rug which took a third, the second year she entered a braided rug which won a first place, and now this year she entered her pillow. She also entered a shirt and a tie this year but didn't do as well with those entries as she did with her

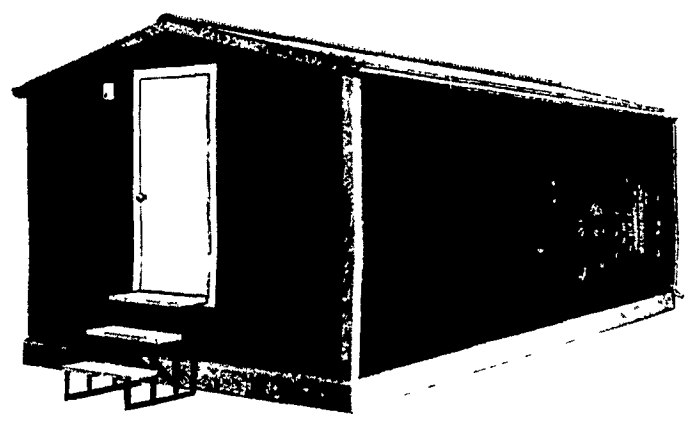
RAISING CALVES A PROBLEM?

STOP LOSSES. HOUSE THEM IN A CASTLE.

AGSTAR CALF CASTLE



... the new, economical environment that can bring out your calves' bred-in potential

Now, at far less than you'd pay for an ordinary structure, you can give your calves *royal* treatment The new AGSTAR Calf Castle nursery building gets your calves into the kind of comfortable living conditions they thrive on, the "tender loving care" they need to reach their full bred-in potential.

It's a controlled and completely protected environment — the one important tool for calf raising that lets you utilize your good management abilities to the fullest.

The AGSTAR Calf Castle is a factory-built and fully assembled building, including pens, waterers and all When it's delivered to you, it's ready to go to work. Just hook it up to electricity and water supply.. then put in the calves

Suddenly your job becomes a lot easier and a lot more rewarding

And, because of the efficiency of factory assembly and mass production, cost is surprisingly low. We'll be happy to have a representative call with prices and full details, or we'll mail you information

(1) Building comes complete with ventilation system (2) slotted floors (3) stalls (4) glass-lined water heater (5) sink and cabinet (6) electric or LP Gas Heater (7) modulator to control fan speed (8) fully insulated Fiberglas® covered walls, and other features

Hempfield High School home economics students that took first placings in their respective categories at the Farm Show are (left to right) June Grube, Debbie Herr, Diane Harnly, Kim Albright, Shari Andrews, and Diane Groff.

John W. Benjamin, 973 Nissley Road, Lancaster.

Kathy's top placing coffee cake was a real stand-out at the Farm Show. The recipe is a raised coffe cake that is rolled into separate pieces which are layered on top of each other in a pan to rise and then to bake. As a result, the cake appears convoluted, and each separately raised piece breaks apart very easily from the finished product.

"Kathy won, I think, because her cake looked the best, and, of course, tasted good," said Mrs. Shenk.

Kathy's mother encouraged her to enter this particular cake because her mother makes it and the family loves it.

Under the various clothing categories, June Grube, the daughter of Mr. and Mrs. Weidler Grube, Manheim R7, who is active in 4-H

[Continued on Page 58]

Hempfield

[Continued from Page 55]

pillow. Next year she has hopes of making a quilt.

"I just like doing things with my hands," she says. She also enjoys the Farm Show, in general. This year she just missed seeing the first calf being born, which was a real disappointment for her.

Sue also encouraged her friend, Cindy Eckman, to enter. Cindy is the daughter of Mr. and Mrs. Parke Eckman, 173 College Ave., Mountville.

Cindy's entry was in the foods division.

"I wasn't going to enter what I did," Cindy explains. I tried to make the other recipe three or more times and it flopped every time, so I just made this bread the night before and entered it." Again, as was typical with many of the girls who tried some new things, Cindy took a first place.

"I couldn't believe it when Sue called me to say I won," says Cindy.

Another Hempfield student to submit an entry under the foods division was Kathy Benjamin. Kathy is the daughter of Mr. and Mrs.

Martin LIMESTONE

Apply lime on frozen ground

Lime can be applied almost anytime however winter months are ideal, because the ground is firm and the freezing and thawing action helps to disseminate the lime in the soil

Eliminate daily hauling with a Badger Manure System

Manure handling systems built around a Badger Barn Cleaner and Transfer Pump eliminate the daily chore of hauling manure. You handle and store manure the way that's best for your own milking operation. You can convert stanchion barns with barn cleaners to liquid or semi-solid manure systems by installing a Badger Transfer Pump. In a liquid system, the manure is pumped underground to a storage basin. Or if you prefer to use bedding and stack manure, the Transfer Pump delivers to a stacking slab and builds the stack from the bottom.

Virginville Grange holds meeting, hands out certificates to members

VIRGINVILLE, Pa. - Six new members were welcomed at the January 19 meeting of the Virginville Grange. Daniel and Nancy Letterman, Carol, Louise, Brenda and William Uslin were the six to participate in their first meeting at the January get-together.

During the business session, Keith and Suzanne Treichler were appointed chairpersons in charge of the organization's float for the fireman's parade this summer.

Guest speaker for the meeting was Roy Merkel. His topic was the Kutztown Medical Center.

The youth of the organization will hold a Sweetheart Ball on Friday, February 11, from 8 to 11 p.m. at the Grange Hall. Tickets will be $2.50 and will include the refreshments for the evening.

Also included in the January 19th meeting was the presentation of membership pins and certificates. Those to receive the special awards were: David Moll Sr., and Edna Koller for 55 years of membership; Dorothy Miller, Joyce Miller, and Daniel Manmiller for recruiting four or more members this year; Feryl Treichler, Curtis Seidel, P. William Stitzel for Grange builder pins; Feryl Treichler, Jane Hill, Mary Sonon, Joyce Miller, Curtis Seidel, Mildred Wessner, Marlin Deitrich, Addie Bower, Morris Snyder, and Dorothy Miller for five or more new members; Jane Treichler, Helen Sawyer, Dorothy Rienert, Annetta Merkel, Joyce Dietrich, James Gift, Gladys Kieffer, Helen Kurtz, Ernest Miller, Fern Greenawalt, Feryl Treichler, Jean Dietrich, Jane Hill, Mary Sonon, Joyce Miller, Curtis Seidel, Ruth Baver, Mildred Wessner, Leroy Schollenberger, Marlin Dietrich, Darlene Baver, Faye Miller, Blanore Hill, P. William Stitzel, Addie Bower, Nevin Hill, Mabel Miller, Steven Mohn, Howard Hill, Esther Stitzel, Morris Snyder, Cherie Manmiller, Daniel Manmiller, Harriet Miller, Eugene Schlegel, Mark Gehringer, and Dorothy Miller;

Perfect attendance records for 1976 went to Alice Balthaser, Anna Balthaser, Catherine Balthaser, Paul Balthaser, Mabel Bausher, Paul Bausher, Stella Baver, Percy Baver, Helen Epting, Mabel Gift, James Gift, Sandra Hill, Jane Hill, Doris Hill, Elanore Hill, Nevin Hill, Florence Seidel, Curtis Seidel, Esther Stitzel, P. William Stitzel, Richard Kurtz, Helen Kurtz, Christine Mengel, Lillian Mengel, Harriet Miller, Paul H. Miller, Mabel Miller, Joyce Miller, Arlan Seidel, Mary Seidel, Eugene Schlegel, John Sonon, Mary Sonon, Lawrence Sunday, Eva Treichler, Asher Treichler, Walter Wessner, and Mildred Wessner. Mildred Wessner was also given special recognition for bringing in 40 new members.

The strawberry pillow that Sue Givler has in her left hand is the first attempt she ever made at appliquing or quilting a pillow. That didn't stop her, however, from taking a first place prize with it at the Farm Show. The pillow she has in her right hand, as well as the macrame, are the award-winning crafts of Nancy Erb.

Hempfield

[Continued from Page 56]

sewing as well as Lancaster County 4-H Council, took a first with her wool skirt and a dress. June makes nearly all her clothing because she likes the individuality she is able to attain.

Kim Albright, the daughter of Mr. and Mrs. Ronald Albright, 663 Gentry Drive, Lancaster, also entered a garment. Kim's was a three-piece Spring-green tailored pantsuit.

Diane Groff, Shari Andrews, and Dee Garren all exhibited first place garments. Diane, who is the daughter of Mr. and Mrs. Ellis Groff, Mountville, entered a pair of gaucho pants; Shari, the daughter of Mr. and Mrs. Dale Andrews, 6300 Jackson Drive, East Petersburg, entered a corduroy blazer to which she is now adding a pair of pants; and Dee, the daughter of Mr. and Mrs. Frank Garren, 3135 Sandstone Drive, Lancaster, took a first with a tunic dress she entered.

Dee had another story similar to many of the other girls'. She had worked for many, many hours on other pieces of clothing which she entered, but had taken a short amount of time on her tunic dress. She, of course, did not do as well with the garments she had worked the hardest on, but took a first with her tunic.

When asked the key to successful sewing, Dee answered, "It's the little things like cutting your thread, trimming your seams, and other small things that go into a well-made outfit. Mrs. Shenk is always finding stuff like that and showing us how to change it." Once Mrs Shenk sets the example, the girls soon learn to follow her pattern and sew with the little things in mind.

A list of the top ranking girls from Hempfield follows

FOODS

First prize - Cindy Eckman, Kathy Benjamin; Second prize - Denise Herr, Jane Stoppard, and Mary Heth; Third Prize - Debbie Herr, Nancy Erb; Fourth prize - Julie Smith, Jim Kreiser; Fifth prize - Patsy Wickenheiser, Nancy Erb.

HOME RELATED ARTS

First prize - Nancy Erb, Sue Givler; Fifth prize - Darlene Burnette.

SEWING

First prize - Kim Albright, Karen Lyter, Marilyn Kurey, Diane Harnly, Jeanne Sawicki, Martha Neff, Cathy Brubaker, Debbie Herr, Diane Groff, Shari Andrews, June Grube, Dee Garren; Second prize - Jane Garber, Martha Neff, Joyce Sawicki, Kay Robertshaw, Joyce Sawicki, Mary Schmitt, Cyndi Butzer; Third prize - Dee Garren, Darlene Burnette, Donna Wiegand, Sandra Purcell, Kay Harshman, Diane Harnley, Robin Spiese; Fourth prize - Sue Givler, Tammy Adams, Julie Sanders, Cyndi Butzer, Marilyn Kurey, Jeanne Sawicki, Karen Lyter; Fifth prize - Mary Schmitt.

Kathy, Cindy, and Debbie also agreed to give Lancaster Farming their award-winning recipes which follow.

KATHY BENJAMIN'S HUNGARIAN COFFEE CAKE

1 cup lukewarm milk
¼ cup sugar
1 teaspoon salt
1 cake compressed yeast
1 egg
¼ cup soft shortening
3-½ to 3-¾ cups flour
¾ cup sugar
½ cup butter (melted)
1 teaspoon cinnamon
½ cup finely chopped pecans

Mix together milk, ¼ cup sugar and salt. Crumble yeast into mixture. Stir until dissolved. Stir in egg, shortening Mix in flour. Knead; let dough rise in warm, draftless place until doubled in bulk (1-½ hours); punch dough down; let rise again until double in bulk (½ hour). Next, roll pieces of dough the shape and size of a walnut in mixture of ½ cup butter (melted) Then roll in ¾ cup sugar, cinnamon and pecans

Place one layer of balls so they barely touch in well-greased 9 tube pan. Sprinkle a few raisins. Add another layer of balls; sprinkle more raisins, pressing them slightly. Let rise 45 minutes. Bake 35 to 40 minutes at 375 degrees F. Loosen from pan. Invert pan so butter-sugar mixture runs down over cake.

CINDY ECKMAN'S PUMPKIN BREAD

Two-thirds cup shortening
2 and two-thirds cups sugar
4 eggs
1 can (1 pound) pumpkin
Two-thirds cup water
3 and one-third cups all-purpose flour
2 teaspoons soda
1-½ teaspoons salt
½ teaspoon baking powder
1 teaspoon cinnamon
1 teaspoon cloves
Two-thirds cup chopped nuts

Heat oven to 350 degrees F. Grease two 9 x 5 x 3 inch loaf pans or three 8-½ x 4-½ x 2-½ inch loaf pans. In large bowl cream shortening and sugar until fluffy. Stir in eggs, pumpkin, and water. Blend in flour, soda, salt, baking powder, cinnamon and cloves. Stir in nuts.

Pour in pans. Bake 70 minutes or until wooden pick inserted in center comes out clean.

FANNED FIG CAKE

Makes 2 coffee cakes

½ cup milk
½ cup sugar
1½ teaspoons salt
¼ cup (½ stick) margarine
½ cup warm water
2 packages active dry yeast
2 eggs, beaten
4½ to 5½ cups unsifted flour
1 egg yolk
2 tablespoons milk

Scald ½ cup milk; stir in sugar, salt and margarine. Cool to lukewarm. Measure warm water into large warm bowl. Sprinkle in yeast; stir until dissolved. Add lukewarm milk mixture, eggs and three cups flour. Beat until smooth. Stir in enough additional flour to make a stiff dough. Turn out onto lightly floured board, knead until smooth and elastic, about eight to 10 minutes. Place in greased bowl, turning to grease top. Cover; let rise in warm place, free from draft, until doubled in bulk, about one hour.

Meanwhile prepare Fig Filling and Crumb Topping.

Punch dough down; turn out onto lightly floured board. Divide dough in half. Roll each half into an oblong, 9 x 18 inches. Spread ½ of prepared filling on two-thirds of length of dough. Fold unspread dough over ½ of spread dough. Then fold again, making 3 layers of dough and two layers of filling. Seal edges. Place on greased baking sheets. Using scissors, cut eight strips, along length of rectangle to within one inch of opposite side. Separate strips slightly and twist so that filling shows. Cover; let rise in warm place, free from draft, until double in bulk, about one hour.

Brush cakes with egg yolk beaten with two tablespoons milk. Sprinkle with prepared topping. Bake at 350 degrees F. about 20 minutes, or until done. Remove from baking sheets and cool on wire racks.

Fig Filling: In a saucepan combine one cup chopped dried figs, ¼ cup firmly-packed brown sugar, two-thirds cup water, and one tablespoon lemon juice. Bring to a boil over medium heat, stirring. Continue cooking until mixture is thick enough to spread. Remove from heat; stir in ½ cup chopped pecans.

Crumb Topping: In a small bowl combine ¼ cup unsifted flour, two tablespoons sugar and ½ teaspoon ground cinnamon. Using a pastry cutter or two knives, cut in two tablespoons margarine until mixture resembles coarse meal.

American Angus Auxiliary offering $3000 in scholarships

ST. JOSEPH, Mo. - College scholarships totalling $3000 will be awarded this Summer to three girls and three boys who have an active interest in Angus cattle. The awards are made each year by the American Angus Auxiliary to outstanding 4-H or FFA members on a competitive basis, reports Mrs. Hump Halsey, Mulhall, Okla., president of the national Angus women's organization.

The individual scholarships amount to $750 for each first place girl and boy, $450 for second place and $300 for third. The highest placing girl will reign as Miss American Angus and will appear at numerous national Angus events and shows. The first place boy winner will be her escort.

Any 4-H or FFA member, who is a graduating high school senior with an interest in Angus cattle, is eligible to apply Each state or regional Angus Auxiliary in the United States may present one girl applicant and one boy applicant for consideration The scholarships are not limited to any course of higher education, but each applicant must submit, on the official application form, records of showing and judging Angus cattle, 4-H, FFA and civic activities and a short biography.

Winners will be announced at the All American Angus Futurity in Louisville, Ky. in August. Application may be made through state or regional Angus Auxiliaries. Contact the national Angus Scholarship chairman, Mrs. Jamie Stevenson, Hobson, Mont. 59452, for the names and addresses of state chairmen.

The American Angus Auxiliary has provided a scholarship program for 18 years. The first award was made to one girl in the amount of $300.

Rachel Breck of Hedgerows Farms, West Cornwall, Conn., has donated this year's scholarship heifer. The animal will be auctioned at the Futurity Show in Louisville with the proceeds going into the scholarship fund to be used for future needs

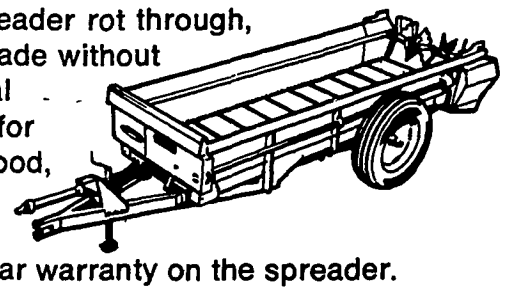
New Idea's Manure Spreaders

New Idea warranty covers wood and labor. (It even pays the freight!)

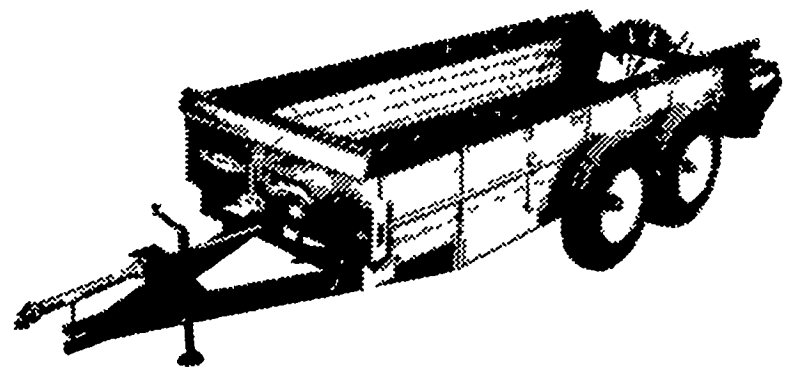
There's no double-talk with this warranty. In the unlikely event that any of the wood components in your New Idea Manure Spreader rot through, replacement will be made without cost to you, the original purchaser. No charge for labor, no charge for wood, no charge for freight. And this is in addition to the New Idea full year warranty on the spreader.



Wood lasts longer!
Can't rust!

New Idea's Manure Spreaders

10-ton loads mean fewer trips.



There's no need to spread as often as you do. Now you can spread 10 tons per trip — with New Idea's new 365-bushel manure spreader. You won't believe the capacity of this new heavyweight.

New Idea's 10-ton spreader is as dependable and rugged as all New Idea spreaders. And it's backed by the Full Year Factory Warranty. The extra heavy-duty conveyor chain is guaranteed for 2 years. Plus the famous New Idea Warranty on Wood. And, this spreader not only has a Belleville spring-type slip clutch that protects the power train—it also features an exclusive "Conveyor Overload Protection System."

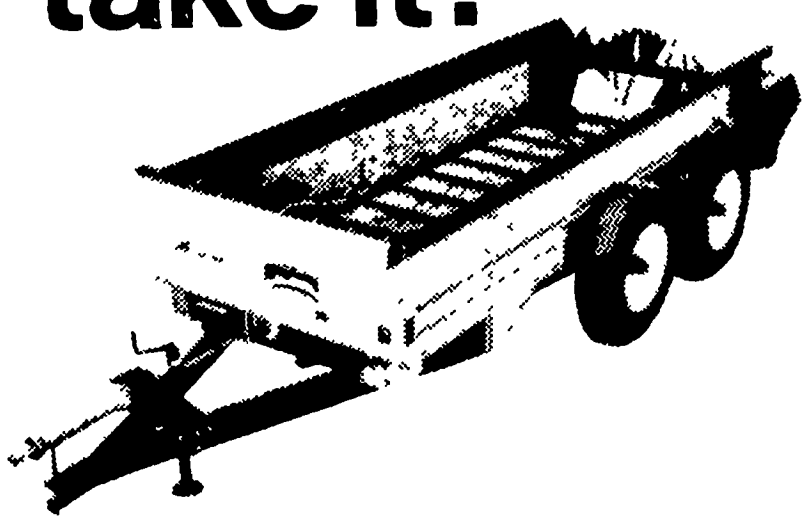
Maybe now's the time to trade up to New Idea's new 10-ton — and save yourself some field trips.

AVCO NEW IDEA FARM EQUIPMENT

We make your job a little easier.

New Idea's Manure Spreaders

Wood can take it!



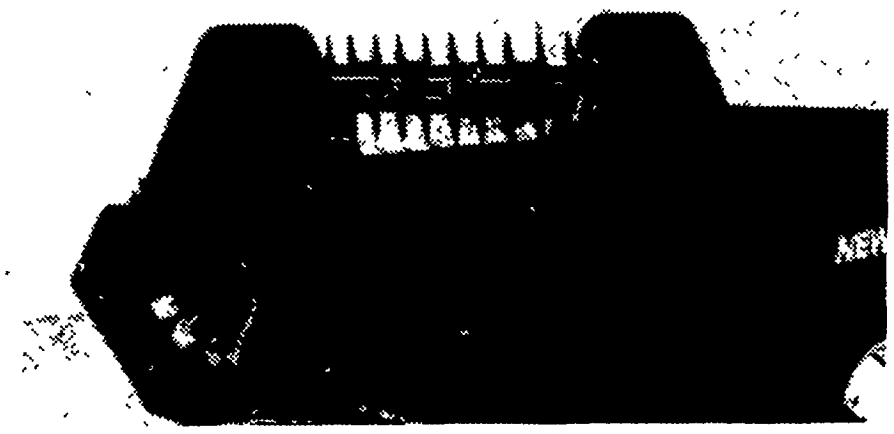
That's why they use Penta treated clear yellow pine in every New idea Spreader box.

Every New Idea spreader in the line has wood sides, bottom and end . . . because wood can take it. Wood battles against damage. Wood won't bend, can't rust . . . and fights corrosive acids better than any other spreader box material.

Warranty On Wood That's why only New Idea says, "In the unlikely event that any of the wood components in your New Idea Manure Spreader rot through, Avco New Idea will make replacement, no charge. Replacement will be made without cost to you, the original purchaser, at your nearby New Idea dealer . . . no charge for wood, no charge for labor or freight."

New Idea's Manure Spreaders

Upper cylinder optional on any new New Idea Single Beater Spreader.



Levels load... improves spread pattern.

Thinking of a new spreader? Think about a New Idea Single Beater. With an optional upper cylinder, it's the very last word in leveling out heaped loads and gives you a better spread pattern. Available on any of the 5 sizes of New Idea Single Beaters—from 116 to 318 bushels. You can use the optional hydraulic endgate with the upper cylinder in place!

SEE DEALERS ON OPPOSITE PAGE.

Farm Women Societies

Berks Co. Society 5

The January meeting of the Berks County Farm Women Society 5 was held in the home of Mrs. Marlene Sattazahn. The constitution and by-laws were reviewed in a question and answer period among the 17 members and two guests present.

Mrs. Dorothy Moyer gave a report on her participation at the Farm Women Society state convention.

The February meeting will be held on February 28 at the home of Mrs. Sylvia Scharff, Bernville R2. The program will be candy making.

Lancaster Co. Society 15

Lancaster County Society of Farm Women 15 met recently at the Zion United Church of Christ, New Providence. The hostesses were Mrs. Alva Miller, Mrs. Kathryn Horner, Mrs. Anna Hershey, and Mrs. Mildred Smith. The meeting was called to order by the new president Mrs. Dorothy Johnson.

The oldest member of the group, Mrs. Helen Graver, who is 90 years old, was presented with a necklace from the state group. Past president, Mrs. Kathryn Horner, made the presentation. Mrs. Graver also received a personal gift from the new president, Mrs. Johnson.

Members were asked to suggest ideas for the county project for the coming year. Good-Will Industries was suggested.

Mrs. Kathryn Wagner reported that a trip is being planned for late March to "The Three Little Bakers."

The next meeting of the group will be on February 17 at the Union Presbyterian Church. Hostesses will be Bertha Ferguson, Jessie Trimble, Gertrude Weicksel, Colleen Shoemaker, and Evelyn Myer.

Lancaster Co. Society 24

The Lancaster County Society of Farm Women 24 met recently at the home of Mrs. Lynn Smoker, 3419 Harvest Dr., Gordonville. Mrs. Mervin Hoober, president, conducted the business meeting.

Mrs. Shirley Wenger and Mrs. Louetta Hurst gave reports on the Farm Womens State Convention held at the Forum in Harrisburg.

Members rolled bandages for Church World Service during the evening meeting.

The next meeting will be held at the home of Mrs. Jacob Wise beginning at 7:30 p.m. on Wednesday, February 23. Mrs. Mildred Eisemann will speak on the subject of "Self Improvement".

Lancaster Co. Society 27

Lancaster County Society of Farm Women 27 met on January 25 at the home of Mrs. Doris Nissley, Bainbridge R1. Co-hostess for the evening was Mrs. Mary McClenaghan.

Work project had 23 members making 60 valentine favors (from Legg eggs) and 37 wash cloths slippers for two local rest homes.

The business meeting was conducted by the president, Mrs. May Fellenbaum. During that session, reports of the state convention were given.

Delicious refreshments were served by Mrs. Nissley and Mrs. McClenaghan.

Next meeting will be held on February 22, 1977.

Lancaster Co. Society 28

Society of Farm Women 28 met on Thursday, January 27 at 7:30 p.m. at the home of Mrs. Harold Byers, 75 Hillcrest Ave., Strasburg. Mrs. Christ Landis served as co-hostess. Twenty-four members attended.

Mrs. William Harnish, Mrs. J. Robert Hess, and Mrs. John Jacob Bare represented the Society at the state convention in Harrisburg and gave a brief report.

Suggestions for the county project were: Goodwill Industries, a home for delinquent girls, and the Child Development Center.

The Society was again asked to take charge of the sewing division at the Strasburg Community Days in June. Mrs. Harold Rohrer and Mrs. Harry Landis will serve on the committee.

It was voted to donate $10 to United Cerebral Palsy.

Each member was asked to send a card to Terri Fisher, 1601 Lampeter Road, Lampeter, Pa., a nine-year-old victim of Multiple Sclerosis. Mrs. William Harnish and Mrs. Kenneth Kreider are exploring the possibilities of purchasing a television for Terri.

The group made bed pads for the Visiting Nurses Association.

The next meeting will be held at the home of Mrs. Richard Herr on February 24 at 7:30. Mrs. Michael Velevanes will speak on "Village Life and Customs in Greece."

Outstanding employee chosen

Paul Hess Jr., vice president, of Plain and Fancy Egg Ranch, Inc. Elizabethtown, recently announced the selection of Larry Ginder as the outstanding employee of the month for January 1977. His selection was based upon his outstanding job knowledge and performance in all assigned areas of the processing division.

Ginder's attention to detail and thoroughness as a packer machine operator are two of his assets. He worked for the company in a part-time status for several years prior to graduation from Manheim Central High School in June 1976, and has been employed full-time since then. He is the son of Mr. and Mrs. Marlin Ginder, Sunnyside Road, R. 4 Manheim.

M. C. ROTARY SCYTHE NON-STOP MOWING

Does the work of five machines — mower, windrower, conditioner, rake, shredder.

Plant lovers' corner

If you are planning to buy some new houseplants to lend some color to your home this Winter, a few tips on selecting and caring for these plants follow:

—Inspect them carefully before buying.

—Feel the soil or lift the pot to be sure the soil has not dried out.

—Check the buds and reject any with tell-tale brown edges.

—Select plants with plenty of unopened flower buds.

—If the plant comes with a decorative foil or plastic pot wrap, pierce the wrapping on the bottom beneath the pot drain hole so water can run through.

—As you take your new potted plant home, remember it is undergoing a traumatic shock. From the protection of a greenhouse, it's going into fluctuating temperatures, extremes of moisture and humidity, and different light conditions.

—Always use water of room temperature or warmer when watering houseplants.

—Use a hand mister occasionally to increase the humidity.

—Keep temperatures cool to moderate both day and night.

—Give plants plenty of sunlight if the plant needs light.

—Keep plants away from cold drafts.

Cows giving hens run for their money

ANNAPOLIS, Md. - Preliminary figures indicate that for 1976, Maryland's dairy industry may have regained its number one ranking. In recent years, the broiler industry, which is concentrated on the Eastern Shore, has been the leading source of Maryland farm income.

At this point it looks like the broilers hold a slim $500,000 income edge over the cows. For 1976, the sale of 182 million Maryland raised broiler chickens is estimated to have accounted for $166 million in farm income.

Maryland's 143,000 milk cows in 1976 produced 1.65 billion pounds of milk which is estimated to have had a farm sales value of $165.5 million.

In 1975, official figures show that the broiler industry had a farm sales total of $183.8 million to take first place followed by dairy which had farm milk sales worth $145 million.

The reasons for dairy's strong showing is that milk production per cow increased, the size of the state's herd increased slightly and 1976 generally was a strong year for dairy prices. The broiler industry saw its gross sales volume slip an estimated $17.5 million despite the fact the number of broiler chickens produced increased by some two million birds. Broiler prices slipped during the year after a strong beginning and position running as high as five cents per pound of processed chicken.

Considering that an average of 3.5 million chickens are processed per week and the average broiler today weighs four pounds such losses can quickly offset earlier price strengths.

Another factor that may be involved is the fact that in general Marylanders consume the vast portion of the primary dairy products produced in the state while Maryland's broilers are mostly marketed out of state.

It is ironic that while Western Shore Marylanders drink milk from farms within 100 miles, the chicken they eat usually comes from out of state. However, if Marylanders were to consume their state's broiler production they would have to treble their chicken eating because the state produces more than three times its need in broilers. Maryland's dairy production is about equal to the needs of her four million citizens.

'Ag leading the way to a better future' is theme of York agribusiness seminar

By JOYCE BUPP
York Co. Reporter

YORK, Pa. - "Agriculture Leading the Way to a Better Tomorrow" was the theme for the 14th annual York Area Agribusiness Sminar. Held at the Yorktowne Hotel, the event was sponsored jointly by the Penn State Extension Service and the Aea Chamber of Commerce.

Richard McDonnell, an agricultural economist with the Grain and Feed Division of USDA, opened the morning session. His address, "Russian Wheat Agreement," detailed the history of past Soviet grain buying and the purposes of the current U.S. - Soviet five-year grain purchae agreement.

Russian agricultural goals are established in the long-range economic "Five Year Plans." Because large grain-growing areas are subject to severe droughts, at least one of each five years traditionally produces an extremely poor crop. And, usually one in five years can be depended upon to produce a bumper crop, sufficient to feed the population and strengthen somewhat of a reserve.

"The usual reaction to lean years is belt-tightening, frequently in the form of livestock slaughter, causing a decrease in meat consumption," explained McDonnell. "Instead, in 1972, the Soviets chose to import large quantities of grain from outside sources."

McDonnell attributed this change in policy to a new trend in Russian economic problem-solving. Following the Krushchev administration, Kremlin leaders began leaning toward the revitalization of the country's agriculture with the long term goal of improving the diet of the average citizen.

Under the U.S. - Soviet sales agreement, Soviets are required to purchase at least six million tons of feed grains annually. Washington cannot halt these sales unless the supply of grains drops below established minimum levels of 225 million metric tons. The purpose of the agreement is not to limit sales, but to space them out over a period of years, lending more stability to the worldwide price fluctuations.

"These purchases are paid for in cash," McDonnell reassured questioners from the gathered farmers and businessmen. "Part of the 1972 purchases were financed by the C.C.C., but there are laws on the books now preventing such credit sales.

The U.S. government is not directly involved in the actual selling. All agreements are made privately between the Soviet buyers and independent grain corporations. Actual selling price is not widely-advertised information; and even the USDA says it does not know exact rates at which the Russians are buying the grain McDonnell indicated that the Department believes, however, that the sales are being negotiated at market rates.

Under current maritime agreements, the shipping costs must be borne by the buyers; and one-third of the total export tonnage is required to be handled by American shipping.

In answer to questions concerning the oft-repeated rumor that Soviet-bought U.S. grain ended up in other countries, the economist noted that the American government had never found any concrete proof to document that claim.

"It is true that one to five million metric tons of grain are still being exported annually from the Soviet Union. Most of that goes to satellite countries, although some has found it's way into Western Europe at times."

Trading energy materials for the needed grains was another possibility raised by audience questions. Although the Soviet Union is the world's largest producer of oil, most of it is utilized within their own boundaries. Only a small amount comes into the U.S.

Second speaker for the morning was H.D. Luttringer, vice president for Worldwide Marketing and Communications, Sperry New Holland.

"Mankind has three basic needs - food, clothing and shelter; the farmer provides for two of those three basics," stressed Luttringer. "No other business has made the tremendous strides that the farmer has made in providing these basics."

Tying the American farmer's productivity in with his location, Luttringer cited York and Lancaster counties as prime examples of economic growth brought about by successful agricultural foundations.

"We live in the 'green belt,' that four per cent of the earth's surface where the food comes from. And that's where the population is moving," he said.

"But machines have enabled the efficient farmer to be even more so," continued the Sperry executive. "Mechanical improvements, including the soft inflatable rubber tire, have speeded the modernizing of farm equipment."

Luttringer foresaw a continued improvement in mechanized farming, noting that each time crop hybridizers change the characteristics of crops, machinery engineers must be right behind them, adapting machinery to row heights, width, and planting techniques.

"If we don't do it - John Deere will!" quipped Luttringer.

While he did not predict equipment costs dropping in the future, Luttringer emphasized that other farm costs have risen higher than machine costs. Her cited statistics of farm expense inflation, including an increase of 350 per cent in land costs, 255 per cent wage increased, and 239 per cent increased in fertilizer costs, compared with the 233 per cent jump in machinery prices.

Luttringer concluded his presentation with a film, "The Miracle Machine," produced by Sperry New Holland for principal use with non-farm viewing audiences. The entire production centers around the marvelous efficiency of the modern combine, showing an American housewife how it contributes to every portion of the meal she prepares. Available

MILKERS

DID YOU EVER STOP AND THINK...

To balance your milking profits, first balance your milking system.

WITH OUR TRAINED SERVICE TECHNICIANS – THE LATEST IN TESTING EQUIPMENT – WE CAN SERVE YOU BETTER.

LET US SHOW YOU WHAT BETTER MILKING MEANS . . .

★ Better Milking means healthier udders
★ Better Milking means a better let down
★ Better Milking means a better milkout
★ Better Milking means higher butterfat test
★ Better Milking means more gentle milking at teat end
★ Better Milking means a Vented stretch Bore Liner
★ Better Milking means alternating pulsation for better massaging
★ Better Milking means a Lower Vacuum

Better milking means more Profit which is yours.

This is what Bou-Matic will do for you. Give us a call or drop us a line.

We will be glad to have our Salesman give you a demonstration on better milking.

'Ag leading the way'

(Continued from Page 62)

from Sperry, the film can be obtained by interested organizations by contacting Luttringer's office.

By special arrangement with the Allis-Chalmers Corporation, York, an audio-visual presentation, "Salute to the American Farmer," was featured during the afternoon program. This multi-screen slide and move production was Allis-Chalmers' Bicentennial project. It was shown across the nation during 1976. Narrating the sight-and-sound display was Ginny Haberman, who was responsible for working with USDA in producing the program.

Agway exec blasts environmentalists

By JOYCE BUPP
York Co. Reporter

YORK, Pa. - "I'm not here to talk about pollution - we're all against that ' I'm here to talk about the free enterprise system on the brink!"

Norwood K. Talbert does not mince words. The fuse he lit at the beginning of his afternoon address of the York Agribusiness Seminar ignited in several verbal explosions throughout the dynamic speech. He aimed the shots at emotion-charged environmentalists in general and at the lawyers backing them in particular.

A registered professional engineer, Talbert is the director of Environmental Quality and Engineering for Agway, Inc., Syracuse, N.Y. His printed topic, "Environmental Quality - What It's All About," understated the concern he shared for the future of America as a democracy.

This engineer blames, in a large part, lawyers who interpret environmental laws as giving them a completely different message than legislators had originally intended.

He cited the Clean Streams laws as prime examples of extreme legal interpretation. Those laws, he insists, weren't even necessary. Simple enforcement of the legislation already on the books would have been sufficient.

One phrase in that particular legislation drew Talbert's wrath. The objective for 1977 cleanup standards is to be regulated by "the best practicable control technology currently available."

"And what does 'best practicable control technology currently available' mean?" demanded Talbert. "It means whatever a lawyer at the Environmental Protection Agency wants it to mean!"

The engineer believes that the answer to doday's over-regulated society lies in a quick return to the incentive system.

"The answer is in the freely competitive system that made us great. Set economic incentives to develop research that will lower polluting effects. The cornerstone of our greatness lies in the patent process of this country," Talbert continued.

Statistics back up Talbert's claim that creativity in this country is being stifled, due to the loss of incentive caused by cooking government laws.

For the past five years, patent grants have rapidly declined. Yet, the Soviet government recorded 28 per cent more patents registered in Moscow in 1974 than had been granted in 1973, while the American "capitalistic system" seems to be falling behind in the "new ideas race."

"It is time to put some businessmen, some scientists, some chemists in Harrisburg and Washington. Get the environmental laws changed - and get them changed fast!" urged Talbert.

"Farmers, too, need to get involved, because industry and agriculture go hand in hand; and we need each other."

Talbert closed with this soul-searching plea: "If not you - who? If not now - when?"

Steve Trostle heads 4 H'ers at Ore Valley

ORE VALLEY, Pa. - The Ore Valley Community 4-H Club elected its 1977 officers at the January meeting.

Those named were: Steve Trostle, president; Jim Lambert, vice president; Tammy Barnhart, secretary; Troy Ness, treasurer; Kimn Liebhart, reporter; Deb Lau, song and game leader, and Judy Waltersdorf, historian.

An officers' training clinic for all new officers and teen leaders will take place Feb. 14 at the 4-H Center near Bair.

"This clinic is also open to any 4-H'ers," Kim Liebhart said. Those interested should contact Mrs. R. G. Lau or the Cooperative Extension Office at the York County Courthouse.

Mac McGuigan showed a movie, "Riding For Fun." McGuigan is a representative of a nationally known feed company.

A volleyball game is scheduled for the February meeting. It will be held at the 4-H Center Feb. 24.

Those who live in the Red Lion or Dallastown area and are interested in becoming a 4-H member, should contact Mrs. Lau or the Cooperative Extension Office. Members must be 8 to 19 years old.

Maryland farms lumped into one

ANNAPOLIS, Md. - As Marylanders observed "Maryland Agriculture Week" (Jan. 31st through Feb. 5th) they may not have realized just how big the state's agricultural industry really is.

Consider that 42 per cent of the state's land area is still in working, productive farms. Imagine it all as being one farm. In 1976 here's what would be on that Maryland farm: 182 million broiler chickens, 83,000 turkeys, and 1.5 million egg laying hens. They would produce 728 million pounds of broiler meat for the table, 81 million eggs and 6.5 million pounds of stewing meat and almost two million pounds of turkey meat.

The cow and cattle herd would number some 450,000 animals of which 143,000 would be milk cows. They would produce 1.65 Billion pounds of milk and 118 million pounds of beef!

The swineherd would number about 240,000 hogs which would produce 54 million pounds of pork.

The "farm" would also have 18,000 sheep which would produce 115,000 pounds of wool and one million pounds of lamb and mutton. Horses and ponies would number around 17,000.

The physical size of this farm is 2,667,683 acres. The total cropland would use 1,779,634 acres and the crops, despite some cranky weather last year, produced immense quantities of grain, vegetables and tobacco.

Corn is the largest crop - from 728,000 acres the "Farm" produced a record 57.3 million bushels of grain and 1.4 million tons of silage to feed livestock. Soybean fields totaled 285,000 acres and produced 7.1 million bushels. The wheat crop was 5.2 million bushels from 138,000 acres. The barley crop was 4.2 million bushels from 94,000 acres. The "Farm" also had 24,000 acres in oats and harvested a crop of 1.3 million bushels and a rye acreage of 11,000 and a crop of 297,000 bushels.

Tobacco fields covered 23,000 acres and harvest was 28.8 million pounds. The potato patch was almost 4,000 acres and produced 18,600 tons of Irish and sweetpotatoes.

For fresh vegetables farmers planted 9,050 acres and for canning and freezing there were 39,500 acres. All told, 188,350 tons of vegetables such as snap beans, sweet corn, tomatoes, lima beans, spinach, peas, cucumbers for eating and pickling and soon, were harvested.

It works out to just over 70 pounds of vegetables for each man, woman and child in the state.

The orchard on the "farm" is also quite large. It includes 327,000 apple trees and almost 240,000 peach trees from which despite a very bad year for fruit production, 62 million pounds of apples and 15 million pounds of peaches, were harvested.

The "farm" also had many thousands of acres in nursey production (10,000 acres in sod alone) and produced vast quantities of fruit trees for sale, strawberry plants, shrubs, plants and so on.

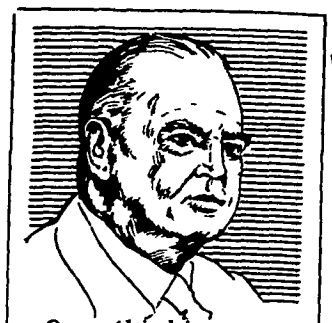
There would be a super size apiary which would include 11,000 colonies of bees. These bees fly trillions of miles each year to pollinate field and orchard crops.

On the human side of this farm you would find 33,000 full time workers and of these workers about 12,000 would be part owners. The number of machines they use is 35,000 tractors and 22,500 trucks alone.

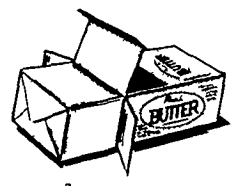
They would gamble almost $600 million dollars of supplies, feed, fuel, taxes, hired labor, energy and interest along with their hard work and skill against very tricky weather and market conditions. For their efforts they would produce almost half the food needs of the state and earn a profit of perhaps $180 million from gross sales of about $750 million.

And there is another benefit to farmland: it provides so much of the state's beauty and renews much of its vital water and clean air resources as a fringe benefit enjoyed by Maryland's 3,947,000 non farm citizens.

American Viewpoints



Our thinking must square against some lessons in history, some principles of government and morals, if we would preserve the rights and dignity of men to which this nation is dedicated.
Herbert Hoover



case

What's new

WOOD-OIL FURNACES

The new "Powrmatic" wood-and-oil combination furnaces are designed for use where fuel oil is scarce and-or expensive and wood is readily available. Wood and oil are burned in separate combustion chambers, and the switch is made automatically from one to another. The furnace can be fired when power is off. Combination furnaces are available in four popular sizes in the range from 112,000 to 170,000 Btu output.

Powrmatic, Inc., 2906 Baltimore Blvd., Finksburg, Md. 21048.

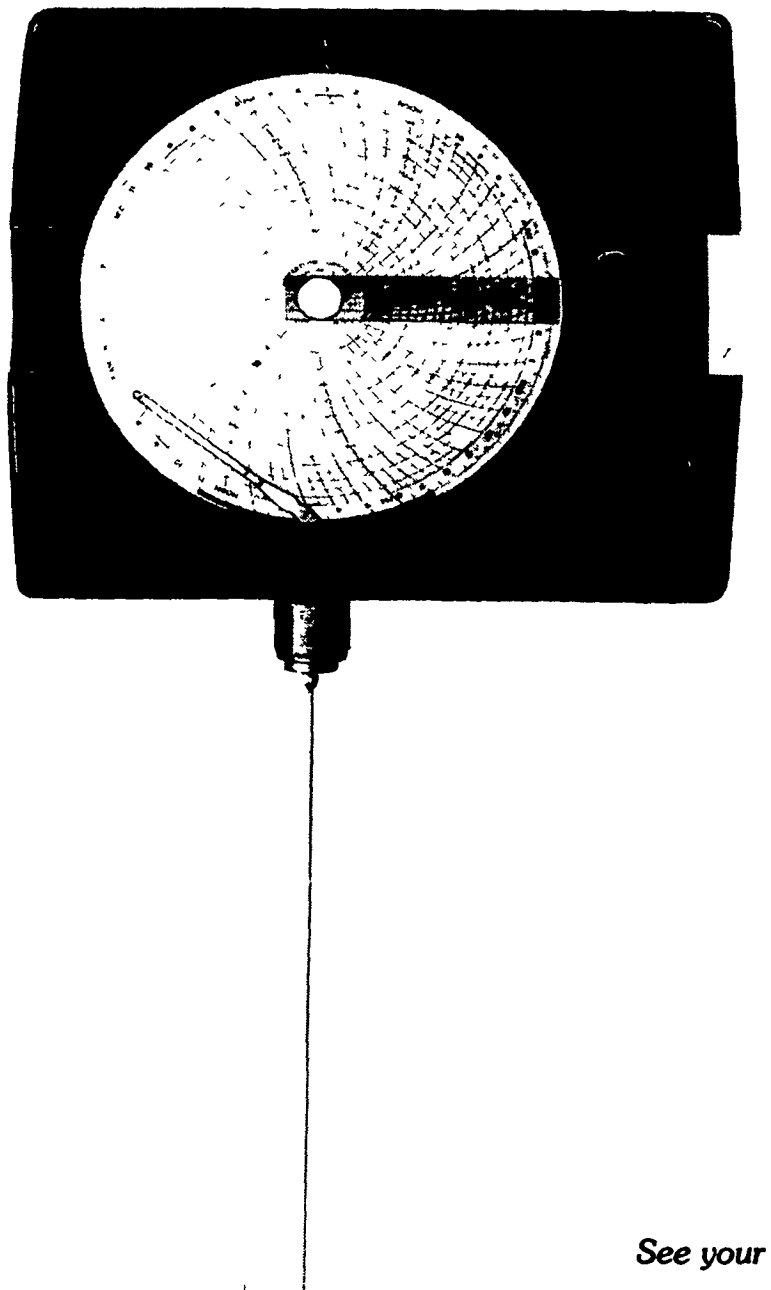
STEAMBLASTER

Citation Manufacturing Co., Inc. of Siloam Springs, Arkansas, just introduced its new Model 80 Steamblaster. The company says it is the most compact steamblaster on the market today, with capabilities of producing 60 GPH at 175 PSI. This machine was developed for the farm and agriculture industry. It cleans dirty machinery, feed wagons, dairy barns and farrowing houses. The unit comes complete with built-in float tank, fuel tank, chemical metering valve, auxiliary chemical hose and portable gear.

WIRE MESH

American Screener Corporation announces that it has added wire mesh to its quality line of products for the grain screening, cleaning and scalping industry. Wire mesh is available in most wire diameters and in virtually every opening size and design. American Screener Corporation can provide wire mesh in sheets cut to your size requiremens or it can be formed or frame supported to suit the customer's need. A free wire mesh catalogue is available on request from American Screener Corporation, Box 563, Minneapolis, Minnesota 55440.

THE SENTINEL



Round-the-clock guardian of stored milk temperature

If you depend upon your milk check for a living, protect that income by insuring milk quality.

The least expensive, single-payment insurance obtainable is the Sentinel — the heavy-duty, 10-inch recorder which charts round-the-clock temperature of your milk-cooling or holding tank.

Assure yourself — and your processor — that proper milk temperature is always maintained.

Keep a permanent log of compressor operation and tank cooling or pre-cooling efficiency, from first filling to pickup.

Cleaning temperatures — increasingly questioned by sanitarians — are recorded on the same chart.

At little added cost, the Sentinel is available with provision for actuating an alarm or warning light if milk holding temperature rises above pre-set level.

Remember — if it prevents the loss of only one tank of milk, the Sentinel has paid its own way.

State board meets to set pesticide guidelines

HARRISBURG, Pa. - The State Pesticide Advisory Board met January 27, for the first time, acting to bring the state into compliance with requirements set by the Environmental Protection Agency (EPA) which extended the responsibility of pesticide control to the state under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA).

The Pesticide Advisory Board was mandated by the Pennsylvania Pesticide Control Act of 1973. Its members, appointed by the Governor, serve to advise the Secretary of Agriculture and discuss state regulations which affect the sale and use of pesticides. The membership of the committee includes representatives of the Pennsylvania Departments of Agriculture, Health, Transportation, and Environmental Resources, the Pennsylvania Fish and Game Commissions and various industries which are affected by the new law.

Pennsylvania's Acting Secretary of Agriculture Kent D. Shelhamer, who held a series of statewide hearings on pesticides which resulted in the Pesticide Control Act, opened the meeting and told the board members that he hoped by mid-Spring to be able to provide due notice and a public hearing so that the regulations for carrying out the provisions of the Pennsylvania Pesticide Control Act could be adopted.

The Pennsylvania Pesticide Control Act of 1973 was developed to set some direction for control of pesticides within the Commonwealth exclusive of EPA enforcement of federal pesticide regulations which affect the state. Shelhamer said that the Act substantially strengthens the state's ability to protect consumers and applicators alike from hazards caused by the misuse of pesticides. The risks of using pesticides have increased in recent years due to the sharp rise in their use by agriculture, industry, householders and government.

All pesticides being sold within the Commonwealth must currently be registered by the Pennsylvania Department of Agriculture as well as the EPA. Pesticides will be classified for general and restricted use, with restricted use being determined on a basis of toxicity and environmental impact. It is expected that most pesticides bearing the "skull and crossbones" symbol will be included in the restricted use list.

Shelhamer said that the Pennsylvania Act also provides for the certification and licensing of all individuals and businesses using or supervising the use of restricted pesticides. Tests for certification of pesticide applicators are being administered by Agriculture Department personnel. All users of restricted pesticides are required by law to be certified prior to October 21, 1977.

In addition, all pesticide outlets handling restricted use pesticides will be required to obtain a license to sell them. Sale of restricted use pesticides will be made only to individuals with the proper credentials to verify their certification.

The Agriculture Department's Bureau of Plant Industry is maintaining a list of all registered pesticides, dealers and applicators who have been certified for use of restricted pesticides.

The regional offices of the agriculture department have been giving examinations to qaulify people as pesticide applicators for over a year. Shelhamer advised farmers and commercial applicators to secure study materials for the examination through the regional offices. The materials are included in Penn State Correspondence Course number 181, Pest Management and Environmental Quality.

Farmers can study at their own leisure and take the exam at home. The exams should then be sent to Penn State for grading. Commercial applicators can study the material for the specific category in which they want to be certified and then take the examination at a regional location.

Prior to the October deadline, Shelhamer advised pesticide users to be very careful when applying the pesticide. When an accident does occur, it is important that the Department of Agriculture is notified so they can take steps to remedy the situation and prevent further contamination and poisoning. Suspected human pesticide poisonings should be promptly reported to a doctor or poison control center.

Information on pesticide applicator certification can be obtained by contacting the regional offices of the Department of Agriculture in Meadville, Gibsonia, Altoona, Williamsport, Tunkhannock, Summerdale, and Lansdale.

SALES REPRESENTATIVES NEEDED

Company changes name

NEW HOLLAND, Pa. - A & C Equipment Co. has changed its name to Power Pro Equipment Co., it was announced recently by Michael J. Lardner, general manager. Offices, showroom and service facilities will remain at 780 East Main Street, New Holland. In making the announcement, Lardner said, "This name change and accompanying logotype revision climaxes a program of updating and expanding our company's services to meet the increasing demand for professional power equipment."

Power Pro Equipment Co. was founded in 1961 as a division of Abram S. Horst Inc., a New Holland based construction company, and merged with Hustler Equipment of Lancaster in 1976. It has become one of the area's major dealers in the sale and service of professional power equipment for industry, agriculture, turf maintenance and the construction markets.

Power Pro is a distributor of Owatonna Mustang skid steer loaders, Hustler grounds maintenance equipment and Pettibone high-lift and wood utilization machinery. Power Pro's sales manager is Rollin R. Rheinheimer.

The company also maintains a comprehensive service and parts department. According to Earl S. Martin, customer service manager, Power Pro Equipment Co. is the only area dealer of its type equipped with mobile-dispatched service trucks.

What's new

NEW PEARSON BETTER BILT LIQUID SPREADER

Two new models 2600 and 3600 gallon Better Bilt liquid manure spreaders are now available from Pearson Brothers. Both models feature powerful vacuum loading and pressure discharge with air agitation inside of the tank. Manure is spread evenly in a 35 to 40 foot pattern on the soil.

Two types of plowdown manure injection systems to control runoff and pollution are optional.

A spring tooth unit mounts slightly ahead and inside of each wheel. It is hydraulically controlled to inject manure to a depth up to 12 inches. The second optional plowdown system mounts on 3 point tractor hitch, separate from spreader. It will inject liquid manure and sludge up to 14 inches in the soil. Other options available for these two models include rear door for clean out and tank recoating, truck mounting plus fast-back skid mounted units are available.

Complete information can be obtained from the Pearson Bros. Company, Box 192, Galva, Illinois 61434.

NEW COMPUTER SERVICE

Wayne Dairy Marketing has announced the computerization of the entire Wayne Dairy Maximizer Program. Each Wayne salesman now has at his disposal the Maximizer Computer Program - Maxine.

Wayne Research and Dairy Marketing have programmed Maxine into a central computer bank. Access to this computer bank is through several portable terminal units located throughout Wayne's market area. This permits easy and immediate availability for each Wayne salesman.

Maximizer calculations can now be done with computer speed and accuracy. The process, which formerly required hours of hand calculations, is computed and printed within seconds by Maxine. Maxine produces an easily-read, easily-understood printed report - clear, useful and relevant information for dairymen.

The present Maximizer Program includes proper balance of protein, energy, fiber, calcium, phosphorus, and magnesium. These factors are all important and their proper balance essential for maximum milk production and profit. An imbalance of one can effectively limit production. Proper balance is the key.

The Wayne Dairy Maximizer calculates proper balance for each unique feeding situation. The variety of farm roughage combinations is considered for each dairy herd on an individual basis. Maximizer calculations determine the best milking ration and mineral supplement to accurately balance nutritional needs with the available roughage program.

Wayne salesmen are trained to carefully observe each dairy operation. Important factors such as the livestock, facilities, environment, and work force involved must be understood before recommending a Maximizer program. Sound and lasting business is earned through sound nutritional and herd health recommendations.

FARM FAMILY WANTED

Sara-Lou Farms needs a farm family NOW, preferably raised on a farm, with lots of farm operating experience This family will live in a charming two story restored home with two full modern baths & three bedrooms (best suited for a family with no more than 3 children). The farmer will be a full time employee taking care of a large organic vegetable garden on a medium size homestead and help to raise grains and hay for our animals. The husband and wife will both assist in the care of the goats, rabbits, poultry and swine. The farmer should be mechanically inclined. No smoking is ever allowed. We are offering a healthy living situation, a good salary, & long term security for those eager to learn the organic way! Sara-Lou Farms is a small natural organic farming and dairy goat operation where exciting things are happening in a healthy environment. For interview, please mail all replies to

FEATURING

THE OIL STORY
Hear Oil Company Representatives answer your questions -
- Is there really a difference between various kinds and types of oil?
- How does oil quality affect farm use engines?
- What viscosity oil should be used throughout the year?
- What about oil additives and synthetic oils?

THE PLANTER STORY
- First hand information on the real air planter.

THE TRACTOR STORY
- Find out why the 86 Series Tractors are the best you can buy.

THE SPRAYER STORY
John Bean and Walsh Sprayers -
- Hear about the sprayers to fit any size operation.

THE BULK TANK STORY
- Hear how Girton builds quality into their tanks.

THE TILLAGE STORY
- Get the facts on heavy duty flexible tillage tools.

CHESTER COUNTY DHIA MONTHLY REPORT

The high lactation for Chester County's December DHIA program was turned in by Paul King's "Beauty," a 6-year old Holstein who completed her 289 day lactation with 25,052 pounds of milk, a 4.8 per cent test, and 1212 pounds of butterfat. Two other cows topped 1000 pounds of butterfat in the County, one belonging to Jacob Stoltzfus, and the other in the herd of Lloyd Mast.

Vaccine may have caused hog cholera

WASHINGTON, D. C. - The development of effective hog cholera vaccines in the 1930's and 1940's removed the "fear" of devastating outbreaks for most swine producers. Thereafter producers were told that vaccines were the only way to protect against financial disaster.

The success of the eradication program in the 1960's - with indemnity payments as "insurance" against losses - may not have completely reassured all hog farmers that they were protected against hog cholera. Thus, it's possible that "fear" of the disease might have caused a producer to stockpile hog cholera vaccine in a home freezer back in 1969 when the U.S. Department of Agriculture (USDA) first mentioned that hog cholera vaccine would be banned.

Even today, with only isolated outbreaks, hearing or reading about a case of hog cholera nearby, a producer's "fear" of the disease might cause him to use some of that stockpiled vaccine. He might not realize that this vaccine can actually cause the disease or mask the disease for a period of time. And when these vaccinated hogs got into market channels, they could spread hog cholera over a wide area and across state lines.

If you have some hog cholera vaccine, or know of someone who does, get rid of it promptly. The best way to destroy it is by burning; or call a state or federal veterinarian, who will destroy it for you.

Hog cholera was confirmed in 18 herds during 1976. These herds were all located in New Jersey, Rhode Island, Massachusetts and New Hampshire. The cause of these outbreaks has not been determined, but "fear" of hog cholera could have caused the use of vaccine.

Partnership agreements discussed

LEESPORT, Pa. - Area farmers met at the Berks County Agricultural Center on Wednesday evening, Jan. 19, 1977 to listen to Fred Hughes - farm management specialist of Penn State University. Hughes discussed some of the basic aspects involved in building farm partnership agreements, incorporations, and contract sales agreements between father and sons.

"We don't recommend corporations in Pennsylvania" Hughes stated, even though there are some advantages. The advantages that were pointed out included the easy way to transfer stocks to children, liability reduction, and the easier ability to borrow money. But because corporations are subject to capital stock tax and a nine per cent income tax, it makes it too difficult on the financial basis in most instances.

Hughes seemed to like partnerships but he stressed that they had to be set up right to be successful. He pointed to two major questions prospective partners should consider. The basic and most important question is whether the members are compatible and can reach agreements through discussion. This was also cited as the major reason partnerships break up.

The second question dealt with the size of the farm. Could it support everyone comfortably? If it couldn't how are you going to expand?

Determining ownership was another basic problem discussed. Hughes cited three ways that this could be started. 1. Making an inventory of what is already in the business, 2. taking the true agricultural value, or 3. by the use of an up to date assessment.

The speaker felt the best way for a father and son to begin as partners was to bring in the personal property and leave the real estate out until a later date. Several reasons were then cited explaining why this would be easier. The son would be buying in on the tangible property. The real estate would be too much of a financial burden for the son at first, and also it would give the parents time to consider the other children.

"The most important thing partners have to do is to look at the farm as a business, not as the place where they live." Hughes said.

Another subject discussed by the speaker was the effects the changes in the new estate laws would have on a partnership since there would be no gift tax implications after 15 years. Hughes pointed out some of the weak points in the new law as well.

The farm management specialist told the audience that 60 per cent of the farms are purchased by sales agreements, sometimes called purchase contracts. He said that he felt this was the best way for a son to purchase a farm from his father. The speaker went on to explain that sales agreements are an advantage to the seller if the down payment is not over 30 per cent because of the capital gains tax involved.

Ewe lambs increase four per cent

DENVER, Colo. - For the first time in ten years, government statistics showed a definite trend in halting a decline in sheep numbers in the United States.

Figures released by the United States Department of Agriculture showed an increase of four per cent in total ewe lambs as compared to a decline of 11 per cent last year - a net change of 15 per cent. Increasing ewe lamb numbers represents the first positive step toward rebuilding the sheep industry.

"The report presents an encouraging picture and reflects the results of an intensive industry-wide effort during the past two years to halt the downward trend," said Richard D. Biglin, executive director of the American Sheep Producers Council.

The Denver-based Council is the informational and promotional organization for some 120,000 sheep producers nationwide.

The value of all sheep and lambs increased from $497.5 million a year ago to $538.7 million with the value for each head increasing $5.20 over the year to an average $42.40 per head.

The year-end report also revealed a meaningful slowdown in the decline in overall sheep numbers, from eight per cent or 13.3 million last year to five per cent or 12.7 million this year.

"We have a long way to go but we hope to sustain this positive trend," Biglin said, "although it is not likely to have an immediate, direct impact on supply of lamb and wool."

EAYF meeting tonight

EPHRATA, Pa. - The Ephrata Area Young and Adult Farmers will hold their 8th annual banquet this evening at the Mount Airy-Durlach Fire Hall at 6:45 p.m. Recently elected officers for 1977 - Vernon Leininger, president; Kenneth Hertzog, vice president; J. Calvin Zimmerman, secretary; and Luke Horst, treasurer - will be installed at the meeting. Henry Givler, area vo-ag consultant, will conduct the installation ceremonies.

The evening program will also include presentation of appreciation and outstanding farmer awards.

Special entertainment will be provided by a musical group, "The Stylists."

The banquet meal will be served family style by the Ladies Auxiliary of the Durlach-Mount Airy Fire Company. The menu includes baked ham, potato filling, fruit cup, baked beans, dried corn, gravy, peppered cabbage slaw, rolls, butter, relish tray, milk, coffee, and ice cream.

Door prizes and awards will be sponsored by area agribusinesses. Banquet greeters will be Mr. and Mrs. Paul Bucher and Mr. and Mrs. Earl G. Martin.

The retiring officers - Tom Zartman, president; Luke Zimmerman, vice president; Vernon Leininger, secretary; Melvin Nolt, treasurer; and Mahlon Eberly, public relations director, planned this year's banquet.

The Ephrata Chapter of Young Farmers last year had 117 members.

Foot and mouth disease affected

USDA considers quarantine facility

NEW YORK, N.Y. - The U.S. Department of Agriculture has proposed criteria for the location, design, construction and operation of an overseas livestock quarantine facility that would screen cattle prior to shipment to USDA's new animal import center to be constructed at Fleming Key, Fla.

Officials of USDA's Animal and Plant Health Inspection (APHIS) said the quarantine facility would be located at a foreign port-of-embarkation. This would be one of the safeguards when, for the first time since 1930, cattle may be imported into the United States, via Fleming Key, from areas designated by USDA as having foot-and-mouth disease (FMD) or rinderpest, two highly contagious foreign livestock diseases.

Public comments on the proposed criteria may be submitted until March 22, 1977 to the Deputy Administrator for Veterinary Services, APHIS, U.S. Department of Agriculture, Hyattsville, MD 20782.

The overseas port-of-embarkation quarantine facility, together with the Fleming Key Animal Import Center, is part of a new high-security livestock import system that will permit valuable new breeding stock to be imported safely from selected FMD or rinderpest-infected countries - thanks to careful screening, long-term isolation and stringent veterinary testing and examination.

Criteria and standards proposed for the facility would include:

- Isolation from all domestic and wild ruminants, swine, and poultry;
- Location close to docks, which can be reached without exposure to animals or poultry enroute;
- Security against contact with other animals or potential carriers of disease through the design of fences, buildings, access control and sanitary systems;
- Provision for paving, pens, loading chutes, dipping vats, feed storage, water supply, examination facilities, laboratory space, and areas for workers to shower, change clothes and eat.

APHIS officials noted that the requirements for the overseas quarantine facilities are in many ways similar to those provided at the Fleming Key Animal Import Center, where foreign cattle will have to pass a five-month isolation period and meet rigorous veterinary health tests before entering the United States as new breeding stock.

Fleming Key is located at the tip of the Florida Keys, on an isolated portion of the Key West Naval Station. Location of the overseas quarantine station has not been designated.

Funds sought

HERSHEY, Pa. - WITF-TV-FM, the regional public broadcasting stations for south central Pennsylvania, have announced a capital campaign to be conducted throughout their ten-county service area for the replacement and upgrading of transmission facilities.

The capital campaign, the first since WITF went on the air in 1964, will be conducted throughout February and March, with a goal of $475,000 in pledges. The remaining funds to meet the total project cost of $950,000 will come from a matching grant from the U. S. Department of Health, Education and Welfare.

Park cabins for rent

HARRISBURG - Rep. Noah W. Wenger, R-Lancaster, urges Pennsylvanians interested in reserving family cabins in the 11 state parks for the Summer season to apply before the March 15 deadline.

The minimum reservation period is one week running from Saturday to Saturday. However, half-rental periods are available during the Spring and Fall seasons at one-half the weekly rate.

Wenger listed state parks which have cabin facilities available this Spring as: Black Moshannon, Philipsburg; Clear Creek, Sigel; Cook Forest, Cooksburg; Cowans Gap, Fort Loudon; Kooser, Somerset; Linn Run, Ligonier; Promised Land, Greentown; Ralph Stover, Point Pleasant; Park-er Dam and S. B. Elliot, Penfield; and Worlds End; Forksville.

"Additional information on cabin rentals, applications forms and leaflets detailing recretaional facilities at all 97 State Parks can be obtained by writing to Rep. Noah W. Wenger, P. O. Box 109, House of Representatives, Main Capitol Building, Harrisburg, Pa. 17120 or the Bureau of State Parks, The Department of Environmental Resources, Box 1467, Harrisburg, Pa. 17120 or the individual park."

Tractor club meets

The Loganville 4-H Tractor Club held its first meeting Monday, January 31 at the Home C. Harry Miller, Glen Rock R2.

Members will be learning tractor safety and maintenance during the course, scheduled to meet for several weeks. Boys and girls, ages 8 to 19 and living in the Glen Rock-Loganville-Shrewsbury areas, are invited to join the Tractor Club.

For additional information, contact Mr. C. Harry Miller or the York County Extension Office.

*Flexibility - "Tailor-made" system on your Farm
*Better utilization, Minimizes odor and Pollution Run-off.
*Fill from bottom-crust forms on top - so prevents fly and odor.

HIGH SPEED slurry separator

ROYAL AGRICULTURAL SOCIETY OF ENGLAND
SILVER MEDAL
MACHINERY
1975

RELIABILITY
The pump has been proven over more than 10 years successful operation and we are so confident in its strength that we offer a guarantee period of two years - double that of most other manufacturers.

EASY MANAGEMENT
The auger flights have been given a specially abrasive, hard wearing tungsten carbide cutting edge which acts like a large liquidiser on all straw and other waste material, thus reducing the risk of pipe blockage and making slurry management simple.
The steerable recirculation nozzle ensures the liquidity of all the slurry in the reception pit.
The controls are few, simple to operate and positive in execution.
The pump may be used in a reception pit or in a larger storage pit or even a lagoon.

Berk's COUNTY DHIA MONTHLY REPORT

Four cows in the Berks County DHIA program completed records with over 900 pounds of butterfat in the month of December. The highest butterfat producer is Anabell, owned by Richard R. Troutman. She tallied up 932 pounds of butterfat in a 305 day lactation period with 27,086 pounds of milk in that time. The next highest producer was Tammy owned by Ray E. Bicksler. Tammy had a record of 923 F and 23000 M.

Tammy was followed by Orange, owned by Charles Plushanski with 917 F and 26273M. The other animal that broke the 900 lb. limit was a cow owned by Wernersville State Hospital. She had a production record of 912 F and 24375 M.

Laminated Rafters:

The First Choice for Economical Space True Flexibility and Total Satisfaction...

Build your next building using dependable wood LAMINATED RAFTERS AND ROOF TRUSSES—and save time on your job by fast and easy erection.

COMPLETE MATERIALS FOR ALL FARM BUILDINGS

WE STOCK FABRAL STEEL AND ALUMINUM ROOFING

PROMPT DELIVERIES ON-SITE CRANE SERVICE

Your barn will always be a healthier place for your animals with Rigidply rafter construction. For Free Stall Housing continuous ventilation is assured by a ventilator roof and air flow always available through the heel. This flexibility allows proper ventilation for all seasons with a minimum amount of condensation. The flexibility of the arch extends also to construction; often the arch and wood decking system will permit construction to continue into peak winter months.

Farm film presented

QUARRYVILLE, Pa. - "Farming Frontiers '77", a film program devoted to the business of farming, will be presented on Friday, February 11 at Wenger Implement, Inc., at The Buck, Quarryville. The showing begins at 9 a.m. and runs to 3 p.m.

The program includes Furrow on Film subjects, which show the latest developments in farm management. Also included will be motion pictures showing the new John Deere balers, grain drills, forage harvesters, and other farm equipment being introduced for 1977.

A 23-piece John Deere ½-Inch Drive Socket Wrench Set and three John Deere Insulated Vests will be given away as door prizes. Hot cakes and sausages will also be served.

Tylan®:
tylosin
The Feed Saver.

23,838 farm-raised hogs proved it.

Performance results from only a handful of pigs just won't cut it anymore. You need facts. Plenty of them. Tylan proved — in thousands of hogs, in programs just like yours — it'll save feed, boost gains, cut production costs.

Land grab suspected

WASHINGTON, D.C. - Senator George McGovern recently called on the new Secretary of Agriculture, Bob Bergland, to begin an immediate investigation of reports that Continental Illinois Bank and Trust and the nations largest stock brokerage firm, Merril, Lynch, Pierce, Fenner and Smith have laid the groundwork for a financial scheme to gain control of $50 million of prime farmland.

The joint venture plan calls for the two financial giants to make the purchases of farmland with a pool of funds invested by pension funds and profit sharing plans. Land so acquired would then be leased to farmers to operate on shares.

McGovern said that the effect of the plan would be to re-establish the worst aspects of the old share-cropping system since it contains no provision for eventual ownership of the leased land.

McGovern, chairman of the Senate Subcommittee on Agricultural Credit, said the plan highlights the need for a serious effort by the Congress to pass his Young Farmers Homestead Act.

Further, he asked Secretary Bergland's views on the subject and promised that he would introduce legislation to halt the program if such legislation was necessary.

What's new

STORM WINDOWS

Season-all storm windows are available in a complete line of double-hung, slider, picture and basement window styles which separately or in combination will weather-proof practically any window.

Season-all storm windows can be ordered in mill or anodized finishes or in white, black or brown baked enamel which is warranted against chipping, cracking, blistering and peeling for 15 years.

Brochure illustrating all of Season-all's storm windows and reporting investment payback figures for different parts of the country and for the different heating fuels will be sent on request from Season-all Industries, Inc., Indiana, Pa., 15701.

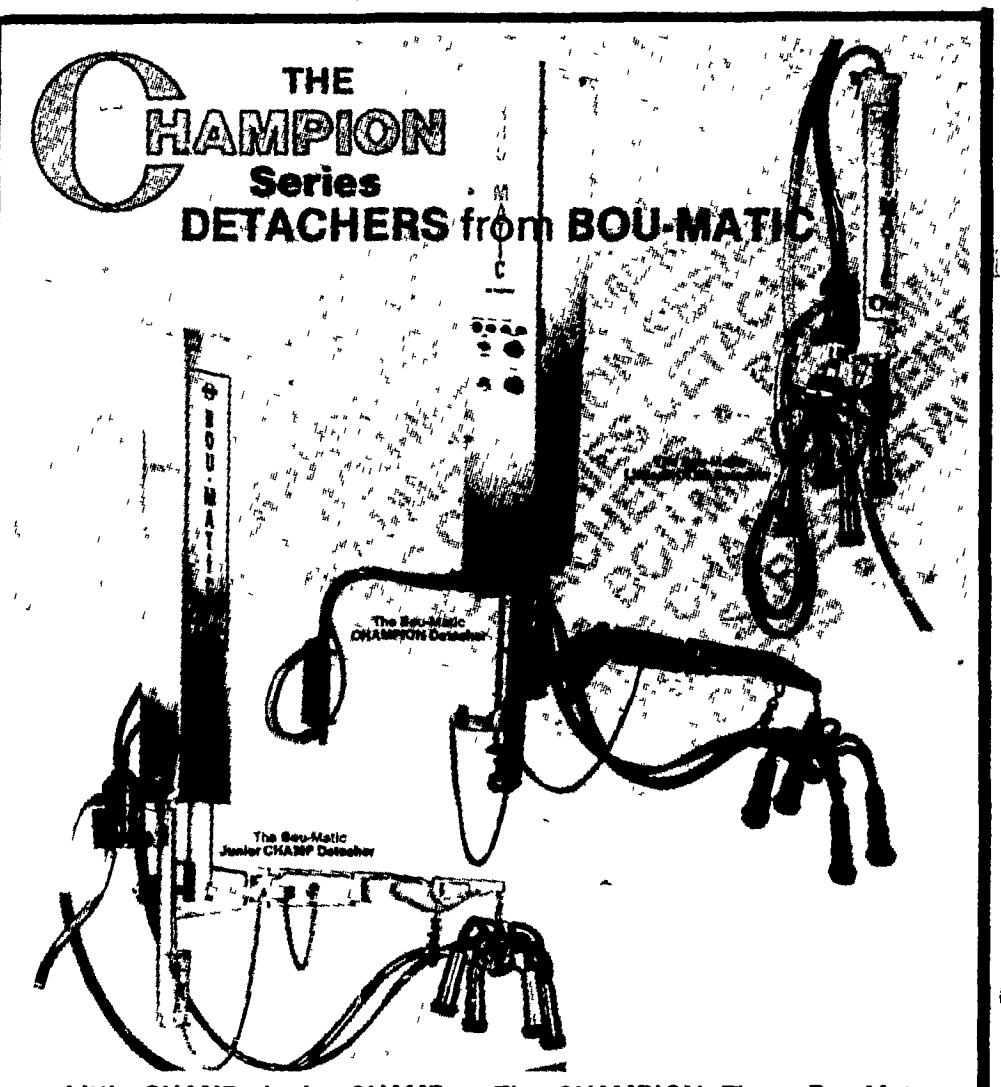
THE CHAMPION Series DETACHERS from BOU-MATIC



Little CHAMP, Junior CHAMP or The CHAMPION. Three Bou-Matic Champion Series Detachers with a range of features and prices designed to fit most dairy operations milking from 30 to several thousand cows.

First there's **Little CHAMP.** A basic detacher at a very basic price, designed to fit either parlor or around-the-barn pipeline systems. Basic in design yet with detacher functions equivalent to units costing many times more.

Next is **Junior CHAMP.** A detacher designed for the dairyman who wants detacher functions incorporated with some dairy proven convenience features that, until now, were available only on units costing much more. **Junior CHAMP,** by far, the finest intermediate detacher available.

Then, for the dairyman interested in the ultimate in automated dairy management tools, there's **The Bou-Matic CHAMPION** Detacher. With reliable, consistently accurate, dairy-proven features that all add up to more cows milked per man-hour of labor.

Three Champions, three solid reasons to consider Bou-Matic when investing in detachers. Ask your nearest Bou-Matic dealer for more information and a demonstration, today.

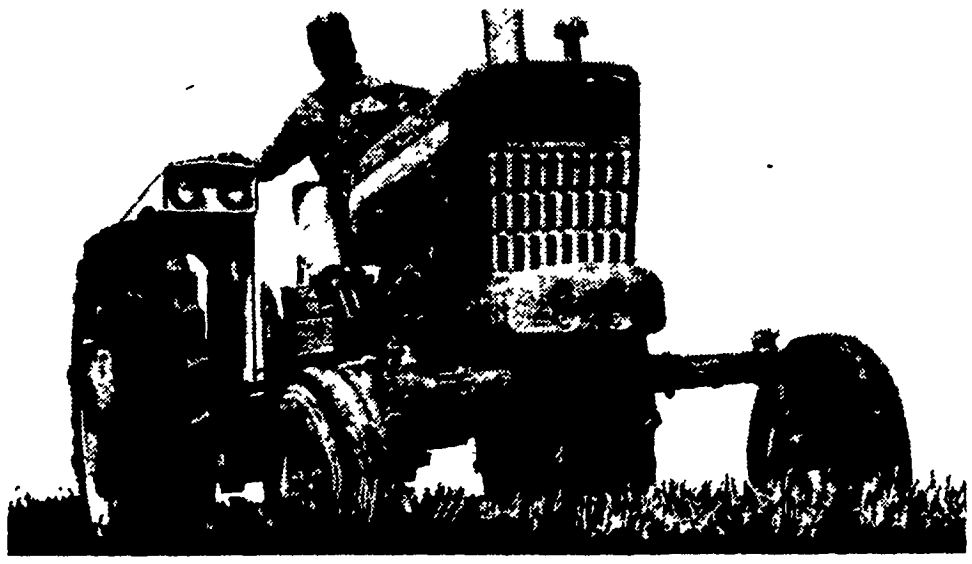
Why sweat out another season with worn out machinery?

When you try to make obsolete equipment do for "one-more-season", you're asking for trouble. Like inefficient operation, endless repairs and costly down-time. New equipment takes money, but this need be no problem for you.

Farm Credit loans are readily available . . . at reasonable rates of interest . . . with repayment scheduled at times most convenient to you. See Farm Credit for financing the equipment you need today.



COME IN, LET'S TALK IT OVER!

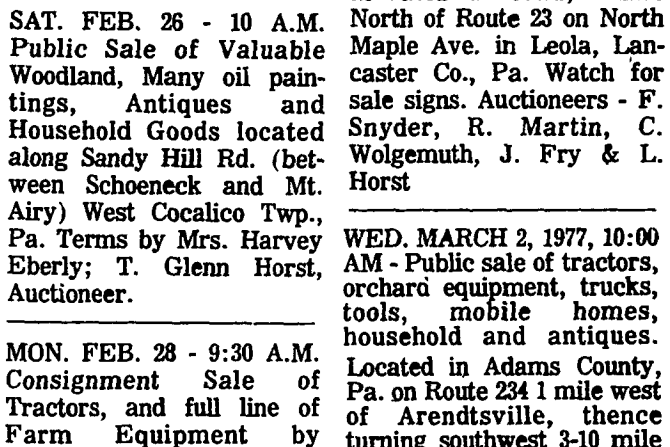
Federal LAND BANK Association



Design a plow with a big 3-foot clearance between bottoms increase the width of the furrow to 18 inches make the stub beam longer Happy result the Allis-Chalmers 2000 Series *Monoframe* plow Eight square feet of clearance so more trash can get through High-speed plowing without stopping too because Bump & Run bottoms lift hydraulically over obstacles and reset automatically No need to leave the tractor seat! Seeing is believing so come in now!

Monoframe is an Allis Chalmers trademark

A public sale of property was held on January 15 at the Thompson Farm, a 124.9 acre farm located 28 miles south of Lancaster and 24 miles from West Chester, Pa. The farm sold for $201,000 to Kenneth L. Hershey, Oxford R1. A very nice crowd of people showed and took part in the sale. Harry W. Whiteside was the auctioneer. He represents Whiteside Auction Service.

Auctioneer's Directory

Remember His Brother?
A minister at a funeral service says to the funeral gathering: "Before we send this man's soul to rest in heaven, can we have a good word about him?" There's complete silence, and the minister repeats his plea. Finally, a gentleman in the back pew offers: "His brother was worse!"

DAIRY BUSINESS MANAGEMENT MEETINGS

SPONSORED BY RALSTON PURINA COMPANY

FEATURE SPEAKER:
DR. J. P. EVERETT
DIRECTOR OF PURINA DAIRY RESEARCH

Dr. James P. Everett, Director of dairy research for Purina, has been associated with dairying since his childhood on his family's Georgia dairy farm. He helped his father with the family's herd of registered Jerseys until he left the farm to attend Auburn University in Alabama.

After receiving his degree in general agriculture at Auburn, he directed his studies to a more specialized field and gained his Masters degree in dairy nutrition from the University of Kentucky in 1957. The final goal in his formal education came when he obtained his Doctorate in dairy nutrition in 1963 from Michigan State University.

He left Michigan State to become an assistant professor in dairy husbandry at North Carolina State University, combining teaching with further dairy nutrition research. From that post, Dr. Everett moved to St. Louis to become manager of dairy research for the Ralston Purina Company. In this position, he directs all the work at Purina's Dairy Research Center which involves research in the development of new and improved dairy rations.

Dr. Everett is an active member of several dairy research organizations, including the American Dairy Science Association and the American Society of Animal Science.
